Tobias Treppmann

Distributed design leadership and systems for consistent global execution

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/adjoe LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I lead distributed design teams and build the systems that keep quality consistent across products, people and time zones. At Datameer, I led design across Germany and New York; at Ninox, I led five people and shared design-system governance with engineering. My current work turns visual rules into reusable multi-platform infrastructure and performance-informed content workflows.

Germany + New York

five years leading distributed design

Systems hold the quality

tokens, components, governance and reusable workflows

Commercial evidence

performance-informed fundraising and measured product outcomes

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) *Hamburg + Berlin, Germany*

- AI-supported product work across the delivery chain. I use Claude for research synthesis, build prototypes in real code against production APIs, and the external engineering agency ships from that code.
- Connected performance analysis to coordinated content. The fundraising workflow turns historical letter performance into guided in-app, web and video-script generation.
- Created reusable design infrastructure for four platforms. DTCG tokens, Style Dictionary, Storybook and CI checks keep iOS, Android, web and connected TV inside one system.
- Built and live-tested n8n workflows for the “Bibel erklärt” product in development. Timed transcripts become source-linked clips, chapters and retrievable material for an AI Bible experience.
- Feature-level data informs visual and product priorities. Bible use, AI-feature behavior, streaming and live-TV use shaped Light Mode, future chat options and the Sleep Timer.
- Product manager and product owner for the app redesign, alongside design. I write and prioritize the tickets engineering works from and review features in beta and production.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP — DE / DK / UK / SE / NO / CH) *Copenhagen, Denmark · Remote from Berlin*

- Turned one customer workflow into reusable platform infrastructure. Building booking into the calendar and form builder carried funerals, room rentals, baptisms and weddings in one capability.
- Led discovery and recurring validation with the launch customer, pastors and funeral directors before and during delivery.
- 70% less coordination time and 90% booking acceptance at the launch customer, followed by rollout across the customer base.
- Held product management for the main platform alongside all product design. Roadmap, specifications, engineering ticket board and customer relationship.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) *Berlin, Germany*

- Five direct reports, including a design lead, on the Senior Leadership Team. Owned capacity, allocation, prioritization, team structure and processes.
- Built the people-development system. A levelling framework for product design and UX writing, growth plans, performance reviews and a lean 360 format.
- Hired two people, promoted two and managed two exits.
- Held Product and Design together for four months: nine people across product design, UX writing, product management and data science.
- Made research usable at scale. Claude-assisted analysis of thousands of forum posts complemented direct reading of smaller qualitative sets.
- Returned as an independent consultant in 2025 to design AI onboarding with the founders. The interaction became the basis for the public AI beta.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) *Berlin, Germany · team across Germany and NYC*

- Led the design team across Germany and New York for five years, owning assignments, priorities, methods and quality standards while staying hands-on.
- Helped take a collaborative data platform from concept through release. Research entered executive and roadmap decisions as the company made a new product bet.
- Pioneered iterative usertesting.com screening to reach analysts inside regulated banks and insurers.
- Designed data-dense visualizations and analytical states for banking and insurance users, including pivot tables, charts, JSON views, result cards and filtering logic.

UX Strategy Lead

2014 – 2016

Spreadshirt (international seller-consumer platform — 200+ people) *Leipzig, Germany*

- Shop-owner research changed the product direction. Evidence contradicted leadership's automation assumption, shifting the strategy toward controlled automation that preserved user agency.
- A mobile product-designer prototype moved into production.

EARLIER CAREER PROGRESSION

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · a decade mentoring and coaching designers

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck, Germany · productized internal services with executive stakeholders

Mentor · *Interaction Design Foundation* · 2020 – 2022 · Remote

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, PA, USA · consumer e-commerce and mobile checkout

User Experience Designer · *andCulture* · 2012 – 2013 · Harrisburg, PA, USA

Web Designer & Front-End Developer · *HOPE International* · 2009 – 2012 · Lancaster, PA, USA

Earlier · *Web Designer, Freelance Web Designer, E-Commerce Assistant* · 1999 – 2009 · Düsseldorf and Hagen, Germany

EDUCATION

M.A. Leadership
Kairos University, South Dakota, USA
Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Distributed Team Leadership

Germany and New York across a six-hour difference · five direct reports at Ninox · schedules, priorities, critique and quality standards · coaching a design lead

Visual Systems and Production

Figma · design systems, reusable components and token architecture · cross-platform consistency · working knowledge of Illustrator, Photoshop and InDesign · Affinity for recent print work

Commercial and Data Storytelling

Performance-informed fundraising content · app-store assets and campaign support · data visualization for enterprise analytics · executive and stakeholder presentations

AI-Supported Workflows

Claude-assisted analysis and prototyping · human-operated support copilot · end-to-end content workflow · n8n automation · agentic engineering
