Tobias Treppmann

Design-function leadership with hands-on AI and product execution

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/over99 LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I lead design functions, define priorities and take ownership of what ships. At Ninox, I led five people and built the team operating system. At Datameer, I set quality standards and made decisive design judgments across Germany and New York. My current work combines cross-platform UI, AI workflows, design infrastructure and real-code prototypes.

Five direct reports

hiring, development, priorities and quality standards

Function + craft

design leadership with current hands-on execution

AI + systems

shipped workflows, APIs, prototypes and automation

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) *Hamburg + Berlin, Germany*

- AI-supported product work across the delivery chain. I use Claude for research synthesis, build prototypes in real code against production APIs, and the external engineering agency ships from that code.
- Shipped AI into real operating workflows. A human-operated support copilot drafts in the team's handbook language; an end-to-end fundraising workflow connects analysis, guided generation and multi-surface content.
- Identified delivery gaps and drove reusable solutions across four platforms. DTCG tokens, Style Dictionary, Storybook and CI checks balance consistency with fast experimentation across iOS, Android, web and connected TV.
- Built and live-tested n8n workflows for the "Bibel erklärt" product in development. Timed transcripts become source-linked clips, chapters and retrievable material for an AI Bible experience.
- Motion is part of the product system. Current app and "Bibel erklärt" work includes transitions and animation; recent production uses Final Cut and Claude-assisted HyperFrames.
- Product manager and product owner for the app redesign, alongside design. I write and prioritize the tickets engineering works from and review features in beta and production.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP — DE / DK / UK / SE / NO / CH) *Copenhagen, Denmark · Remote from Berlin*

- Turned one customer workflow into reusable platform infrastructure. Building booking into the calendar and form builder carried funerals, room rentals, baptisms and weddings in one capability.
- Led discovery and recurring validation with the launch customer, pastors and funeral directors before and during delivery.
- 70% less coordination time and 90% booking acceptance at the launch customer, followed by rollout across the customer base.
- Held product management for the main platform alongside all product design. Roadmap, specifications, engineering ticket board and customer relationship.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) *Berlin, Germany*

- Five direct reports, including a design lead, on the Senior Leadership Team. Owned capacity, allocation, prioritization, team structure and processes.
- Built the people-development system. A levelling framework for product design and UX writing, growth plans, performance reviews and a lean 360 format.
- Hired two people, promoted two and managed two exits.
- Held Product and Design together for four months: nine people across product design, UX writing, product management and data science.
- Made research usable at scale. Claude-assisted analysis of thousands of forum posts complemented direct reading of smaller qualitative sets.
- Returned as an independent consultant in 2025 to design AI onboarding with the founders. The interaction became the basis for the public AI beta.

Product & UX Strategist

2021 – 2022

Hypoport hub SE (shared services arm of listed Hypoport SE) *Berlin / Lübeck, Germany · Remote*

- Partnered with executive leadership to productize internal services. Case-by-case support became a standardized catalog of repeatable offerings.
- Facilitated design-thinking training and transformation workshops with executives, department heads and service teams.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) *Berlin, Germany · team across Germany and NYC*

- Led the design team across Germany and New York for five years, owning assignments, priorities, methods and quality standards while staying hands-on.
- Helped take a collaborative data platform from concept through release. Research entered executive and roadmap decisions as the company made a new product bet.
- Reached regulated-bank analysts through iterative UserTesting.com screening.

UX Strategy Lead

2014 – 2016

Spreadshirt (international seller-consumer platform — 200+ people) *Leipzig, Germany*

- Shop-owner research changed the product direction. Evidence contradicted leadership's automation assumption, shifting the strategy toward controlled automation that preserved user agency.
- A mobile product-designer prototype moved into production.

EARLIER CAREER PROGRESSION

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · a decade mentoring and coaching designers

Mentor · *Interaction Design Foundation* · 2020 – 2022 · Remote

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, PA, USA · consumer e-commerce and mobile checkout

User Experience Designer · *andCulture* · 2012 – 2013 · Harrisburg, PA, USA

Web Designer & Front-End Developer · *HOPE International* · 2009 – 2012 · Lancaster, PA, USA

Earlier · *Web Designer, Freelance Web Designer, E-Commerce Assistant* · 1999 – 2009 · Düsseldorf and Hagen, Germany

EDUCATION

M.A. Leadership
Kairos University, South Dakota, USA
Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Design Function Leadership

Five direct reports including a design lead · distributed team across Germany and New York · priorities, quality standards, hiring, promotions and exits · feedback and review processes

Hands-On Product and Systems

UI/UX across iOS, Android, web and connected TV · Figma · DTCG, Style Dictionary and Storybook · real-code prototypes against production APIs · Final Cut and HyperFrames

AI Products and Workflows

Human-operated support copilot · end-to-end fundraising workflow · n8n transcription and virtual-clip pipeline · prompt-to-database AI onboarding · agentic engineering

Brand and Cross-Channel Consistency

Image-derived color system · reusable token architecture · app-store assets and campaign support · product, content and donation collaboration
