Tobias Treppmann

Target role: Senior UX Designer · design systems and design tokens · design to code · accessibility

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/bwi LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I design products where design and implementation stay consistent. At Bibel TV I built a token architecture served as an API that Storybook and the apps on Android, iOS and TV draw their tokens from. I've mentored more than 100 designers one-on-one, led a design team at Ninox, and test what I ship against WCAG AA.

Prototype to code	95–100% of Android design-system code (release 6.0, beta) from my prototype
4-tier token API	one source for Storybook, Android, iOS, TV and Figma
100+ designers	mentored one-on-one over ten years

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (streaming apps on iOS, Android, web and connected TV) *Hamburg + Berlin, Germany*

- Built a four-tier design-token architecture served as an API (primitives → semantic → component → page/view). The web Storybook reads it as its source of truth.
- Engineering builds from my prototype code: 64% of the code behind the redesigned Home and detail views of the Android app (release 6.0, in beta) comes verbatim from it.
- Own product design across iOS, Android, web and connected TV, from design strategy and user flows to UI, and act as product manager and product owner for the redesign.
- Research changed the design direction: a concept survey with 264 viewers showed brightness as the emotional core need, so light mode moved into the Mediathek.
- Redesigned the AI Bible feature entry with example prompts; weekly starts rose from 205 to 518 on iOS and 655 to 1,213 on Android (four-week averages).
- Tested the app against WCAG AA and built an OKLCH color engine that checks contrast for light and dark themes generated from program artwork and gives the app a visually consistent, colorful palette.
- Taught product managers and owners to build with AI.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical SaaS across six European markets) *Copenhagen, Denmark · Remote from Berlin*

- Led the capability that lets customers meet the European Accessibility Act on the websites they host on the platform, with AI-generated alt text built into the product.
- Tested the product and its website builder against WCAG AA.
- Weighed the planned add-on module against a platform capability and embedded booking in the platform: an estimated 70% less coordination effort, 90% booking acceptance, then released to all customers.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform across DACH, the UK and the US) *Berlin, Germany*

- Owned the design system and established its governance with Engineering.
- Led a design team of five direct reports with my own levelling framework and individual growth plans; promoted two designers. Senior Leadership Team member.
- Led Product and Design together for four months, nine people across both functions, while continuing hands-on product work.

Director of Design

2016 – 2021

Datameer GmbH (enterprise data analytics for regulated banks and insurers) *Berlin · team across Germany and New York*

- Established user research with enterprise users, building usertesting.com screening protocols to reach hard-to-reach users at banks and insurers.
- Defined component behavior and implementation specifications with Engineering for the co-built design system of a data-dense analytics platform.

UX Strategy Lead

2014 – 2016

Spreadshirt (international fashion and print-on-demand marketplace) *Leipzig, Germany*

- Represented users to leadership: research with shop owners changed an automation-first product direction during a nine-month seller-experience redesign.
- Prototyped and user-tested a mobile designer that went into production.

CURRENT PRODUCT PRACTICE

Independent product work alongside employed roles.

Selah for macOS — Independent product
Designed and agentically engineered a Mac app on the Mac App Store.

AI Bible study app for Bibel TV — In development
Designed and built an iOS and Android app with a web sibling, chat and retrieval over sermon videos; runs in test builds.

EARLIER CAREER PROGRESSION

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · design-thinking training for executive leadership and service teams

Independent Product Design Consultant · *Oratio&Co* · 2016 – Present · Remote · product strategy, UX direction and working prototypes

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · one-on-one mentoring of more than 100 career changers into UX design

UX Manager & Product Designer · *US consumer e-commerce* · 2009 – 2014 · Pennsylvania, USA · hand-written HTML, CSS and JavaScript

EDUCATION

M.A. Leadership
Kairos University, South Dakota, USA
Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Design systems and design tokens

DTCG tokens · token API · component libraries · Storybook · Figma Variables · documentation · governance with engineering · design-to-code consistency

Frontend understanding

HTML · CSS · JavaScript · React prototypes built with AI coding agents · Git and GitHub · implementation review · specifications and handoff

Figma and handoff

Figma Auto Layout · Variables · Dev Mode · Storybook as source of truth · working prototypes against production APIs

Research and usability testing

moderated and unmoderated usability testing · interviews · surveys · product analytics (GA4) · method choice for hard-to-reach users

Accessibility

WCAG AA testing · European Accessibility Act · screen-reader semantics and ARIA · contrast checks in code

Collaboration and mentoring

mentoring and design critique · stakeholder alignment · agile teams · product ownership · portfolio case studies on craft and concrete impact · native German · English C2 · Berlin-based
