PROFILE

I design AI products, build them in working code, and keep people in charge of what the AI does. I built a conversational AI Bible study app for Bibel TV in about two months. For Ninox, as a freelancer, I designed AI onboarding whose generated database people edit beside chat. Underneath: design systems, and a decade mentoring and coaching designers.

Built in ~2 months

conversational Bible study app · iOS, Android, web · in development

64% from my prototype

code behind redesigned Android Home and detail views · release 6.0, in beta

+153% weekly AI starts

redesigned AI feature on iOS · +85% on Android · GA4

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (consumer streaming across iOS, Android, web and connected TV) *Hamburg + Berlin, Germany*

- Designed, managed and built a Conversational AI Bible Study App (in development) in about two months: iOS and Android apps, a web sibling, chat and retrieval, including its in-product motion.
- Prototype in working code against production APIs with AI coding agents. 64% of the code behind the redesigned Android Home and detail views (release 6.0, in beta) comes verbatim from my prototype.
- Redesigned the AI Bible-passage feature end to end. Weekly starts rose from 205 to 518 on iOS and 655 to 1,213 on Android (GA4, four full weeks before and after).
- Built a four-tier design-token system that keeps Android, iOS, web, Figma and connected TV on one source.
- Made the design system usable by product managers and Claude: Storybook as shared reference and checks that refuse off-system values, so the standard holds without a designer reviewing every screen.
- Built an AI reply assistant for viewer services as a Microsoft Copilot skill and ran its introduction. Staff read each letter, use the draft by choice and decide what gets sent.
- Introduced Claude Code, GitHub with Spec Kit and MCP servers for internal documentation with the product team, and ran individual tutorial sessions with colleagues.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical SaaS for churches and dioceses across six European markets) *Copenhagen, Denmark · Remote from Berlin*

- Owned product management for the main platform and led all product design, spanning operational web and mobile workflows for non-technical professionals.
- Reframed a funeral-booking feature brief as a booking capability built into the platform's calendar and form builder. I tested the click dummy with pastors and funeral directors before the final specification.
- Reduced coordination time by an estimated 70%. Booking acceptance reached 90%, and the capability shipped to the full customer base.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform for SME workflows) *Berlin, Germany*

- Owned and evolved the design system across Storybook, Figma Variables, navigation, modals and searchable multi-select components; established joint governance with Engineering and defined custom easing curves, small animations and transitions.
- Freelance, summer 2025: designed prompt-to-database AI onboarding. Generated schemas open in the real editor beside chat, where users change them; this became the basis of the public AI beta.
- Five direct reports across product design and UX writing, as a member of the Senior Leadership Team; hired two and promoted two.
- Analyzed thousands of community posts with Claude to identify recurring pain points.

Director of Design

2016 – 2021

Datameer GmbH (enterprise data analytics for regulated banks and insurers) *Berlin · team across Germany and New York*

- Designed data-dense analytical interfaces: query builders, big-data pivot tables, aggregated JSON views and filter logic.
- Established user research in a restricted enterprise environment, including in-person sessions with US banking and insurance customers, and brought the evidence into roadmap decisions.
- Led UX across Germany and New York with two UX designers reporting.

UX Strategy Lead

2014 – 2016

Spreadshirt (international print-on-demand marketplace) *Leipzig, Germany*

- Led a nine-month redesign of the seller portal, where shop owners administer their shop and products; research with shop owners changed an automation-first product direction.
- The mobile product-designer prototype moved into production.

BUILT AND RUNNING

Products I designed and built hands-on, used in production.

Selah for macOS — Independent product

Designed and agentically engineered a Mac app shipped on the Mac App Store, authoring pull requests that were merged and released to production.

Color engine, Bibel TV — In production

Built an OKLCH engine that derives readable app themes from the cover art of a 10,000+ video catalog, served through a production API.

EARLIER CAREER PROGRESSION

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · productized bespoke internal services through workshops and reviews

Independent Product Design Consultant · *Oratio&Co* · 2016 – Present · Remote · product strategy, UX direction and working prototypes

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · mentoring and coaching product designers

Earlier · *UX Manager, UX Designer, Web Designer & Front-End Developer* · 2009 – 2014 · Pennsylvania, USA · e-commerce, product design, HTML, CSS and JavaScript

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Product design

Figma · end-to-end product design lifecycle · UX and UI fundamentals · web and mobile · problem framing · flows and interaction · polished visual execution · B2B dashboards and data-heavy interfaces

AI-first building

Claude Code, ChatGPT and Gemini as daily tools · working prototypes against production APIs, used as the code engineering builds from · conversational AI · human-in-the-loop AI patterns · editable generated output · AI-assisted research synthesis · agentically engineered React, SwiftUI and Kotlin prototypes

Systems

design systems · shared quality standards · design tokens · Style Dictionary · Storybook · Figma Variables · reusable patterns · motion and easing in the system · engineering governance

Research and measurement

user interviews · usability testing · concept surveys · product analytics · GA4 · Looker Studio · analytics paired with qualitative research

Collaboration and enabling

product and design ownership together · engineering partnership · tutorial sessions · mentoring and coaching designers · presenting to decision-makers · hand-written frontend HTML, CSS and JavaScript

Languages and base

German native · English C2 · Berlin-based · German / EU work authorization
