PROFILE

I'm the only in-house designer at Bibel TV: product manager, product owner and designer for a consumer app redesign, prototyping in real code against production APIs that an external engineering agency ships from. My AI feature work shipped with a measured lift of +153% and +85% weekly starts; a one-week research prototype I led at Spreadshirt reached production and shifted company strategy. SwiftUI, Kotlin/Compose, React. Berlin, London open.

+153% weekly starts

AI feature I designed full scope
· iOS · +85% Android · GA4

Prototyping in real code

Engineering ships from them — about half
the prototype code reaches production

One week to production

Scrappy research prototype that
shifted Spreadshirt's mobile strategy

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (German broadcaster in linear-to-streaming transformation — consumer app on iOS, Android, web and connected TV) Hamburg + Berlin, Germany

- The only in-house designer, holding product manager and product owner for the app redesign across iOS, Android, web and connected TV, running the ticket board engineering works from and directing the project's day-to-day work with the agency team.
- I prototype in real code against production APIs — Claude Code, web first, then native: Kotlin/Jetpack Compose on Android, Swift on iOS (SwiftUI in my own shipped iOS app). Engineering at an external agency ships from that code, reusing about half of the prototype code directly.
- The AI feature I designed full scope more than doubled weekly starts: +153% on iOS, +85% on Android (GA4, four-week averages). An unclear button became a self-explaining input.
- Comfortable with open-ended briefs: the redesign's direction was set deliberately and manually before any tooling, from interviews recorded in Teams and analyzed with Claude.
- A four-tier design-token architecture built from scratch, one source serving iOS, Android, web and connected TV, Storybook as the source of truth.
- A support copilot shipped for the viewer-services team; every send decision stays human.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) Copenhagen, Denmark · Remote from Berlin

- In-person discovery with the launch customer, pastors and funeral directors, then a booking capability embedded in the platform, not a standalone add-on: 70% less coordination time, 90% acceptance, then every customer.
- Flows, not screens: an availability calendar across multiple pastor calendars with progressive disclosure showing only viable slots, designed in Figma; engineering built it in React and React Native.
- Ran the accessibility audit myself; findings shipped — alt-text support built into the CMS plus AI alt-text generation, and the calendar color scheme redesigned for contrast.
- Product management for the main platform alongside all product design.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform, fast-growing during my tenure — DACH / UK / US) Berlin, Germany

- Prompt-to-database AI onboarding, designed with the CEO and technical co-founder as a consultant in summer 2025. The AI generates into the real data-model editor, chat beside direct manipulation.
- Shipped as Ninox's public AI beta in February 2026.
- Owned the design system and established joint governance with engineering.
- Senior Leadership Team, five reports across product design and UX writing; nine for four months as interim Head of Product.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) Berlin, Germany · team across Germany and NYC

- Research where access was the problem: in person with US banking customers, and iterative usertesting.com screening that reached hard-to-reach personas in regulated industries.
- Five years of data-dense interfaces: pivot tables, result cards, filter logic, and the sampling-uncertainty problem in query previews.
- Led the UX team across Germany and NYC, two designers reporting to me, within a four-person design org.

UX Strategy Lead

2014 – 2016

Spreadshirt (international e-commerce platform — sellers and hundreds of thousands of consumers) Leipzig, Germany

- A one-week mobile research prototype I led went to production and shifted company mobile strategy — the prototype was the argument that decided it.
- In-person interviews with shop owners overturned an executive assumption about automation, after two earlier company attempts at the seller redesign had failed.

EARLIER CAREER PROGRESSION

Independent Consultant · *Oratio&Co* · 2016 – Present · remote · AI-for-design training series for an agency's designers and developers, 2025 – 2026

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · service-to-product transformation with the executive team; ITSM with the IT department

Earlier · *UX Manager, UX Designer, Web Designer & Front-End Developer* · 2009 – 2014 · Pennsylvania, USA · responsive web, front end and e-commerce

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Prototyping, scrappy to polished

Real code against production APIs — Claude Code web first, Kotlin/Jetpack Compose on Android, Swift on iOS, SwiftUI in my own shipped iOS app · engineering ships from the prototypes, about half the code reused · one-week Axure research prototype that reached production · four-tier design-token architecture, one source across four platforms

AI interaction, and AI as method

AI output lands where the user already works, shipped twice, Ninox public AI beta and the KI Bibelaufschlag feature (+153% / +85% weekly starts, GA4) · Claude Code, Claude, Zed · interviews transcribed in Teams and analyzed with Claude

Interaction design and flows

Availability and booking flows across multiple calendars with progressive disclosure · data-dense interfaces (pivot tables, result cards, filter logic) · flows designed in Figma, handed to engineering as working specifications

Direction and mentoring

A decade mentoring designers, CareerFoundry and IxDF · own levelling framework, two promotions against it · five reports at Ninox, nine as interim Head of Product · Director of Design with a team across Germany and NYC

Accessibility, hands-on

Ran the ChurchDesk accessibility audit · alt-text field and AI alt-text generation built into the CMS · calendar color scheme redesigned for accessible contrast · European Accessibility Act deadline met for customers automatically

Languages

German native · English C2 · six years working in the US
