Tobias Treppmann

AI enablement · Workflow transformation · Hands-on AI delivery · Adoption

LOCATION Berlin, Germany EMAIL tobias@treppmann.de PORTFOLIO treppmann.de/en LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I turn team-specific workflows into AI tools and ways of working people keep using. My experience combines autonomous end-to-end ownership, building production AI systems in small teams, and AI adoption evangelism. I bring product judgment, hands-on implementation, and change leadership across European SaaS, regulated financial workflows, shared services, and vertical software.

Minutes, not hours
complex support correspondence with a production Copilot workflow

11,405 clips
active n8n pipeline output from 3,504 videos in October 2026

70% / 90%
less coordination time and launch acceptance after workflow redesign

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) *Hamburg + Berlin, Germany*

- Shipped a Microsoft Copilot support workflow. Designed a platform-configured skill for viewer services, encoding the team handbook, house voice, scope boundaries, and restricted topics.
- Earned adoption through practical coaching. Ran an optional self-test week and individual sessions. Complex letters fell from hours to minutes; temporary staff worked on-brand immediately; two skeptical colleagues returned voluntarily.
- Built and operate an active n8n pipeline across APIs, Postgres, AI extraction, embeddings, and scheduling. October 2026: 11,405 source-linked clips from 3,504 videos, with new material processed every 15 minutes.
- Built Bibel TV's fundraising system solo: performance analysis, prompt architecture, guided web prototype, and a Claude skill for coordinated in-app, web, and video content.
- Enabled product-team AI use. Helped establish Claude with MCPs and guidelines, helped manage member access, token plans, and overages, and contributed to prototyping setups.
- Own “Bibel erklärt” (working title), a conversational AI Bible-study application. Lead its product management, design, development, onboarding, and retrieval workflows.
- Build Android and web prototypes against real APIs. An external agency uses this code and the shared design-token contract as implementation input.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical SaaS for churches and dioceses — DE / DK / UK / SE / NO / CH) *Copenhagen, Denmark · Remote from Berlin*

- Turned phone-based funeral coordination into a reusable capability. Embedded booking in the calendar and form builder. It cut coordination time 70%, reached 90% acceptance, and rolled out company-wide.
- Led product management and design with one direct report. Owned the main-platform specification, ticket board, and primary client relationship.

Head of Product Design

2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) *Berlin, Germany*

- Senior Leadership Team member with five direct reports; hired two and promoted two. Served as interim Head of Product with nine reports across product, design, data, and UX writing.
- Returned as an independent AI product consultant. Worked with the CEO and technical co-founder on prompt-to-application onboarding that became the basis for the public Ninox AI beta.
- Established Figma-to-Storybook design-system governance with product design and engineering.

Product & UX Strategist

2021 – 2022

Hypoport hub SE (shared-services arm of listed Hypoport SE) *Berlin / Lübeck, Germany · Remote*

- Helped transform bespoke internal services into standardized offers. Recurring workshops and reviews with department heads moved case-by-case support toward a scalable service catalog.
- Delivered executive training and cross-functional workshops. Qualified as a Holacracy facilitator and secretary while supporting organizational change.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for regulated banks and insurers) *Berlin, Germany · team across Germany and NYC*

- Moved design and research into strategic product decisions as the company pursued a new product opportunity, securing executive support for user research and increasing design's role in roadmap conversations.
- Led the design team across Germany and NYC, with two UX designers reporting directly and responsibility for priorities, quality, mentoring, and distributed collaboration.
- Designed complex enterprise workflows for business users, analysts, and data engineers in regulated banks and insurers.

EARLIER CAREER PROGRESSION

Independent Consultant · *Oratio&Co / Treppmann Studio* · 2016 – Present · Remote · product, workflow, AI, and design consulting

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · mentoring and coaching product designers

UX Strategy Lead · *Spreadshirt* · 2014 – 2016 · Leipzig, Germany · international e-commerce

Web Developer / UX Designer · *HOPE International / andCulture* · 2009 – 2013 · Pennsylvania, USA · HTML, CSS, JavaScript, and client work

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

AI enablement & workflow transformation

Workflow discovery · opportunity prioritization · AI adoption evangelism · nontechnical-team enablement · workshops and coaching · impact measurement · executive facilitation

Applied AI systems

Modern AI and agent frameworks · Claude · MCP · MS Copilot · n8n · agentic engineering · API-first integration · Postgres · prompt architecture

Product & change leadership

Autonomous end-to-end ownership · entrepreneurial instincts · startup and scale-up experience · new initiatives in small teams · product strategy · product management · change leadership

Responsible delivery

Human authority over consequential outputs · explicit scope rules · editable AI output · accessibility · design tokens as an AI control surface
