

Tobias Treppmann

Product design from unclear problem to usable product · responsible AI, regulated contexts and German-language research

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/unahealth LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I turn unclear problems into usable, buildable decisions and take end-to-end ownership through research, hypotheses, UI, engineering and iteration. At Bibel TV I prototype against real APIs and ship human-controlled AI workflows. At ChurchDesk I made complex booking rules usable in a product adopted across the customer base. I bring responsible-AI practice, regulated-context discipline and native-German research to Una Health.

Problem to shipped product

discovery, hypotheses, UI, engineering and iteration stay connected

70% / 90%

less coordination time and booking acceptance at the launch customer

Human control in AI

inspect, correct and decide before an AI-assisted result is used

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (consumer streaming across iOS, Android, web and connected TV) Hamburg + Berlin, Germany

- Own end-to-end product design and product management for the multi-platform redesign across iOS, Android, web and TV. I prioritize delivery and use beta and production feedback for rapid learning.
- Prototype in real code against real APIs. External engineering ships from the prototypes and reuses their code.
- Designed and shipped an MS Copilot workflow for viewer support. It drafts in the team's handbook voice while staff review, edit and send every response.
- Built an AI-assisted fundraising workflow end to end: performance analysis, a Claude Project with clarification loops, a web prototype and a production skill for campaign content.
- Built one design-system source for four platforms with Storybook and automated checks.

Independent Product Design Consultant

2016 – Present

Oratio&Co (independent consulting) Remote

- Confidential speech-therapy concept, 2025: assessed product and technical possibilities, set UX direction and prototyped the concept before deciding not to join as a co-founder.
- Ninox, summer 2025: designed prompt-to-database onboarding with its founders; generated schemas render in the real data-model editor so users can inspect and correct them.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical SaaS for churches and dioceses across six European markets) Copenhagen, Denmark · Remote from Berlin

- Led product design and product management for the core platform. I wrote specifications, ran the engineering ticket board and was the main contact for the German launch customer.
- Shipped a funeral-booking brief as a reusable platform capability. Building into the existing calendar and form builder allowed the same product to support room rentals, baptisms and weddings.
- Reduced coordination time by 70% with 90% booking acceptance at the launch customer, then rolled the capability out across the customer base.
- Ran recurring German validation with Evangelische Kirche von Kurhessen-Waldeck, including the parish lead, pastors and funeral directors around a sensitive workflow involving bereaved families.
- Shipped AI-assisted accessibility under European accessibility and church data-protection requirements.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform across DACH, the UK and the US) Berlin, Germany

- Designed for people building their own operational tools, from data models and workflows to dashboards and complete ERP solutions.
- Owned the Storybook and Figma Variables design system with joint engineering governance.
- Senior Leadership Team; five direct reports across product design and UX writing, with four months also leading product and design together.

Director of Design

2016 – 2021

Datameer GmbH (enterprise data analytics for regulated banks and insurers) · Berlin · team across Germany and New York

- Built the research method needed to reach analysts inside regulated banks and insurers, using iterative screening on usertesting.com when ordinary panels could not find the right users.
- Designed data-dense analytics and uncertainty states across complex enterprise workflows.
- Led UX across Germany and New York; two designers reported to me.

EARLIER CAREER PROGRESSION

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · productising internal services

UX Strategy Lead · *Spreadshirt* · 2014 – 2016 · Leipzig · research-led seller-experience strategy

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · coaching and mentoring product designers

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, Pennsylvania, USA

User Experience Designer · *andCulture* · 2012 – 2013 · Harrisburg, Pennsylvania, USA

Web Designer / Front-End Developer · *HOPE International* · 2009 – 2012 · Lancaster, Pennsylvania, USA

Earlier · *Web Designer, Bajaa.com and freelance* · 2000 – 2009 · Düsseldorf, Germany

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Product discovery and judgment

problem framing · testable hypotheses · focused user research · German-language research and copy review · high-fidelity UI · prototyping against real APIs · handover and production verification

Responsible AI product design

human-controlled workflows · inspectable and correctable model output · conversational UX · prompt and context design · MS Copilot · Claude Projects and skills · Claude Code

Design systems and buildable craft

Storybook · DTCG design tokens · Style Dictionary · Figma Variables · multi-platform systems for iOS, Android, web and connected TV · HTML, CSS, TypeScript, SwiftUI and Kotlin

Regulated and sensitive contexts

European accessibility requirements · GDPR plus church data-protection law · regulated banking and insurance users · sensitive multi-stakeholder workflows · native German · English C2 · Berlin-based
