Tobias Treppmann

(Senior) Product Designer · Systems, AI and data-heavy B2B SaaS

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/packmatic LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I turn complex, domain-specific workflows into usable tools and repeatable product capabilities. My work combines data-heavy B2B interaction design, reusable UX patterns, design systems and AI-first prototyping. I stay hands-on from research and problem framing through working prototypes, implementation review and product improvement.

Data-heavy systems

tables, filters, query builders and system states

Reusable workflows

domain rules turned into platform capabilities

AI-first prototypes

working interfaces built against real APIs

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (consumer streaming across iOS, Android, web and connected TV) *Hamburg + Berlin, Germany*

- Lead product design and product management across Bibel TV's streaming products: research viewer behavior, shape product direction, design cross-platform interactions and review implementation.
- Prototype new product concepts in working code against production APIs. I direct, review and iterate the work with AI coding agents; external engineering uses the web and Android prototypes as implementation input.
- Built a four-tier design-token system from a hard-coded starting point. A Git repository, Style Dictionary builds in CI and a served API keep Android, web and Figma on one source.
- Use feature-level analytics to guide Bibel TV product decisions.
- Designed and shipped a human-operated MS Copilot workflow for viewer support; staff review, edit and send every AI-drafted response.
- Built an AI-assisted fundraising workflow end to end: performance analysis, follow-up-question loops, a working web prototype and a production skill for coordinated in-app, web and video content.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical SaaS for churches and dioceses across six European markets) *Copenhagen, Denmark · Remote from Berlin*

- Owned product management for the main platform and led all product design, spanning operational web and mobile workflows for non-technical professionals.
- Turned a multi-party funeral-booking process into a reusable platform capability. It integrated with the existing calendar and form builder. Coordination time fell by an estimated 70%, booking acceptance reached 90%, and the capability shipped to the full customer base.
- Used Claude to synthesize ChurchDesk customer feedback.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform for SME workflows) *Berlin, Germany*

- Owned and evolved the design system, including Storybook, Figma Variables, navigation, modals and searchable multi-select components; established joint governance with Engineering.
- Designed prompt-to-database AI onboarding. The generated schema appears in the real data-model editor beside chat, so users can inspect, change and own what the model made.
- Analyzed thousands of community posts with Claude to identify recurring pain points and feature needs at a scale the team could not review manually.
- Senior Leadership Team member with five direct reports; led Product and Design together for four months across nine people.

Product & UX Strategist

2021 – 2022

Hypoport hub SE (shared services for the Hypoport Group) *Berlin / Lübeck, Germany*

- Helped department heads move bespoke, case-by-case support toward productized standard services through recurring workshops, reviews and training.
- Worked with the IT department on ITSM and service-desk implementation, applying product, UX and agile methods to an internal service organization.

Director of Design

2016 – 2021

Datameer GmbH (enterprise data analytics for regulated banks and insurers) *Berlin · team across Germany and New York*

- Led UX across Germany and New York, with two UX designers reporting to me. Brought design and user research into roadmap decisions during a new-product pivot.
- Designed data-dense analytical interfaces including query builders, big-data pivot tables, aggregated JSON views, result cards, filter logic and sample-based uncertainty states.
- Defined design-system behavior and specifications for the new analytics platform: UX owned component behavior, UI created the visual system, and Engineering implemented it.

UX Strategy Lead

2014 – 2016

Spreadshirt (international print-on-demand marketplace) *Leipzig, Germany*

- Led a nine-month seller-experience redesign for a platform connecting business sellers with a large consumer marketplace; research with shop owners changed an automation-first product direction.
- Prototyped and tested a mobile product designer that preserved creative control and moved into production.

CURRENT AI AND PRODUCT PRACTICE

Independent product work alongside employed roles.

Ninox AI onboarding — Summer 2025

Designed the founder-led prompt-to-database concept end to end; split-screen direct manipulation became the primary onboarding pattern and the basis for the public AI beta.

Selah for macOS — Independent product

Designed and agentically engineered a shipped Mac app, authoring pull requests that were merged and released to production.

EARLIER CAREER PROGRESSION

Independent Product Design Consultant · *Oratio&Co* · 2016 – Present · Remote · product strategy, UX direction and working prototypes

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · coaching and mentoring product designers

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, Pennsylvania, USA · complex consumer e-commerce

User Experience Designer · *andCulture* · 2012 – 2013 · Harrisburg, Pennsylvania, USA

Web Designer / Front-End Developer · *HOPE International* · 2009 – 2012 · Lancaster, Pennsylvania, USA

Earlier · *Web Designer, Bajaa.com and freelance* · 2000 – 2009 · Düsseldorf, Germany

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Systems and interaction design

complex workflows · information architecture · tables and filters · system states · direct manipulation · end-to-end product design · Figma · usability testing

Design systems and delivery

reusable UX patterns · interaction principles · design tokens · DTCG · Style Dictionary · Storybook · Figma Variables · component behavior · engineering governance

AI-first prototyping

Claude Code · working prototypes against real APIs · AI-assisted research synthesis · human-in-the-loop workflows · agentically engineered React, SwiftUI and Kotlin prototypes

Technical fluency

HTML and CSS · JavaScript · component-based frontend concepts · Git and CI · implementation review · product analytics · Google Analytics · Looker Studio · HubSpot

Collaboration and leadership

Product and Engineering partnership · user interviews · workshops · Customer Success signals · domain-expert collaboration · mentoring · German native · English C2
