AVAILABILITY

From late September 2026

Looking for a senior IC seat with
defined scope

EDUCATION

M.A. Leadership

Kairos University
2022 – 2026

B.A. Theology (equiv.)

Theologisches Seminar Rheinland
2003 – 2007

LANGUAGES

German — first language

English — C1, fluent

ONGOING

Selah

Indie app, solo
2024 – Present

Oratio&Co

Independent practice
2016 – Present

SKILLS

Design Systems

Built from scratch (3×), live token API
Figma, Variables, Storybook
MCP layer, LLM-safe by design

Interaction & Concept

Complex systems made simple
Filter & search interfaces
Cross-platform & big-screen UI
Prototyping in code, accessibility

Research

Hands-on usability testing and
interviews, in German and English

PROFILE

Product designer, 15+ years, most at home where a system is complicated underneath and has to feel simple on top. Built design systems from scratch at Datameer, Ninox and Bibel TV, where the token API is now live. German first language, English C1.

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (Multi-platform B2C streaming, mobile / web / connected TV) — sole designer Hamburg / Berlin

- Built and shipped the design system as a source-of-truth token API keeping web, iOS, Android and Figma in sync
- Design product across mobile, web and connected TV for a consumer app in redesign
- Building an MCP layer over it so LLMs and non-designers pull real components instead of guessing
- Prototype in code. Engineering now consumes part of the prototype directly
- Moderate my own research sessions in German and English, then confirm the fix with conversion and usage data

Head of Platform and Design

2024 – 2025

ChurchDesk GmbH (European church-management SaaS, six countries) — design team of two Berlin

- Researched and designed a booking system for funeral homes, pastors and cemeteries across 20+ locations, replacing days of phone-tag
- Coordination fell from days to hours. 90% booking acceptance through smart filtering and error prevention
- Built design system components for reporting pages, including inline and advanced filters
- Led company-wide web accessibility compliance, including AI-generated alt text

Head of Product Design

2023 – 2024

Ninox Software GmbH (Low-code business application platform) Berlin

- Redesigned the platform UI and built the design system from scratch, including navigation, modals and searchable dropdowns
- Ran research with business users, then designed the building blocks they use to build their own views
- Shared design-system governance across four designers and engineering

Product & UX Strategist

2021 – 2022

Hypoport Hub SE (Group shared service center, service-to-product transformation) Berlin

Director of Design

2016 – 2021

Datameer GmbH (Collaborative big data analytics platform) Berlin / NYC

- Designed comprehensive filter logic, pivot tables, result cards and column charts for very large datasets
- Built iterative screening on usertesting.com to reach users regulation had made hard to recruit
- Led a three-person team across Berlin and New York through a full redesign
- Built the platform design system from scratch

EXPERIENCE (CONTINUED)

UX Strategy Lead <i>Spreadshirt (International print-on-demand marketplace, ~5,000 sellers)</i> Leipzig	2014 – 2016
• Led a nine-month seller-experience redesign the company had attempted twice before • Balanced roughly 5,000 sellers against hundreds of thousands of consumers on the same platform • User interviews changed executive strategy from a 60-second automated flow to one preserving user control • Mobile design-tool prototype tested "resoundingly positive" and went to production	

UX Manager <i>HairDirect (Consumer eCommerce with complex product configuration)</i> Lancaster, PA, USA	2013 – 2014
• Won executive buy-in for mobile through trend analysis, enabling the first mobile revenue stream • Broke the internal assumption that nobody orders complex products on mobile	

EARLIER CAREER PROGRESSION

User Experience Designer <i>andCulture (Design agency, enterprise and government clients)</i> Harrisburg, PA, USA	2012 – 2013
• Team member on client projects, including Silicon Valley startups through the a16z network	

Web Designer & Front-End Developer <i>HOPE International (Global microfinance non-profit)</i> Lancaster, PA, USA	2009 – 2012
--	-------------

Freelance Web Designer <i>Web design and front-end development for small businesses and non-profits</i> Lancaster, PA, USA	2003 – 2008
--	-------------

TEACHING & MENTORING

Senior Mentor <i>CareerFoundry (Online UX design education)</i>	2016 – 2026
• Mentored aspiring designers on portfolio development, critique and career transition for ten years	

Mentor <i>Interaction Design Foundation (IxDF)</i>	2020 – 2022
--	-------------

Mentor Advisory Board <i>The UX School</i>	2017 – 2018
--	-------------

SELECTED PROJECTS

Design tokens synced across four platforms <i>Bibel TV — token API live, MCP layer in development</i>	Ongoing
• One token repository feeds Figma, iOS, Android and web through a controlled review flow • Nobody edits tokens by hand. Every other surface is generated from the repository • Now adding an MCP layer so non-designers and LLMs can use the system without breaking it	

AI-powered onboarding for a no-code platform <i>Ninox — consulting engagement</i>	2025
• Designed the onboarding flow against the single biggest adoption hurdle users hit on the platform • Prompt-to-database, with the output always editable, so users keep control of what the AI produced	

Multi-Stakeholder Booking System <i>ChurchDesk — replacing days of phone coordination between four parties</i>	2024 – 2025
• Progressive disclosure showed only viable slots, so availability was trusted without a phone call • Became a core platform feature beyond the region it was built for
