EDUCATION

M.A. Leadership

Kairos University
2022 – Present

B.A. Theology (equiv.)

Theologisches Seminar Rheinland
2003 – 2007

LANGUAGES

German · native

English · C2, fluent

ONGOING

Independent Consultant

Oratio&Co
2016 – Present · Remote

Product and design strategy plus collaborative leadership coaching for non-profits, mission-driven ventures, and religious organisations.

PROFILE

AI enablement operator with 15+ years leading product design and organisational transformation. Currently shipping production Claude Skills and Claude Projects at Bibel TV — analysis, prompt engineering, a Claude Project with follow-up-question loops, and a Claude Skill producing content across three surfaces. Runs a personal 12-agent MCP-configured stack (openclaw) as daily practice. Facilitates workshops for both technical and non-technical audiences — from "Designing with and for AI" for designers and engineers, to design-thinking training for executives, HR, marketing, and service teams at Hypoport Hub SE. Berlin-based; German native, English fluent.

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (B2C faith-media platform across mobile, web, and connected TV) Hamburg (2 days/week) + Berlin (Remote), Germany

- Designed, scoped, and shipped an AI Customer-Support Copilot as an MS Copilot configured skill for the CS team — CS handbook loaded as runtime context, escalation architected as a first-class output, human keeps the send decision
- Rolled out through a self-testing week followed by 1:1 introductions with the CS team; qualitative adoption across the seniority-and-scepticism spectrum, including the initially most sceptical team member
- Built and shipped an AI fundraising ecosystem end-to-end, solo — analysed fundraising letter performance, identified seasonality and style patterns separating over- from under-performers
- Encoded the analysis and style guide into a **Claude Project** with follow-up-question loops — interactive AI workflow with human clarification before generation, not single-shot
- Built a web prototype for the generation flow; shipped a **Claude Skill** producing content across three surfaces — in-app notifications, web banners, and video scripts
- Introduced agentic engineering as a design practice — designs first as web prototypes then as Android prototypes using **Claude Code**; engineering consumes prototype code directly; actively evangelises vibe-coded prototyping across the team
- Runs the "Designing with and for AI" workshop series (2024 – Present) — AI as design partner, designing AI-first interfaces, ethics in AI design, user agency in AI systems, conversational design patterns, AI transparency
- Leads the design-system-as-API initiative — Git-based token repo, three-tier hierarchy, Web / iOS / Android / Figma sync; server-driven UI architecture, architecturally analogous to **MCP** as shared context
- Personal daily practice: 12-agent **MCP**-configured stack (openclaw), cron-scheduled, local embeddings, self-hosted; **Claude Code**, **Claude Projects**, **Claude Co-work**, **Claude Skills**, **Microsoft Copilot** in production use

Head of Platform and Design

2024 – 2025

ChurchDesk GmbH (European church-management SaaS across DE / DK / UK / SE / NO / CH) Copenhagen, Denmark · Remote from Berlin

- Mapped the phone-based funeral coordination process with parishes, funeral homes, and cemeteries; reframed scope from a single feature into a deeply integrated booking capability
- 70% reduction in coordination time** (days to hours), **90% booking acceptance rate**, served **20+ cemeteries**; became a core platform feature beyond the initial Hessen region
- Shipped AI-powered alt-text generation in production for company-wide web accessibility compliance in a GDPR+ regulated environment (Protestant + Catholic data-protection frameworks); **95% WCAG 2.1 coverage** across multi-country localisation (DE / DK / UK / SE / NO / CH)
- Delivered a suite of SME workflow-automation modules — shared inbox, booking requests, case management — to help parish operations digitise remote processes
- Dual PM + design role — direct customer collaboration as main project contact (recurring calls with project leads, pastors, funeral directors); cross-functional alignment in a regulated multi-country environment

Head of Product Design

2023 – 2024

Ninox Software GmbH (AI-powered no-code business platform, DACH / UK / US) Berlin, Germany

- Designed the AI-powered vibe-coding onboarding for Ninox's no-code business platform — natural-language prompt to generated database schema, rendered into the real Ninox data-model editor with chat panel and direct-manipulation surface side by side; the "show output, allow users to edit" user-agency principle. Shipping to Feb 2026 beta launch
- Collaborated directly with the CEO and technical co-founder in stealth on the vibe-coding direction before the initiative was handed to the product team — founder-led exploratory project run end-to-end for the founder team
- Established shared governance of the design system as a structured cross-functional working group — one design lead assigned, one engineering lead assigned, regular meeting rhythm, documented process for identifying component changes and escalating them to the group; effectively a cross-functional Guild for design-system decisions

