EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA
Completed 2026

Theological Studies

Theologisches Seminar Rheinland
2003 – 2007

LANGUAGES

German · native

English · C2, fluent

SKILLS

Product ownership without a PM

Writing the spec · running the ticket board engineering works from · customer calls and discovery as the main contact · feasibility treated as input, and scope traded for a ship date when it has to be

Prototyping and engineering proximity

Real code against real APIs · prototype-grade output rather than wireframes · engineering shipping from prototype code across a company boundary · HTML, CSS, TypeScript, SwiftUI, Kotlin, React

Dense interfaces, and AI in production

Pivot tables, column charts, aggregated JSON views, filter logic and query-builder previews · a support copilot live in production, human-in-the-loop so the send decision stays human

Design systems and regulated markets

Design system as an API · DTCG tokens, Style Dictionary, Storybook, Figma Variables · GDPR plus church data-protection law across six countries · German native, English C2

ONGOING

Independent Consultant

Oratio&Co

2016 – Present · Remote

Collaborative leadership coaching and product-strategy consulting for mission-driven organizations.

PROFILE

I've spent fifteen years in B2B software, and the parts I do best are the parts nobody assigns — writing the spec, running the board, sitting on the customer call. I prototype in real code against real APIs, and engineering ships from it. The last year went into AI that runs in production rather than AI that demos.

70% / 90%

less coordination time, and acceptance at the launch customer — on the capability I argued into the platform rather than beside it

Specs and board

I write the specifications and run the ticket board engineering works from

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) · Hamburg + Berlin, Germany

- Prototype in real code, and the agency ships from them — web first, then Android, running against real APIs rather than clickable mockups.
- I write the specs and run the board — the tickets engineering works from are mine to write and prioritize.
- AI support copilot, live in production — assistive drafting for viewer letters in the handbook's wording. A restricted-topic list sits in the system prompt, and every send decision stays human.
- AI fundraising ecosystem, built solo end to end — analysis, prompt architecture, prototype, then a production Claude skill generating follow-up content across in-app, web and video.
- Design system as an API — DTCG tokens, Style Dictionary, multi-platform sync across iOS, Android, web and connected TV.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) · Copenhagen, Denmark · Remote from Berlin

- Designer and product manager at once — product management for the main platform plus all product design.
- Booking module — the decision I defended through the build — inherited a €20k client-funded project scoped as a standalone add-on and reframed it into a platform capability.
- AI alt-text in production — shipped for EU accessibility compliance under GDPR plus Protestant and Catholic church data-protection law, across six countries.
- Two engineers, two months, daily contact — design in Figma, build in code, and I was in the build every day rather than at the end of it.

Head of Product Design

2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) · Berlin, Germany

- Prompt-to-database onboarding, with the CEO and technical co-founder (freelance, summer 2025) — the AI-generated schema renders into the real data-model editor, not a chat preview.
- Research at a scale a team cannot read — Claude over thousands of forum posts for sentiment, pain points and feature requests, with Dovetail as the shared repository.
- Senior Leadership Team, 5 direct reports including a design lead — and shared design-system governance established across 4 designers and engineering.

Product & UX Strategist

2021 – 2022

Hypoport hub SE (shared services arm of listed Hypoport SE) · Berlin / Lübeck, Germany · Remote

- Service-to-product transformation — partnered with the executive team to productize the service organization. Case-by-case support became a standard catalog.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) · Berlin, Germany · team across Germany and NYC

- Five years of data-dense B2B desktop interfaces — big-data pivot tables, column charts, aggregated JSON views, result cards and filter logic.
- Led the design team across Germany and NYC for five years — two UX designers reporting to me. A six-hour gap, held together by cross-timezone collaboration processes I established.
- Design system — I defined component behavior and specs across the library.

EARLIER CAREER PROGRESSION

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · a decade reviewing and critiquing designers' work

UX Strategy Lead · *Spreadshirt* · 2014 – 2016 · Leipzig, Germany · 200+ people

Earlier · *UX Manager, UX Designer, Web Developer* · 2009 – 2014 · Pennsylvania, USA
