PROFILE

I hold design direction for an iOS, Android, web and connected-TV app with no in-house design team, so the standard lives in a token API and Storybook rather than in review. I prototype natively in Claude Code and Kotlin, and engineering ships from that code. Before this I led five designers and writers at Ninox.

91.8% of my design-token fields verified in the shipped Android build, field by field	5 reports, 2 promoted at Ninox, on a levelling framework I wrote for design and UX writing	Kotlin + Claude Code the app redesign prototyped natively against real data; engineering ships from it

EXPERIENCE

Head of Product Design 2025 – Present
Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) Hamburg + Berlin, Germany

- Design direction across a company boundary. No in-house design team and engineering at external agencies, so I hold direction as designer, product manager and product owner for the app redesign.
- One pattern system, held in the build. A platform-agnostic token API in four tiers, Storybook as the source of truth, and checks that reject anything off-system.
- Verified in the store app. A teardown of the shipped Android build found 91.8% of my design-token fields and 94% of the core Kotlin token model, field by field.
- Prototyped natively, where the users are. Claude Code against real data first, then Kotlin and Jetpack Compose because Android is the largest part of the userbase. Engineering ships from that code.
- Platform judgment, tested. A stakeholder worried that old Android screens band on gradients. The banding tracked old displays, not Android, so multi-step gradients shipped everywhere.
- Adaptive layouts, phone to TV. Phone, tablet including iPad, desktop web, connected TV.
- AI in production. A support copilot drafting in the handbook's voice with every send decision human, and an AI fundraising ecosystem built solo, end to end.
- Direction from data. In a concept survey of 264 users, 83% chose light over the industry's dark default. New features are tested against the existing version.

Head of Platform and Design 2024 – 2025
ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) Copenhagen, Denmark · Remote from Berlin

- Designed the web and mobile surfaces of the booking capability; engineering built the mobile app in React Native for iOS and Android.
- Built into the platform, not beside it. Inherited as a standalone add-on, delivered inside the existing calendar and form builder. 70% less coordination time and 90% acceptance at the launch customer.
- Product management for the main platform alongside all product design, with one designer reporting to me.

Head of Product Design · Interim Head of Product 2023 – 2024
Ninox Software GmbH (no-code business platform — DACH / UK / US) Berlin, Germany

- Design system and components that ship in the Ninox app, including its redesign. I owned the system and established joint governance with engineering.
- Five direct reports including a design lead, half product design and half UX writing, on the Senior Leadership Team. Four months as interim Head of Product on top.
- Raised the ceiling on a framework I wrote. Levelling for design and UX writing, growth plans against it, two promotions made on it.
- Consistency spent where it counts. Redesigned the editor and core interface, aligned the older admin surfaces on color and buttons, and kept the key journeys free of visual breaks.
- AI as a native part of the product. As a consultant in summer 2025, designed the prompt-to-database onboarding with the founders: the generated schema renders into the real editor beside the chat.
- Claude over thousands of forum posts, Dovetail as the shared repository.

Product & UX Strategist 2021 – 2022
Hypoport hub SE (shared services arm of listed Hypoport SE) Berlin / Lübeck, Germany · Remote

- Influence without a reporting line. Partnered with the executive team to productize a shared-service organization, and held the Facilitator and Secretary roles in its Holacracy governance.

Director of Design 2016 – 2021
Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) Berlin, Germany · team across Germany and NYC

- Led the design team across Germany and NYC for five years, two UX designers reporting to me.
- Defined component behavior and specs across the design system.

UX Strategy Lead 2014 – 2016
Spreadshirt (print-on-demand platform — hundreds of thousands of consumers) Leipzig, Germany

- A mobile prototype that changed the strategy. Led the mobile t-shirt designer prototype; users' feedback was resoundingly positive and it went to production.
- Led a nine-month seller-experience redesign after two earlier attempts had failed.

EARLIER CAREER PROGRESSION

Design Consultant · *Ninox Software GmbH* · Summer 2025 · prompt-to-database AI onboarding with the founders

Indie developer · *Selah – Mindful Transitions, Mac App Store* · 2024 – present · designed, built and shipped solo

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · a decade mentoring and coaching designers

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, Pennsylvania, USA · mobile checkout redesign that opened the company’s first mobile revenue

Earlier · *UX Designer, Web Designer and Front-End Developer* · 2009 – 2013 · Pennsylvania, USA

EDUCATION

M.A. Leadership
Kairos University, South Dakota, USA
Completed 2026

Theological Studies
Theologisches Seminar Rheinland
2003 – 2007

LANGUAGES

German · native

English · C2, fluent

SKILLS

Native mobile and multi-platform

iOS and Android design against Apple HIG and Material Design · Kotlin and Jetpack Compose prototyping · SwiftUI · adaptive layouts across phone, tablet including iPad, desktop web and connected TV · a point of view on Liquid Glass and Material 3 Expressive

Design systems as infrastructure

DTCG tokens in four tiers · Style Dictionary · Storybook as the source of truth · Figma Variables and auto layout · one token API consumed by web, Android and Figma · an OKLCH color engine with WCAG contrast held in light and dark

AI-assisted design and prototyping

Claude Code daily · prototypes in real code against real APIs that engineering ships from · Claude skills and projects in production · AI features designed as a native part of the product · a closed token vocabulary an assistant cannot drift from

Direction, outcomes and people

Influence without authority across product managers, agencies and executives · concept surveys, A/B practice, usertesting.com, Claude over thousands of forum posts · levelling framework, promotions, hiring · German native, English C2
