Tobias Treppmann

UX Design & Research leadership for people, practice and AI workflows

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/hse LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I develop digital design teams and the systems that help Product and Tech make better decisions. At Ninox, I led five people and built the mechanisms behind their growth. At Bibel TV, I now select and introduce AI tools across research synthesis, real-code prototyping, reusable design infrastructure and engineering handoff.

Five direct reports

levelling, growth plans, reviews, hiring and promotions

AI in delivery

research synthesis, code prototypes, systems and handoff

Research changed strategy

shop-owner evidence reversed an automation assumption

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) *Hamburg + Berlin, Germany*

- AI-supported product work across the delivery chain. I use Claude for research synthesis, build prototypes in real code against production APIs, and the external engineering agency ships from that code.
- Shipped AI into real operating workflows. A human-operated support copilot drafts in the team's handbook language; an end-to-end fundraising workflow connects analysis, guided generation and multi-surface content.
- Created reusable design infrastructure for four platforms. DTCG tokens, Style Dictionary, Storybook and CI checks keep iOS, Android, web and connected TV inside one system.
- Built and live-tested n8n workflows for the "Bibel erklärt" product in development. Timed transcripts become source-linked clips, chapters and retrievable material for an AI Bible experience.
- Feature-level usage informs product priorities. Bible use, AI-feature behavior, streaming and live-TV use have shaped Light Mode, future chat options and the Sleep Timer.
- Product manager and product owner for the app redesign, alongside design. I write and prioritize the tickets engineering works from and review features in beta and production.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP — DE / DK / UK / SE / NO / CH) *Copenhagen, Denmark · Remote from Berlin*

- Turned one customer workflow into reusable platform infrastructure. Building booking into the calendar and form builder carried funerals, room rentals, baptisms and weddings in one capability.
- Led targeted research to validate requirements, hypotheses and solutions with the launch customer, pastors and funeral directors before and during delivery.
- 70% less coordination time and 90% booking acceptance at the launch customer, followed by rollout across the customer base.
- Held product management for the main platform alongside all product design. Roadmap, specifications, engineering ticket board and customer relationship.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) *Berlin, Germany*

- Five direct reports, including a design lead, on the Senior Leadership Team. Owned capacity, allocation, prioritization, team structure and processes.
- Built the people-development system. A levelling framework for product design and UX writing, growth plans, performance reviews and a lean 360 format.
- Hired two people, promoted two and managed two exits.
- Held Product and Design together for four months: nine people across product design, UX writing, product management and data science.
- Made research usable at scale. Claude-assisted analysis of thousands of forum posts complemented direct reading of smaller qualitative sets.
- Returned as an independent consultant in 2025 to design AI onboarding with the founders. The interaction became the basis for the public AI beta.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) *Berlin, Germany · team across Germany and NYC*

- Led the design team across Germany and New York for five years, owning assignments, priorities, methods and quality standards while staying hands-on.
- Helped take a collaborative data platform from concept through release. Research entered executive and roadmap decisions as the company made a new product bet.
- Reached regulated-bank analysts through iterative UserTesting.com screening.

UX Strategy Lead

2014 – 2016

Spreadshirt (international seller-consumer platform — 200+ people) *Leipzig, Germany*

- Shop-owner research changed the product direction. Evidence contradicted leadership's automation assumption, shifting the strategy toward controlled automation that preserved user agency.
- A mobile product-designer prototype moved into production.

EARLIER CAREER PROGRESSION

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · a decade mentoring and coaching designers

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck, Germany · productized internal services with executive stakeholders

Mentor · *Interaction Design Foundation* · 2020 – 2022 · Remote

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, PA, USA · consumer e-commerce and mobile checkout

User Experience Designer · *andCulture* · 2012 – 2013 · Harrisburg, PA, USA

Web Designer & Front-End Developer · *HOPE International* · 2009 – 2012 · Lancaster, PA, USA

Earlier · *Web Designer, Freelance Web Designer, E-Commerce Assistant* · 1999 – 2009 · Düsseldorf and Hagen, Germany

EDUCATION

M.A. Leadership
Kairos University, South Dakota, USA
Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

People and Practice Leadership

Five direct reports including a design lead · levelling for product design and UX writing · growth plans, performance reviews and lean 360 feedback · hiring, promotions and exits · capacity, allocation, priorities, structure and processes

User Research and Product Decisions

In-person interviews, remote testing and recurring customer validation · research-led strategy change at Spreadshirt · hard-to-reach regulated users at Datameer · feature-level usage across Bible, AI, streaming and live TV

AI-Supported Design and Research

Claude-assisted research synthesis · agentic prototypes against production APIs · human-operated support copilot · end-to-end AI fundraising workflow · n8n transcription and clip pipeline · development handoff from prototype code

Interaction and Systems Craft

Complex interaction design and information architecture · Figma · reusable multi-platform design systems · DTCG, Style Dictionary and Storybook · accessibility and visual-quality checks
