EDUCATION

M.A. Leadership

Kairos University

2022 – Present

B.A. Theology (equiv.)

Theologisches Seminar Rheinland

2003 – 2007

LANGUAGES

German · native

English · C2, fluent

WORK RIGHTS

EU citizen · Berlin resident · no relocation needed

ONGOING

Independent Consultant

Oratio&Co

2016 – Present · Remote

Collaborative leadership coaching; design-thinking and product-strategy consulting for non-profits, religious organisations, and mission-driven ventures.

PROFILE

Head of Product Design at Bibel TV, with 15+ years across four Head- and Director-level tenures at product-first companies. I ship the design-engineering bridge myself: a design system with automated Web/iOS/Android/Figma sync, and AI features live in production. Berlin-based, German native, comfortable moving without a map.

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (B2C faith-media platform across mobile, web, and connected TV) · Hamburg (2 days/week) + Berlin (Remote), Germany

- Leading design across mobile, web, and connected TV for the B2C faith-media platform
- Redesigning the mobile app for reach and engagement against global entrants (Pray.com, Hallow)
- Shipped a Style Dictionary + Git design system with automated sync across Figma, Web, iOS, and Android
- Three-tier token hierarchy (global primitives → semantic → component) closes the design-engineering token-drift gap
- Shipped a production color engine (OKLCH + WCAG) that beat generic-library defaults — the thresholds, tokens, and contrast rules stayed with design
- Introduced AI-generated prototyping as a design method — web and Android prototypes generated with Claude Code, consumed directly by engineering
- Shipped a CS Copilot agent in production, drafting responses from the handbook with escalation as a first-class output
- Built the AI fundraising ecosystem end-to-end and solo: letter analysis, Claude Project, web prototype, in-app notifications, and video scripts
- Running a "Designing with and for AI" workshop series with the team to build shared practice

Head of Platform and Design

2024 – 2025

ChurchDesk GmbH (European church-management SaaS across DE / DK / UK / SE / NO / CH) · Berlin (Remote) + Copenhagen, Denmark

- Dual PM + Design role across a SaaS platform in 6 EU countries with GDPR and Protestant/Catholic data-protection rules
- Reframed a "funeral-booking feature" into a booking capability deeply integrated into the platform, against pressure toward a cheaper standalone module
- Shipped to 20+ cemeteries in 2 months on a €20k budget, adopted as core platform feature
- 70% coordination-time reduction (days to hours), 90% booking-acceptance rate
- Shipped AI alt-text generation with 95% WCAG 2.1 coverage in production for EU accessibility compliance
- Managed 1 direct report plus engineering partners, coaching on stakeholder management

Head of Product Design

2023 – 2024

Ninox (AI-powered no-code business platform, DACH / UK / US markets) · Berlin, Germany

- Senior Leadership Team member — established design as a co-equal function alongside product and engineering
- Managed 5 direct reports plus 1 design lead — effective ~8–10-person orbit including engineering partners on shared design-system work
- Hired 1 designer and 1 writer, and let 1 designer and 1 writer go — real performance calls in both directions
- Recruiting philosophy: design craft, initiative, and technical/business acumen
- Coached the design lead through a difficult partnership with the engineering lead
- Personally redesigned the team's collaboration system (pre-meeting prep, written agendas, structured turn-taking) to bring a sidelined neurodivergent engineer back into the work
- Designed the AI onboarding for the no-code platform: prompt-to-database with split-screen direct manipulation
- "Show the output, let users edit" as the user-agency principle. Shipped to beta launch

Product & UX Strategist

2021 – 2022

Hypoport Hub SE (Hypoport Group shared service centre; service-to-product transformation) · Berlin, Germany · Remote

- Productised the shared service centre for the Hypoport Group — converted case-by-case support into a standardised service catalog
- Worked with IT on ITSM and service-desk implementation
- Applied UX, Agile, and product methodologies to service transformation (not software design)
- Designed and delivered design-thinking training for executive leadership and service teams

Director of Design

2016 – 2021
