PROFILE

I'm a product and design leader with 15+ years turning ambiguous B2B opportunities into products people can use and teams can ship. I work from research and strategy through interface design, real-code prototypes and scalable design systems. Recent work includes founder-led AI onboarding, a two-month platform launch and multi-platform product systems that external engineers ship from.

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (streaming and media — iOS, Android, web, connected TV) Hamburg + Berlin, Germany

- Strategy becomes a working product early. I prototype against real production APIs, first on web and then Android; an external engineering agency reviews and ships from that code.
- Translated the 2025 broadcast rebrand into product. The validated redesign establishes a warm, premium visual language across discovery, search and watch-next, with light mode as the primary direction.
- Built the visual system underneath it. A production color engine uses k-means clustering in OKLCH with WCAG contrast validation; a configuration tool makes every threshold adjustable.
- Design system as scalable infrastructure. A platform-agnostic token API uses DTCG and Style Dictionary across Android, web and Figma. The iOS and connected TV clients need implementation, not a new system.
- Product management, product ownership and design held together. I write and prioritize the engineering ticket board, give final design-side sign-off and check features in beta and production.
- Built an AI fundraising system end to end: performance analysis, prompt architecture, working generation flow and a production Claude skill for follow-up content.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) Copenhagen, Denmark · Remote from Berlin

- Turned a brief into a platform capability. I extended the calendar and form builder instead of creating a standalone add-on, making the system reusable for funerals, rooms, baptisms and weddings.
- Development release in two months. I owned product management, design and specifications. I ran the ticket board and stayed in daily contact with two engineers and the launch customer.
- 70% less coordination time and 90% booking acceptance at the launch customer, followed by release across the customer base.
- Designed one workflow for three parties with opposing needs: funeral directors, parish assistants and priests, with progressive disclosure and error prevention built into the scheduling logic.
- Made accessibility a platform capability. Customers across six countries received what they needed to meet a new legal obligation on the websites ChurchDesk hosts.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code B2B application platform — DACH / UK / US) Berlin, Germany

- Returned in 2025 for founder-led AI onboarding. I worked with the CEO and technical co-founder before product-team handoff. Chat and the real data-model editor remain usable side by side.
- Held product strategy, roadmap and design together for four months: nine reports across product management, data science, product design and UX writing, as a member of the Senior Leadership Team.
- Hired two and promoted two. Built a personalized levelling framework for product design and UX writing and used it for growth plans and level requirements.
- Owned the design system and established joint governance with engineering through a working group of four designers and engineers.

Product & UX Strategist

2021 – 2022

Hypoport hub SE (shared services arm of listed Hypoport SE) Berlin / Lübeck, Germany · Remote

- Productized a 100+-person service organization. Partnered with the executive team to turn case-by-case support into a standard service catalog.
- Worked inside the operating system, not beside it. Held constitutional Facilitator and Secretary roles in the organization's Holacracy governance.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for leading US / CA / UK banks and insurers) · Berlin, Germany · Team across Germany and NYC

- Led design and research from concept through release for a new collaborative B2B data platform, including dense analytics and sampled-data uncertainty.
- Reached users inside regulated institutions. Pioneered iterative usertesting.com screening for analysts working inside banks and insurers.
- Led the design team across Germany and NYC for five years. Two UX designers reported to me; I worked as a functional peer with product and engineering.

INDEPENDENT PRACTICE

A consulting practice that has run alongside employed product and design roles since 2016.

Oratio&Co

2016 – Present

Product-strategy and leadership consulting. Clients include Software AG and Ninox; the 2025 Ninox engagement moved from direct founder collaboration into product-team delivery.

EARLIER CAREER PROGRESSION

Senior Mentor · *CareerFoundry* · 2016 – 2026 · remote · ten years mentoring and coaching designers

UX Strategy Lead · *Spreadshirt* · 2014 – 2016 · Leipzig · research, B2B seller experience and a mobile prototype that reached production

UX Manager · *HairDirect* · 2013 – 2014 · Pennsylvania, USA · e-commerce and mobile checkout

Earlier · *UX Designer, Web Designer & Front-End Developer* · 2009 – 2013 · Pennsylvania, USA · product, web, frontend and visual design

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Zero-to-one product work

Founder-led exploration · working autonomously at founder speed · drive product strategy from prototype to production · opportunity framing · interaction design · product management and product ownership · engineering tickets and production checking

Research and validation

Customer interviews and usability testing · iterative recruiting for hard-to-reach enterprise users · concept surveys · competitive analysis · working prototypes used in user and stakeholder sessions

UI, visual language and brand systems

Figma and Figma Variables · responsive web, iOS, Android and connected TV · design systems · DTCG and Style Dictionary · OKLCH color systems · typography and component behavior · WCAG and accessibility

Building with AI

Real-code prototypes against production APIs · HTML, CSS and JavaScript · Claude Code, Claude Projects and Claude skills · prompt-to-database · human-agent interaction · Storybook · SwiftUI and Kotlin through agentic engineering

Delivery and operating systems

Prototype-to-production handoff · external engineering partners · release validation · prioritized ticket boards · design-side sign-off · distributed product teams · Holacracy governance

B2B domain expertise

Complex SaaS and data products · nine reports across four disciplines · Senior Leadership Team · founder and executive collaboration · distributed teams across Europe and the US · German native, English C2 · EU work rights
