PROFILE

I lead product design where complex systems have to become clear, trustworthy and useful to real people. At Ninox, I led a five-person design and UX-writing function and Product and Design together across nine people. At Bibel TV, I lead consumer product design, connect decisions to measured use and build conversational products hands-on.

153% · 85%
higher weekly starts after an AI-feature redesign

Five · nine
design-function and dual Product-and-Design spans

Research changed strategy
consumer evidence overturned automation-first direction

EXPERIENCE

Head of Product Design
2025 – Present

Bibel TV (consumer streaming across iOS, Android, web and connected TV) *Hamburg + Berlin, Germany*

- Lead product design and product management for Bibel TV's streaming experience across iOS, Android, web and connected TV, coordinating complex product and stakeholder work from direction through delivery.
- Redesigned entry into a live AI passage feature using GA4 data and clearer product explanation; weekly starts rose 153% on iOS and 85% on Android.
- Turned the streaming redesign toward a warm, light-first direction after respondents shown dark mode called it too gloomy and uninviting and asked for brightness and readability.
- Design and agentically develop "Bibel erklärt" (working title), a Conversational AI Bible Study App in development. I own product direction, UX, UI, motion and structured onboarding.
- Prototype against real APIs with Claude Code. External engineering works from the web and Android prototypes and reuses their code in delivery.
- Designed and shipped a Microsoft Copilot support workflow that drafts in the team's handbook voice while staff review, edit and send every answer.
- Stayed close to implementation detail to make quality tradeoffs and raise standards across four platforms, using one Storybook source, DTCG tokens, automated checks and accessible light and dark color generation.

Independent AI Product Practice
2025 – Present

Selected hands-on work alongside leadership roles *Berlin, Germany · Remote*

- Designed Ninox's prompt-to-database onboarding with the CEO. The generated schema renders in the real editor beside chat for direct inspection and editing.
- Assessed a stealth speech-therapy app concept, evaluated product and technical possibilities, set UX direction and created prototypes.

Head of Platform and Design
2024 – 2025

ChurchDesk (vertical SaaS across six European markets) *Copenhagen, Denmark · Remote from Berlin*

- Led product design and product management for the core platform across six European markets.
- Reframed a funeral-booking request as a reusable platform capability in the existing calendar and form builder for funerals, room rentals, baptisms and weddings.
- Reduced coordination time by an estimated 70%; booking acceptance reached 90%.
- Ran extensive WCAG AA testing and shipped accessibility improvements for the platform and customer websites, including reliable calendar contrast and AI-assisted alt text.
- Held product and design together across six localized markets, aligning customer and engineering stakeholders while keeping delivery moving under GDPR and church data-protection law.

Head of Product Design · Interim Head of Product
2023 – 2024

Ninox Software GmbH (no-code business platform across DACH, the UK and the US) *Berlin, Germany*

- Senior Leadership Team member with five direct reports across product design and UX writing; hired two people, promoted two and coached the design lead.
- Led Product and Design together for four months across nine people in product design, UX writing, product management and data science.
- Developed the leveling framework and ran performance reviews for product design and UX writing.
- Owned the Storybook and Figma Variables design system and established joint governance with Engineering.

Director of Design

2016 – 2021

Datameer GmbH (enterprise data analytics for regulated banks and insurers) *Berlin · team across Germany and New York*

- Led two UX designers across Germany and New York and raised design's influence from downstream delivery to product strategy.
- Designed query builders, data-dense analytics and uncertainty states for analysts in regulated banks and insurers.
- Built a research method for hard-to-reach specialists using iterative screening when ordinary panels could not find the right users.

UX Strategy Lead

2014 – 2016

Spreadshirt (international print-on-demand marketplace serving hundreds of thousands of consumers) *Leipzig, Germany*

- Led a nine-month seller-experience redesign after two previous attempts had failed. The team grew from three people into larger implementation teams.
- Used in-person research to articulate a clear product point of view and align senior stakeholders. Users valued creative control, so the direction moved from full automation to controlled automation.
- Built a mobile t-shirt designer prototype that tested strongly and moved into production, then facilitated executive workshops to align Product, Engineering and business leaders around the new direction.

EARLIER CAREER PROGRESSION

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · productized shared services with executive stakeholders

Independent Product Design Consultant · *Oratio&Co* · 2016 – Present · Remote · product strategy, UX direction and prototypes

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · coaching and mentoring product designers
