PROFILE

I turn team-specific workflows into AI tools and ways of working people keep using. At Bibel TV I built production Copilot, Claude, and n8n systems, enabled nontechnical teams, and helped establish agentic product delivery. I bring product judgment, hands-on implementation, and change leadership across enterprise analytics, shared services, and vertical SaaS.

Minutes, not hours
complex support correspondence with a production Copilot workflow

11,405 clips
active n8n pipeline output from 3,504 videos in October 2026

70% / 90%
less coordination time and launch acceptance after workflow redesign

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) *Hamburg + Berlin, Germany*

- Support workflow transformed with AI. Designed and shipped a platform-configured MS Copilot skill for viewer services, encoding the team handbook, house voice, scope boundaries, and restricted topics. Complex multi-topic letters now take minutes rather than hours, and temporary staff can draft in the company voice from day one.
- Adoption through practical coaching. Introduced the support skill through an optional self-test week and individual sessions. Initially skeptical colleagues returned voluntarily after experiencing its value on difficult cases.
- Active AI content pipeline. Built and operate n8n workflows across APIs, Postgres, AI extraction, embeddings, and scheduled processing. An October 2026 snapshot contained 11,405 source-linked clips from 3,504 sermon videos; new material is processed every 15 minutes.
- Fundraising system built solo end to end. Analyzed letter performance and encoded the findings plus style guide in a guided web prototype. Shipped a Claude skill producing coordinated content for in-app, web, and video surfaces.
- Product-team AI enablement. Helped establish Claude with MCPs and team guidelines, managed member access plus token plans and overages, and contributed to prototyping setups.
- Conversational AI product in development. Own product management, design, and development of a Bible-study application, including its onboarding and retrieval workflows.
- Agentic product delivery. Build working prototypes in code and against APIs; an external engineering agency ships from the prototype code and shared design-token contract.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical SaaS for churches and dioceses — DE / DK / UK / SE / NO / CH) *Copenhagen, Denmark · Remote from Berlin*

- Turned a phone-based coordination process into a reusable platform capability. Integrated funeral booking into the calendar and form builder. The capability reduced coordination time by 70%, reached 90% acceptance at launch, and rolled out to the full customer base.
- Led product management and design together, with one direct report, responsibility for the main-platform specification and ticket board, and the primary client relationship.

Head of Product Design

2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) *Berlin, Germany*

- Senior Leadership Team member with five direct reports, including a design lead; hired two and promoted two. Served simultaneously as interim Head of Product with nine reports across product, design, data, and UX writing.
- Returned as an independent AI product consultant to work with the CEO and technical co-founder on onboarding that turns a process description into an editable application structure in the real builder.
- Established joint design–engineering governance for the design system and its implementation.

Product & UX Strategist

2021 – 2022

Hypoport hub SE (shared-services arm of listed Hypoport SE) *Berlin / Lübeck, Germany · Remote*

- Helped transform bespoke internal services into standardized offers. Recurring workshops and reviews with department heads moved case-by-case support toward a scalable service catalog.
- Facilitated organizational change through executive training, cross-functional workshops, and formal governance roles.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for regulated banks and insurers) *Berlin, Germany · team across Germany and NYC*

- Moved design and research into strategic product decisions as the company pursued a new product opportunity, securing executive support for user research and increasing design's role in roadmap conversations.
- Led the design team across Germany and NYC, with two UX designers reporting directly and responsibility for priorities, quality, mentoring, and distributed collaboration.
- Designed complex enterprise workflows for business users, analysts, and data engineers in regulated banks and insurers.

EARLIER CAREER PROGRESSION

Independent Consultant · *Oratio&Co / Treppmann Studio* · 2016 – Present · Remote · product, workflow, AI, and design consulting

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · mentoring and coaching product designers

UX Strategy Lead · *Spreadshirt* · 2014 – 2016 · Leipzig, Germany · international e-commerce

Web Developer / UX Designer · *HOPE International / andCulture* · 2009 – 2013 · Pennsylvania, USA · HTML, CSS, JavaScript, and client work

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

AI enablement & workflow transformation

Workflow discovery · opportunity prioritization · nontechnical-team enablement · workshops and coaching · adoption · impact measurement · executive facilitation

Applied AI systems

Claude · MCP · MS Copilot · n8n · agentic engineering · API-first integration · Postgres · prompt architecture · LLM evaluation

Product & change leadership

Product strategy · product management · service-to-product transformation · Senior Leadership Team · distributed teams · hiring, mentoring, and coaching

Responsible delivery

Human authority over consequential outputs · explicit scope rules · editable AI output · accessibility · design tokens as an AI control surface
