Tobias Treppmann

Target role: Lead UX Designer · visual interface design · typography and color · design systems · AI interfaces

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/actai LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I design the visual layer of consumer apps as a system, and AI features for people who don't know what to type. At Bibel TV I chose the product's typefaces and built the color engine and token system behind its apps. I redesigned the AI Bible feature entry, and weekly iOS starts went from 205 to 518.

205 → 518	weekly iOS starts after I redesigned the AI Bible feature entry
Color engine, live	a readable light and dark theme computed from every artwork
4 tiers, 1 source	token system built to serve iOS, Android, web and connected TV

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (streaming apps on iOS, Android, web and connected TV) *Hamburg + Berlin, Germany*

- Chose the product typefaces. I evaluated the on-air brand typefaces for the app, one of which made it into the product, and chose Inter for small UI text.
- Built a live OKLCH color engine that computes a readable light and dark theme from each artwork. Color Lab, its configuration tool, keeps the settings in design's hands.
- Four-tier token system served as an API (primitives → semantic → component → page/view), read by Android, web, Figma, iOS and connected TV.
- Built a design system product managers can prototype with in Claude: Storybook as the source of truth, a closed token vocabulary and checks in CI that refuse off-system values.
- Redesigned the AI Bible feature entry with an input-styled field and five example prompts. Weekly starts: 205 → 518 on iOS, 655 → 1,213 on Android (four-week averages).
- Hands-on UI design for phone, tablet, desktop web and connected TV, with final design sign-off. A verse hero card sizes its own text so the whole verse always fits.
- Research set the visual direction: in a concept survey with 264 viewers, the new design in dark mode read as too gloomy and uninviting, so the redesign became light-first.
- Engineering builds from my prototype code: 64% of the code behind the redesigned Home and detail views of the Bibel TV Android app (release 6.0, in beta) comes verbatim from my prototype.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical SaaS for churches across six European markets) *Copenhagen, Denmark · Remote from Berlin*

- Designed funeral booking for web and mobile in Figma with my designer: booking pages and the priest's calendar, built into the existing platform, not a standalone module.
- Handoff engineering could build from: component specifications, token-based naming and redlined measurements in plain text.
- Coordination time fell by an estimated 70%, my estimate from the customer's account of the calls before. Booking acceptance reached 90%, and the capability shipped to the whole customer base.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform across DACH, the UK and the US) *Berlin, Germany*

- Owned the design system across Storybook and Figma Variables, and established joint governance with Engineering.
- Designed the App Store screenshots for iOS and Android during the UI refresh.
- Led a team of five across product design and UX writing; hired two and promoted two. Senior Leadership Team member.

Director of Design

2016 – 2021

Datameer GmbH (enterprise data analytics for regulated banks and insurers) *Berlin · team across Germany and New York*

- Designed data-dense analytical interfaces: query builders, big-data pivot tables, filter logic and sample-based uncertainty states.
- Defined component behavior and implementation specifications with Engineering for the co-built design system.

UX Strategy Lead

2014 – 2016

Spreadshirt (international fashion and print-on-demand marketplace) *Leipzig, Germany*

- Prototyped and user-tested a mobile designer that went into production.
- Represented users to leadership: research with shop owners changed an automation-first product direction during a nine-month seller-experience redesign.

CURRENT PRODUCT PRACTICE

Independent and freelance product work alongside employed roles.

Selah for macOS — Independent product

Designed the Mac app, its icon and its App Store screenshots, and agentically engineered the app now on the Mac App Store.

Ninox AI onboarding — Summer 2025

Designed prompt-to-database onboarding that generates into the real data-model editor, where users change what the first schema got wrong. It became the basis for the public AI beta.

EARLIER CAREER PROGRESSION

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · design-thinking training for executive leadership and service teams

Independent Product Design Consultant · *Oratio&Co* · 2016 – Present · Remote · product strategy, UX direction, working prototypes and print products

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · one-on-one mentoring of more than 100 career changers into UX design

Web, UX and Product Design · *HOPE International* · *andCulture* · *HairDirect* · 2009 – 2014 · Pennsylvania, USA · web and print design, hand-coded front end

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Visual interface design

UI design work in the portfolio at treppmann.design/for/actai · typography and typeface selection · layout and spacing · color systems in OKLCH with WCAG contrast in light and dark · adaptive layouts for phone, tablet, web and TV · App Store screenshots and app icons

Figma and design systems

Figma Auto Layout · components · Variables · Dev Mode · design tokens · Storybook · UI components · governance with engineering

AI interfaces

example-prompt entry points · AI output people can edit · a conversational AI Bible study app with chat and retrieval, in development · Claude Code daily

Frontend understanding

HTML · CSS · JavaScript · React, Kotlin and SwiftUI prototypes built with AI coding agents · Git and GitHub

Research

interviews · usability testing · concept surveys · GA4 feature analytics, paired with qualitative research

Ways of working

hands-on, independent, fast iteration with engineering · native German · English C2 · Berlin-based, remote
