Tobias Treppmann

Lead UX/UI Designer · design systems, technical products and data visualization

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/here LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I build design systems as working product infrastructure and use them to make complex products simpler. At Bibel TV, I built a four-tier token API with Git/CI, Style Dictionary and Figma sync; at Datameer, I designed data-dense analytics for regulated users. I pair hands-on system craft with leadership that helps standards hold across design, product and engineering.

Git → API
design decisions reach implementation

Data-rich UX
queries, charts, pivots and uncertainty

System owner
architecture, components and governance

EXPERIENCE

Head of Product Design
2025 – Present

Bibel TV (consumer streaming across iOS, Android, web and connected TV) *Hamburg + Berlin, Germany*

- Built a four-tier design-token system from a hard-coded starting point. A Git repository, Style Dictionary builds in CI and a served API keep Android, web and Figma on one source.
- Designed the architecture as a control surface for product teams. Primitive, semantic, component and view tiers let the company change system decisions without redefining the foundation.
- Made Figma a consumer rather than the source. A plugin syncs tokens from the API; Storybook reads the same live values used by the Android product.
- Built an OKLCH color engine and Color Lab that turn program artwork into light and dark themes while checking contrast against the product's text colors.
- Prototype in working code against production APIs. External engineering uses the prototypes as implementation input. Code comparison shows 95–100% of the beta Android redesign's design-system and token code came verbatim from the prototype.
- Lead product design and product management across platforms, combining research, product analytics, interaction and visual design, delivery specifications and implementation review.

Head of Platform and Design
2024 – 2025

ChurchDesk (vertical SaaS across six European markets) *Copenhagen, Denmark · Remote from Berlin*

- Led product design and product management for a vertical SaaS platform spanning web and mobile workflows across six European markets.
- Specified component behavior for implementation with token-based naming, annotated flows and redlined measurements alongside Figma.
- Designed products tested extensively against WCAG AA, including ChurchDesk's product and the website builder used by customers.

Head of Product Design · Interim Head of Product
2023 – 2024

Ninox Software GmbH (no-code business platform across DACH, the UK and the US) *Berlin, Germany*

- Owned and grew the design system, including Storybook, Figma Variables, navigation, modals and searchable multi-select components.
- Established joint design-system governance with Engineering through a standing working group and an escalation path.
- Defined motion at system level with shared easing curves rather than screen-by-screen animation decisions.
- Senior Leadership Team member with five direct reports; hired two people, promoted two and coached the design lead. Led Product and Design together for four months across nine people.

Director of Design
2016 – 2021

Datameer GmbH (enterprise data analytics for regulated banks and insurers) *Berlin · team across Germany and New York*

- Led the design team across Germany and New York for enterprise analytics software used by analysts in regulated banks and insurers.
- Designed data-dense product surfaces including column charts, big-data pivot tables, aggregated JSON views, result cards and filter logic.
- Solved sampled-data uncertainty in the query builder: a preview could show no matching rows while the full dataset contained them, so the interface had to explain what users were actually seeing.
- Defined component behavior and specifications for the design-system library, including table headers and inspector panels.
- Built a research method for hard-to-reach analysts through executive-sponsored customer visits and iterative screening on usertesting.com.

UX Strategy Lead

2014 – 2016

Spreadshirt (international fashion and print-on-demand marketplace) *Leipzig, Germany*

- Led a nine-month seller-experience redesign and used research with shop owners to change an automation-first product direction.
- Prototyped and tested a mobile product designer that preserved creative control and moved into production.

CURRENT AI AND PRODUCT PRACTICE

Independent product work alongside employed roles.

Selah for macOS — Independent product

Designed and agentically engineered a shipped Mac app, authoring pull requests that were merged and released to production.

Ninox AI onboarding — Summer 2025

Designed prompt-to-database onboarding in which the generated schema appears in the real editor so users can inspect and change it directly.

EARLIER CAREER PROGRESSION

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · productized shared services with executive stakeholders

Independent Product Design Consultant · *Oratio&Co* · 2016 – Present · Remote · product strategy, UX direction and working prototypes

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · coaching and mentoring product designers

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, Pennsylvania, USA · complex consumer e-commerce

User Experience Designer · *andCulture* · 2012 – 2013 · Harrisburg, Pennsylvania, USA

Web Designer / Front-End Developer · *HOPE International* · 2009 – 2012 · Lancaster, Pennsylvania, USA

Earlier · *Web Designer, Bajaa.com and freelance* · 2000 – 2009 · Düsseldorf, Germany

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Design systems and implementation

design tokens · DTCG · Style Dictionary · Storybook · Figma and Figma Variables · component architecture · documentation · Git and CI · token APIs · HTML and CSS

Product and interface design

interaction design · visual design · responsive web and mobile · prototyping from sketches through high fidelity · data visualization · data-dense interfaces · motion systems

Accessibility and quality

WCAG AA testing · programmatic contrast checks · screen-reader semantics and ARIA · design-system quality assurance · implementation review

Research and validation

discovery · user interviews · usability testing · product analytics · survey validation · data-informed design decisions

Leadership and collaboration

design-system governance · Product and Engineering partnership · stakeholder management · facilitation · mentoring · native German · English C2 · Berlin-based
