Tobias Treppmann

UX/UI Designer · clear, reliable interfaces · cross-platform systems · AI-native prototyping

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/stark LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I turn complex and abstract product behavior into clear, actionable interfaces and working prototypes. At Bibel TV, I design across mobile, web and connected TV while building the infrastructure that keeps those surfaces coherent. My background combines regulated analytical products, sensitive operational workflows, AI-native prototyping and calm cross-functional decision-making.

4 platform families
mobile, web and connected-TV product design

Prototype → build
working concepts against production APIs

Complex → clear
regulated analytics and sensitive workflows

EXPERIENCE

Head of Product Design
2025 – Present

Bibel TV (consumer streaming across iOS, Android, web and connected TV) *Hamburg + Berlin, Germany*

- Design hands-on across four platform families, shaping interactions, visual systems and product direction for iOS, Android, web and connected TV.
- Prototype working product concepts against production API data. I direct, inspect and iterate the work with AI coding agents; external engineering uses the prototypes as implementation input.
- Built a four-tier design-token system from a hard-coded starting point. A Git repository, Style Dictionary builds in CI and a served API keep Android, web and Figma on one source.
- Built an OKLCH color engine and Color Lab that turn program artwork into light and dark themes while checking contrast against product text colors.
- Use GA4 feature analytics to guide product decisions, including Bible usage, AI-feature use, streaming behavior and live-TV use.
- Lead product design and product management while remaining close to implementation, aligning stakeholders through Figma specifications and engineering review.

Head of Platform and Design
2024 – 2025

ChurchDesk (vertical SaaS across six European markets) *Copenhagen, Denmark · Remote from Berlin*

- Led product design and product management for web and mobile operational workflows used by non-technical teams across six European markets.
- Shipped a sensitive, multi-party funeral process as a reusable platform capability embedded in the calendar and form builder while keeping people in control.
- Reduced estimated coordination effort by 70%. The workflow reached 90% booking acceptance and was released to the full customer base.
- Connected research to delivery through interviews, support evidence, workflow logic, specifications, implementation review and launch communication.

Head of Product Design · Interim Head of Product
2023 – 2024

Ninox Software GmbH (no-code business platform across DACH, the UK and the US) *Berlin, Germany*

- Owned and grew the design system, including Storybook, Figma Variables, navigation, modals and searchable multi-select components.
- Established joint design-system governance with Engineering through a standing working group and escalation path.
- Designed prompt-to-database AI onboarding in which generated schemas appear inside the real editor so users can inspect and change them directly.
- Senior Leadership Team member with five direct reports; led Product and Design together for four months across nine people while continuing hands-on product work.

Director of Design
2016 – 2021

Datameer GmbH (enterprise data analytics for regulated banks and insurers) *Berlin · team across Germany and New York*

- Designed data-dense analytical interfaces including query builders, big-data pivot tables, aggregated JSON views, result cards, filters and sampled-data uncertainty states.
- Made complex system behavior legible: when a preview showed no matching rows but the full dataset could contain them, the interface explained the uncertainty rather than hiding it.
- Defined component behavior and implementation specifications for the product library while partnering closely with engineering.
- Established research with hard-to-reach enterprise users through executive-sponsored sessions with banking and insurance customers.

UX Strategy Lead

2014 – 2016

Spreadshirt (international fashion and print-on-demand marketplace) *Leipzig, Germany*

- Led a nine-month seller-experience redesign; research with shop owners changed an automation-first product direction.
- Prototyped and tested a mobile product designer that preserved creative control and moved into production.

CURRENT AI AND PRODUCT PRACTICE

Independent product work alongside employed roles.

Selah for macOS — Independent product

Designed and agentically engineered a shipped Mac app, authoring pull requests that were merged and released to production.

Bibel erklärt — Current Bibel TV product work

Designing a conversational Bible product and the onboarding, human-control patterns and supporting AI workflows behind it; not yet publicly released.

EARLIER CAREER PROGRESSION

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · productized internal services through facilitated transformation work

Independent Product Design Consultant · *Oratio&Co* · 2016 – Present · Remote · product strategy, UX direction and working prototypes

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · coaching and mentoring product designers

Earlier · *UX Manager, UX Designer, Web Designer & Front-End Developer* · 2009 – 2014 · Pennsylvania, USA · consumer e-commerce, product design, HTML, CSS and JavaScript

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Complex and cross-platform product design

interaction design · high-fidelity UI · mobile · web · connected TV · systems thinking · information architecture · states and edge cases · human-in-the-loop controls

AI-native prototyping

Claude Code · working prototypes against real APIs · agentically engineered React, SwiftUI and Kotlin prototypes · editable AI output · research synthesis

Design systems and implementation

Figma · Figma Variables · Storybook · design tokens · DTCG · Style Dictionary · component architecture · Git and CI · implementation review

Research and product evidence

user interviews · usability testing · product analytics · support evidence · regulated enterprise research · uncertainty and failure-state design

Collaboration and communication

expert and stakeholder alignment · facilitation · design critique · engineering partnership · native German · English C2 · Berlin-based
