PROFILE

I lead design for complex builder products and still build. At Ninox, I opened a no-code platform to less technical users without hiding its data model. At Bibel TV, I now use n8n in a live-tested AI product pipeline. I pair strategic influence and people leadership with direct product and implementation judgment.

805 clips

from 299 videos in the September 2026 n8n corpus snapshot

9 people

across four disciplines as interim Head of Product

2 hires

plus two promotions, career levels and difficult people decisions

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (consumer streaming across iOS, Android, web and connected TV) Hamburg + Berlin, Germany

- Lead product design and product management across four consumer platforms, turning emerging AI and media-product ideas into research, product direction, working prototypes and delivery specifications.
- Built and live-tested an n8n sermon pipeline for “Bibel erklärt,” a Conversational AI Bible Study App in development. It turns videos into consistent transcripts, source-linked Bible-passage clips, chapters and retrievable material for the product.
- Simplified the pipeline’s critical path and fixed two failures from live execution traces: an n8n branch-order race and a broken upstream node reference. The corrected transcription workflow was re-verified end to end.
- By September 2026, the corpus held 805 sermon clips from 299 transcribed videos and those clips were wired into the app’s live chat.
- Design and agentically develop “Bibel erklärt” across product direction, UX, UI, motion and onboarding. I prototype with Claude Code against real APIs; external engineering works from the prototypes and reuses their code in delivery.
- Built one design-system source for iOS, Android, web and connected TV with Storybook, DTCG tokens, automated checks and accessible light and dark color generation.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical workflow SaaS across six European markets) Copenhagen, Denmark · Remote from Berlin

- Led product design and product management for the core platform, writing specifications and prioritizing the board engineering worked from.
- Turned a customer-specific funeral-booking request into a reusable platform capability in the existing calendar and form builder, serving funerals, room rentals, baptisms and weddings.
- Reduced coordination time by 70%; booking acceptance reached 90%.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform across DACH, the UK and the US) Berlin, Germany

- Led five people across product design and UX writing as a Senior Leadership Team member, with responsibility for the design function, career development and quality.
- Led Product and Design together for four months: nine direct reports across product design, UX writing, product management and data science.
- Hired two people, promoted two and made two exit decisions. Established a levelling framework, ran performance reviews and coached the Design Lead through a strained engineering relationship.
- Made Design a peer to Product and Engineering in roadmap and product decisions, while owning the design system and establishing joint governance with engineering.
- Later designed prompt-to-database AI onboarding with the CEO and technical co-founder. Generation starts from plain-language intent, then renders the schema in the real data-model editor so less technical users can inspect, correct and continue building.

Director of Design

2016 - 2021

Datameer GmbH (enterprise data analytics for regulated banks and insurers) · Berlin · team across Germany and New York

- Led two UX designers across Germany and New York and set interaction and design-system quality for a complex analytics product.
- Designed data-dense builder experiences including query builders, pivot tables, aggregated JSON views, result cards, filtering and uncertainty states.
- Built a research method for hard-to-reach analysts using iterative screening on usertesting.com when ordinary panels could not find users inside regulated banks and insurers.

UX Strategy Lead

2014 - 2016

Spreadshirt (international fashion and print-on-demand marketplace) · Leipzig, Germany

- Led a nine-month seller-experience redesign after two previous attempts had failed.
- Research with shop owners overturned an automation-first strategy. Users valued the creative step most, so the direction moved toward automation that preserved control.
- Built a mobile product-designer prototype with the UI team in one intensive week; user feedback was strongly positive and the interaction moved into production.

EARLIER CAREER PROGRESSION

Product & UX Strategist · *Hypoport hub SE* · 2021 - 2022 · Berlin / Lübeck · helped turn case-by-case internal services into standard offerings

Independent Product Design Consultant · *Oratio&Co* · 2016 - Present · product strategy, UX direction and working prototypes

Senior Mentor · *CareerFoundry* · 2016 - 2026 · coaching and mentoring product designers

UX Manager · *HairDirect* · 2013 - 2014 · Lancaster, Pennsylvania, USA

User Experience Designer · *andCulture* · 2012 - 2013 · Harrisburg, Pennsylvania, USA

Web Designer / Front-End Developer · *HOPE International* · 2009 - 2012 · Lancaster, Pennsylvania, USA

Earlier · *Web Designer, Bajaa.com and freelance* · 2000 - 2009 · Düsseldorf, Germany

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Product design leadership

product and design strategy · team structure · hiring · career levels · performance reviews · coaching · design critique · cross-functional decision making · distributed teams

AI, automation and configurable products

· workflow orchestration · no-code platforms · AI agents · conversational UX · human-in-the-loop systems · inspectable generation · failure recovery · user control

Research, data and growth surfaces

qualitative research · user testing · community feedback · usage analysis · onboarding · activation · time to value · product strategy under ambiguity

Craft and design engineering

interaction and visual design · complex product systems · Figma · Storybook · DTCG design tokens · Claude Code · prototypes against real APIs · TypeScript · accessibility · design QA

Languages and location

native German · English C2 · Berlin-based · authorized to work in Germany and the EU