- Senior Leadership Team member with parity to product and engineering at executive level; 5 ICs + 1 design lead reporting
- Real performance calls in both directions — hired 1 designer + 1 writer, let go 1 designer + 1 writer; coached the design lead through a difficult engineering-lead partnership (includes the earlier interim Head of Product period, 2023, folded into this tenure)

EARLIER CAREER PROGRESSION

UX Strategy Lead · <i>Spreadshirt</i> · 2014 – 2016 · Leipzig, Germany — print-on-demand platform serving ~5,000 business users plus hundreds of thousands of consumers; research-driven shift in fundamental product strategy	Product & UX Strategist · 2021 – 2022 · <i>Hypoport Hub SE (Hypoport Group shared service center; service-to-product transformation)</i> · Berlin, Germany · Remote
UX Manager · <i>HairDirect</i> · 2013 – 2014 · Lancaster, PA, USA — B2C eCommerce; first mobile revenue stream launched after generating executive buy-in for mobile investment	• Developed and delivered design-thinking training programs for executive leadership plus service teams that included HR, marketing, and other non-designer / non-engineer functions across the Hypoport Group's shared service center
User Experience Designer · <i>andCulture</i> · 2012 – 2013 · Lancaster, PA, USA — client-facing UX at a design consultancy	• Adapted content and facilitation style to each audience — technical vs. non-technical, executive vs. operational
Web Designer & Front-End Developer · <i>HOPE International</i> · 2009 – 2012 · Lancaster, PA, USA — international microfinance non-profit; responsive design and cross-cultural integration	• Produced and integrated services of the Hypoport Group's shared service center — converted individualised, case-by-case support into a standardised service catalog; partnered with the executive team to revamp service center as a single web design product organisation
Web Designer · <i>Bajaa.com</i> · 2008 – 2009 · Remote · Germany — e-commerce design	• Worked with IT on TSM design and desk implementation
Freelance Web Designer · 2003 – 2008 · Remote · Germany — SME clients	• Applied Agile methodologies and UX principles to service transformation
Web Designer · <i>Bajaa.com</i> · 2000 – 2003 · Remote — early-career web design	
E-Commerce Assistant · <i>Westfalia Werkzeugmaschinen GmbH (Collaborative big-data analytics platform for top US / CA / UK banks & insurers)</i> · Germany & NYC, USA · cross-Atlantic	

SKILLS

AI Enablement & Adoption

Claude Enterprise-primitive fluency (Claude Skills, Claude Projects, Claude Code, Claude Copilot) · MCP server configuration (openclaw personal 12-agent stack) · Prompt engineering with follow-up-question loops · Human-in-the-loop AI workflows · User-agency principles ("show output, allow users to edit") · Escalation-as-first-class-output design · AI-assisted user research synthesis

Workshop Facilitation & Enablement Practice

Workshops for both technical and non-technical audiences (design-thinking training for executives + HR + marketing + service teams at Hypoport Hub SE; "Designing with and for AI" workshop series for designers + engineers) · Curriculum design and delivery · 1:1 team onboarding to new AI tooling (CS Copilot introductions) · Long-term mentoring (CareerFoundry Senior Mentor 2016 – 2026; IxDF Mentor)

AI-Native Product Design

Production AI shipping (Bibel TV Claude Skill + Claude Project + CS Copilot; ChurchDesk AI alt-text) · Agentic engineering as design method (Claude Code prototypes consumed by engineering) · Design-system-as-API architecture (Style Dictionary, Git-based token sync, Web / iOS / Android / Figma) · Vibe-coding interaction patterns · Multi-agent orchestration (personal openclaw stack)

Process Mapping & Requirements Translation

Process mapping in regulated / sensitive contexts (ChurchDesk funeral-coordination phone-to-booking redesign) · Cross-functional requirements elicitation · Build-vs-buy analysis (ChurchDesk booking module) · UX-maturity self-assessment (Ninox) · Data-driven inefficiency identification (Bibel TV conversion and usage analytics)

Change Management & Organisational Transformation

Design-system governance as a structured cross-functional working group (Ninox) · Founder-team stealth engagement (Ninox CEO + technical co-founder) · Cross-functional AI-tool rollout (Bibel TV agentic engineering, CS Copilot, fundraising ecosystem) · Executive-audience workshop facilitation (Hypoport) · Multi-country localisation (ChurchDesk DE / DK / UK / SE / NO / CH)

Technical Foundation (Self-Taught)

HTML · CSS · TypeScript · SwiftUI · Git · Claude Code · Cursor · Zed · n8n · GitHub Actions · macOS · Figma · Style Dictionary · Tokens Studio · MS Copilot · MCP · Anthropic SDK adjacency (openclaw config)
