PROFILE

I design AI products where language and generated structure are part of the interaction. At Bibel TV, I built a support copilot around house voice and human review; at Ninox, generated databases remain editable in the real product. I pair deep desktop-software experience with working prototypes, production PRs for my own products and Staff-level influence.

Language as product

house voice, context and human review

Generation with control

AI output editable in the real product

153% · 85%

higher weekly starts after an AI redesign

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (consumer streaming across iOS, Android, web and connected TV) Hamburg + Berlin, Germany

- Lead product design and product management for Bibel TV’s streaming experience across iOS, Android, web and connected TV, turning product ideas into testable direction and delivery specifications.
- Designed and shipped a Microsoft Copilot support workflow that drafts responses from the customer-service handbook, follows a defined house voice and response structure, and keeps every edit-and-send decision with the team.
- Built an AI fundraising-content system using source analysis, a Claude Project, web prototype and Claude skill. It asks for audience context and adapts approved writing for notifications, web banners and video scripts.
- Prototype AI interactions with Claude Code against real APIs. I direct, run, review and iterate the working software; external engineering uses the prototypes as implementation input.
- Redesigned entry into a live AI passage feature using GA4 data and clearer product explanation; weekly starts rose 153% on iOS and 85% on Android.
- Design and agentially develop “Bibel erklärt” (working title), a conversational AI Bible-study app in development. I own product direction, UX, UI, motion and its structured onboarding.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical SaaS across six European markets) Copenhagen, Denmark · Remote from Berlin

- Led product design and product management for a vertical SaaS platform used across six European markets.
- Turned a funeral-booking request into a reusable workflow capability in the existing calendar and form builder for funerals, room rentals, baptisms and weddings.
- Reduced coordination time by 70%; booking acceptance reached 90%.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform across DACH, the UK and the US) Berlin, Germany

- Led Product Design for a complex no-code platform where customers build and operate databases, ERP systems and other business applications.
- Senior Leadership Team member with five direct reports across product design and UX writing; hired two people, promoted two and coached the design lead.
- Led product and design together for four months, with three product managers and one data scientist joining the design and UX-writing team.
- Owned the Storybook and Figma Variables system with joint engineering governance.

2016 - 2021

- Led two UX designers across Germany and New York for enterprise analytics software used by analysts in regulated banks and insurers.
- Designed query builders, data-dense analytics and uncertainty states for a deep browser-based product people used throughout their working day.
- Built a research method for hard-to-reach analysts using iterative screening on [usertesting.com](#) when ordinary panels could not find the right users.

2014 - 2016

- Led a nine-month seller-experience redesign for an international fashion and print-on-demand marketplace after two previous attempts had failed.
- Research with shop owners changed an automation-first strategy. A tested mobile product-designer prototype preserved creative control and moved into production.

Independent product work alongside employed roles.

Summer 2025

Designed prompt-to-database onboarding with the CEO and technical co-founder. The generated schema appears in the real editor beside the conversation so users can inspect and change tables and fields directly.

Independent product

Designed and agentically engineered a shipped Mac app, authoring pull requests that were merged and released to production.

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · productized shared services with executive stakeholders

Independent Product Design Consultant · *Oratio&Co* · 2016 – Present · Remote · product strategy, UX direction and prototypes

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · coaching and mentoring product designers

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, Pennsylvania, USA · complex consumer e-commerce

User Experience Designer · *andCulture* · 2012 – 2013 · Harrisburg, Pennsylvania, USA

Web Designer / Front-End Developer · *HOPE International* · 2009 – 2012 · Lancaster, Pennsylvania, USA

Earlier · *Web Designer, Bajaa.com and freelance* · 2000 – 2009 · Düsseldorf, Germany

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA
Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

AI technology, agents and language-rich workflows

human-AI interaction · conversational UX · prompt and context design · house voice and tone systems · human review · reading, writing and translation workflows

Complex desktop software

configuration-heavy products · no-code platforms · data-dense analytics · direct manipulation · roles, states and dynamic logic · design systems

Design and prototyping

interaction design · visual design · Figma · Claude Design presentation work · Claude Code · prototypes against real APIs · HTML · CSS · some JavaScript · agentic engineering

Staff-level influence

zero-to-one product direction · user research · usability testing · metrics · critique · mentoring · Product and Engineering partnership · native German · English C2 · Berlin-based
