PROFILE

I'm the only in-house designer at Bibel TV, and the AI tools I built are live: a support copilot, an AI fundraising ecosystem, a color-extraction API, a token API. I prototype in real code — engineering ships from about half of it — and my design systems are built for agentic use. German native, based in Berlin.

4 live AI systems

shipped at Bibel TV — copilot, fundraising ecosystem, two APIs

Half my code ships

engineering reuses my prototypes, built in real code against production APIs

70% less coordination time

ChurchDesk booking capability · 90% acceptance · shipped to every customer

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (German broadcaster in linear-to-streaming transformation — consumer app on iOS, Android, web and connected TV) Hamburg + Berlin, Germany

- Four AI systems I built are live: a support copilot for the viewer-services team (configured agent, guardrails, every send decision human) and an AI fundraising ecosystem built solo.
- Two APIs shipped beside them: a color-extraction API with its own config tool and a design-token API.
- I prototype in real code against production APIs — Claude Code, web first, then native — and engineering ships about half of it. Side projects evaluated with a 9-criterion LLM judge panel.
- A four-tier design-token architecture built from scratch: one CI-enforced source across iOS, Android, web and connected TV, Storybook as truth — designed so agentic tools can build against it safely.
- AI across the whole process: ChatGPT, Gemini and Claude as daily drivers for research, analysis and prototyping; Claude skills codify internal processes; an MCP prototyping server in active development.
- Research to decision: when respondents saw the new design in dark mode, they called it too gloomy and uninviting. Brightness and readability became the redesign need.
- Product manager and product owner for the app redesign alongside the design: steering the project day-to-day with the external agency team.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) Copenhagen, Denmark · Remote from Berlin

- Discovery in person with the launch customer, then a booking capability embedded in the platform: 70% less coordination time, 90% acceptance, then shipped to every customer.
- Flows, not screens: an availability calendar across multiple pastor calendars with progressive disclosure showing only viable slots — interaction design and IA in Figma, built by engineering.
- Product management for the main platform alongside all product design.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) Berlin, Germany

- Prompt-to-database AI onboarding, designed with the CEO and technical co-founder: the AI generates into the real data-model editor, chat beside direct manipulation — shipped as the public AI beta in February 2026.
- Owned the design system and established joint governance with engineering.
- Senior Leadership Team; five reports across product design and UX writing, nine as interim Head of Product.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) Berlin, Germany · team across Germany and NYC

- Research where access was the problem: in person with US banking customers, iterative useresting.com screening for hard-to-reach personas in regulated industries.
- Five years of data-dense interfaces: pivot tables, result cards, filter logic, inspector panels — information architecture for expert users.
- Led the UX team across Germany and NYC, two designers reporting to me, within a four-person design org.

UX Strategy Lead

2014 – 2016

Spreadshirt (international e-commerce platform — sellers and hundreds of thousands of consumers) Leipzig, Germany

- A one-week mobile research prototype I led went to production and shifted company strategy.
- In-person interviews with shop owners overturned an executive assumption about automation after two earlier attempts at the seller redesign had failed.

EARLIER CAREER PROGRESSION

Independent Consultant · *Oratio&Co* · 2016 – Present · remote · AI-for-design workshop series for an agency's designers and developers, 2025 – 2026

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · service-to-product transformation; design-thinking training for executives and service teams

Earlier · *UX Manager, UX Designer, Web Designer & Front-End Developer* · 2009 – 2014 · Pennsylvania, USA · responsive web, front end, e-commerce

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

SKILLS

AI across the whole UX/UI process

ChatGPT, Gemini and Claude as daily drivers — research synthesis, data analysis, summaries, prototyping · Claude Code as the agentic build tier · AI-assisted coding — engineering ships from about half my prototype code · Claude skills authored to codify internal processes · LLM evaluation via a 9-criterion judge panel in side projects

AI tools shipped in production

Support copilot for the customer-service team (configured agent, guardrails, human send) · AI fundraising ecosystem built solo, analysis to shipped Claude skill · color-extraction API with its own config tool · design-token API · MCP prototyping server in active development

Design systems and UI implementation

Four-tier token architecture built from scratch, one source across four platforms, CI-enforced, Storybook · design-system ownership and joint governance at Ninox, co-build at Datameer · hand-coded HTML, CSS, JavaScript · high Figma proficiency, especially auto layout and Dev Mode

Research and conversion

Qualitative and quantitative — in-person interviews, usability tests and survey programs · research converted into decisions — dark-mode feedback made brightness and readability the redesign need · conversion and usage analysis with Google Analytics, Looker Studio, HubSpot · booking capability at 70% less coordination time, 90% acceptance

Interaction design and IA

Data-dense enterprise interfaces — pivot tables, filter logic, inspector panels · booking flows across multiple calendars with progressive disclosure · wireframing and prototyping in Figma, handed to engineering as working specifications

Workshops and communication

Design-thinking training for executives and service teams · AI-for-design workshop series for an agency’s designers and developers · a decade mentoring designers, CareerFoundry and IxDF

Languages

German native · English C2 · six years working in the US
