German · native

English · C2, fluent

SKILLS

Product leadership and delivery

Product management for a platform held alongside product design, twice · roadmap, prioritized backlog and reliable releases · the specs and the ticket board engineering works from · nine reports across four disciplines at Ninox

Agentic product work

Real-code prototypes against production APIs, and engineering ships from that code · Claude Code, Claude skills, Cursor, Zed · a taught workshop series on AI for design and prototyping · the design system synced across Figma and Android, with checks in CI that refuse off-system work

Discovery and data

Customer conversations and user research turned into user stories and a prioritized backlog · conversion and usage data in Google Analytics, Looker Studio and HubSpot · support tickets, HubSpot and forum posts mined at volume with Claude · Dovetail, Miro, Jira

Craft and quality

Figma and Figma Variables · prototyping · complex multi-party workflows · data-dense enterprise interfaces · EU accessibility compliance shipped · screen-reader semantics and ARIA

PROFILE

Product and design have been one job for me twice over. At ChurchDesk I held product management for the main platform alongside all of product design, writing the specs and prioritizing the board engineering worked from. At Ninox I ran Product Design and, for four months, Product as well — nine people across four disciplines.

Nine reports

across product management, data science, design and UX writing at Ninox — two functions at once

70% less

coordination time on the ChurchDesk booking capability, at 90% acceptance

A year

of agentic working in production, with engineering shipping from my prototype code

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) · Hamburg + Berlin, Germany

- Agentic working, introduced here from zero — I prototype in real code against production APIs with Claude Code, and the external engineering agency ships from that code.
- The specs, the board and the standard — I write the specs and prioritize the tickets engineering works from, and checks in CI refuse work that has left the design system.
- AI products shipped end to end — a support copilot for viewer services, and a fundraising system built solo from analysis and prompt architecture through to a production skill.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) · Copenhagen, Denmark · Remote from Berlin

- Product management for the main platform, alongside all of product design — I wrote the specs, prioritized the board engineering worked from, and was the one the launch customer called.
- A complex customer process rebuilt as a workflow — funeral booking across funeral homes, parishes and cemeteries: 70% less coordination time, 90% acceptance, then rolled out to the whole customer base.
- The scoping call, defended through delivery — planned internally as a standalone add-on, it shipped as a booking capability embedded in the platform, general enough for room bookings and weddings.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) · Berlin, Germany

- Two functions at once, nine reports — from July to October 2023 I ran Product Design and Product together. Three product managers and a data scientist, alongside a design team of five.
- Hired two, promoted two — including the consultant I brought in who then took Head of Product permanently. Senior Leadership Team throughout.

Product & UX Strategist

2021 – 2022

Hypoport hub SE (shared services arm of listed Hypoport SE) · Berlin / Lübeck, Germany · Remote

- Service-to-product transformation — partnered with the executive team to productize the service organization, so case-by-case support became a standard catalog.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) · Berlin, Germany · team across Germany and NYC

- Five years of data-dense enterprise product — pivot tables, column charts, aggregated JSON views and filter logic for top US, Canadian and UK banks and insurers.

EARLIER CAREER PROGRESSION

Design Consultant · *Ninox Software GmbH* · Summer 2025 · freelance · prompt-to-database AI onboarding

AI workshop series · *web agency, Poland* · Late 2025 – January 2026 · AI for design and prototyping, for their team

Senior Mentor · *CareerFoundry* · 2016 – 2026 · remote · a decade critiquing designers' work

UX Strategy Lead · *Spreadshirt* · 2014 – 2016 · Leipzig, Germany · international e-commerce, 200+ people

Earlier · *UX Manager, UX Designer, Web Developer* · 2009 – 2014 · Pennsylvania, USA · e-commerce and mobile checkout
