

Tobias Treppmann

Target role: Product Designer · consumer mobile app and internal tools, owned end to end

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/aio LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I start from the business problem and user need and own the work end to end: PM, PO and designer in one seat for a consumer app redesign. The AI feature whose entry point I redesigned more than doubled weekly starts on iOS. I prototype in real code, engineering ships from it, and I adapt process to risk and reversibility.

+ 153% weekly starts

HairDirect mobile checkout — consumer e-commerce, strategy to revenue

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (German broadcaster in linear-to-streaming transformation — consumer app on iOS, Android, web and connected TV) Hamburg + Berlin, Germany

- Product manager, product owner and designer in one seat for the app redesign — the purpose of the contract, run independently across iOS, Android, web and connected TV.
- The AI feature whose entry point I redesigned more than doubled weekly starts: +153% on iOS, +85% on Android (GA4, four-week averages). An unclear button became a self-explaining input.
- A support copilot shipped for the viewer-services team. Drafts follow the handbook's wording, a restricted-topic list holds, and every send decision stays human. Multi-topic letters take minutes, not hours.
- An AI fundraising ecosystem built solo: letter analysis, a Claude Project with follow-up-question loops, a skill carrying one message into in-app, web and video.
- I prototype in real code against production APIs — web first, then Android, because Android is the largest part of the userbase. Engineering at an external agency ships from that code.
- Design system as an API: a four-tier token architecture built to serve iOS, Android, web and connected TV from one source, with Storybook as the source of truth.
- GA4 and Looker Studio, hands-on. Every feature ships as a test.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) Copenhagen, Denmark · Remote from Berlin

- Product management for the main platform and all product design. I designed the web and mobile surfaces of the booking system, and engineering built them in React and React Native.
- Discovery calls with the launch customer's project lead, pastors and funeral directors to understand the booking workflow and its constraints before designing it.
- A booking capability embedded in the platform, not a standalone add-on. Two months, a €20k client budget, 70% less coordination time and 90% acceptance at the launch customer, then every customer.
- Strong business rules across six countries. GDPR plus Protestant and Catholic church data-protection law shaped the product; customers met the European Accessibility Act deadline automatically on the sites they host.

Head of Product Design · Interim Head of Product

2023 – 2024

Innox Software GmbH (no-code business platform — DACH / UK / US) Berlin, Germany

- Five direct reports across product design and UX writing, on the Senior Leadership Team. I wrote the levelling framework for both disciplines, promoted two and hired two.
- Nine reports for four months as interim Head of Product.
- Owned the design system and established joint governance with engineering.
- As a consultant in summer 2025, I designed the prompt-to-database AI onboarding with the CEO and technical co-founder — chat beside direct manipulation, so people edit what the model built.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) Berlin, Germany · team across Germany and NYC

- Five years leading the UX team for a platform serving regulated banks and insurers — two UX designers reporting to me, working in overlap across the Germany-NYC six-hour time difference.
- Defined component behavior and specifications across the design system.
- Data-dense interfaces: pivot tables, result cards, filter logic.

UX Strategy Lead

2014 – 2016

Spreadshirt (international e-commerce platform — sellers and hundreds of thousands of consumers) Leipzig, Germany

- Project lead of the nine-month seller-experience redesign, shipped after two earlier company attempts had failed, inside a product triad with a PM and an engineer.
- Interviews with shop owners overturned an executive assumption about automation. The mobile designer prototype I led went to production.

UX Manager

2013 – 2014

HairDirect (e-commerce for products with complex customization) Lancaster, Pennsylvania, USA

- The mobile checkout behind the company's first mobile orders.

EARLIER CAREER PROGRESSION

Independent Consultant · *Oratio&Co* · 2016 – Present · remote · AI-for-design training series (workshops) for an agency's designers and developers, 2025 – 2026

Senior Mentor · *CareerFoundry* · 2016 – 2026 · remote · a decade mentoring and coaching designers

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · service-to-product transformation with the executive team of a listed group

Earlier · *UX Designer, Web Designer & Front-End Developer* · 2009 – 2013 · Pennsylvania, USA · responsive web, front end and e-commerce

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Consumer mobile, shipped and measured

The KI Bibelaufschlag AI feature in production on iOS and Android, +153% weekly starts after I redesigned its entry point · a consumer app across four platforms · the mobile checkout that produced HairDirect's first mobile orders · a mobile prototype led to production at Spreadshirt · GA4 before/after measurement

Internal AI products

A support copilot shipped for the viewer-services team, every send decision human · an end-to-end AI fundraising ecosystem built solo · Claude Code, Claude Projects and Claude skills · prompt engineering grounded in source-material analysis

Design under real constraints

GDPR plus church data-protection law across six countries · a European Accessibility Act deadline met for customers automatically · a booking capability delivered in two months on a €20k client budget · data-dense interfaces for regulated banks and insurers

Design that survives engineering

Prototyping in real code against production APIs, which engineering ships from · a four-tier token architecture built to serve iOS, Android, web and connected TV from one source · Storybook as the source of truth · Figma Dev Mode, component specifications with interaction behavior

Discovery, research and problem solving

First-principles thinking on scope, an embedded capability over a standalone add-on · User interviews that changed an executive decision · validation calls with a launch customer's project lead, pastors and funeral directors · iterative screening with users inside regulated industries · Claude over thousands of forum posts · Google Analytics, GA4 and Looker Studio

Mentoring and leadership

A decade mentoring and coaching designers in CareerFoundry's training programs · an AI-for-design training series for an agency · a levelling framework for design and UX writing · five reports led on the Senior Leadership Team · German native, English C2
