

Tobias Treppmann

Principal Product Strategist – UX/UI — design direction across legacy and modern front ends

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/planon LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I've held a legacy interface and a new one together at two products by spending consistency on the key journeys first. Under that sits a design system I built as an API — one source for iOS, Android, web and connected TV, enforced in the build. And I've led nine people across four disciplines on a senior leadership team.

Legacy + modern

old and new UI held coherent on the key journeys, twice

Four token tiers

one source for iOS, Android, web and connected TV, enforced in CI

Nine reports

four disciplines across two functions, on the Senior Leadership Team

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) Hamburg + Berlin, Germany

- Scoped the redesign to the streaming journeys, on purpose. The existing UI got color-scheme alignment and unified buttons, so the core paths read as one product while both generations are live.
- Built the design system as an API. Four token tiers, from primitives up to page and view, from one source built to serve iOS, Android, web and connected TV.
- Storybook is the source of truth, and the build enforces it. Checks in CI refuse a token reference that does not resolve or a value written straight into a component.
- One token vocabulary, for product managers and AI assistants alike.
- Prototype in real code with Claude Code against production APIs. External engineering ships from that code.
- Product manager, product owner and final design sign-off for the redesign. I write the ticket board engineering works from and verify the result in beta and production on iOS, Android, web and TV.
- Shipped a support copilot for viewer services, operated by the team by hand, with an explicit restricted-topic list and every send decision human.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) Copenhagen, Denmark · Remote from Berlin

- Embedded a new booking capability into the existing calendar and form builder rather than a parallel module; engineering built it in React and React Native.
- Coordination time fell 70% at 90% acceptance. Then it shipped to every customer.
- Held product management for the platform beside all of its design, and wrote the Figma specs engineering built from: interaction behavior, token-based naming, redlined measurements in plain text.
- Let customers meet the European Accessibility Act automatically on the websites the platform hosts for them, across six countries.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform that generates its interfaces from the data schema — DACH / UK / US) Berlin, Germany

- Redesigned the editor and the core interface, shipped in the Ninox app on iOS and Android; left the admin back-end as it was, on purpose. Consistency went where users spend their time.
- Owned the design system and established joint governance with engineering: a working group of four designers and the engineering team.
- Led five designers and UX writers, including a design lead, on the Senior Leadership Team.
- For four months, two functions at once: nine people across product design, UX writing, product management and data science.
- Wrote the leveling framework for design and UX writing and promoted two against it. Hired two. Ran performance reviews and a lean 360 workshop.
- Designed the navigation, modals and searchable dropdowns a schema-driven product renders its dashboards from, specified in Figma and Storybook.

Product & UX Strategist

2021 – 2022

Hypoport hub SE (shared services arm of listed Hypoport SE) Berlin / Lübeck, Germany · Remote

- With a listed group's executive team, case-by-case support became a service catalog.
- Ran their design-thinking training.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) Berlin, Germany · team across Germany and New York

- Led the UX team across Germany and New York for five years, with two UX designers reporting to me, as a functional peer to product and engineering.
- Defined component behavior and specifications across the design system, down to table column headers and inspector panels, and led its implementation with engineering in Storybook.
- Designed the dense surfaces of a data platform for analysts inside regulated banks: pivot tables, aggregated JSON views, and preview feedback for sampled queries that showed nothing while every matching row was there.
- Took a new collaborative data platform from concept to release.

EARLIER CAREER PROGRESSION

Senior Mentor · CareerFoundry · 2016 – 2026 · Remote · a decade mentoring and coaching designers

AI onboarding, freelance consulting · Ninox Software GmbH · Summer 2025 · prompt-to-database onboarding with the CEO and co-founder; basis for the public AI beta

UX Strategy Lead · Spreadshirt · 2014 – 2016 · Leipzig, Germany · mobile designer prototype reached production

UX Manager · HairDirect · 2013 – 2014 · Lancaster, Pennsylvania · mobile checkout opened the first mobile revenue stream

User Experience Designer · andCulture · 2012 – 2013 · Harrisburg, Pennsylvania

Web Designer & Front-End Developer · HOPE International · 2009 – 2012 · Lancaster, Pennsylvania

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Design strategy and governance

Legacy and modern front ends held coherent on the key journeys · design principles and governance · design system as an API · DTCG design tokens · Style Dictionary · Storybook · Figma Variables · checks in CI

Leading and mentoring designers

Senior Leadership Team · nine reports across four disciplines · hiring, promotions, leveling framework, performance reviews · a decade mentoring designers · distributed teams across Germany and New York

AI with engineering

Agentic prototyping in real code against production APIs · Claude Code · design systems built to hold under AI-assisted work · a production support copilot and an AI fundraising workflow · evaluating AI-enabled design tools and workflows

Mobile and multi-platform

iOS, Android, web and connected TV · adaptive layouts across phone, tablet, desktop and TV · Android/Kotlin and SwiftUI prototypes · web and mobile surfaces specified for engineering to build in React · Figma auto layout

Technical collaboration

Schema-driven front ends that generate their own interfaces · component specifications and token-based naming engineering builds from · design-side sign-off across an external-agency boundary · German native, English C2
