

Tobias Treppmann

Design Lead — designs AI products and builds them, in code, to production
LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/telli LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I design software and I build it. The last year at Bibel TV went into AI running in production, prototypes in real code that an outside engineering agency ships from, and a design system that lives as an API. Before that I led design at Head and Director level for a decade. Berlin-based.

91.8% of my prototype's design-token fields found in the shipped Android build	4 systems live AI support copilot, AI fundraising system, token API, color engine	Berlin resident, no relocation; German native, English C2

EXPERIENCE

Head of Product Design 2025 – Present

Bibel TV (B2C streaming product — iOS, Android, web, connected TV; product managers and product owners in-house, engineering at external agencies) Hamburg + Berlin, Germany

- Real-code prototypes, and an outside engineering agency ships from them. Web first, then native Android in Kotlin and Jetpack Compose. A teardown of the shipped build found 91.8% of my token fields.
- AI support copilot, live in production. Drafts replies to viewer letters in the handbook's wording, with a restricted-topic list in the system prompt and every send decision human.
- AI fundraising ecosystem, built solo. Performance analysis of past letters, a Claude Project that asks clarifying questions before it writes, then a production Claude skill for notifications, banners and video scripts.
- A design system that is an API. Four token tiers, DTCG, Style Dictionary, Storybook as the source of truth; built to serve iOS, Android, web and connected TV from one source.
- The color engine is mine too. K-means extraction in OKLCH drives card gradients and theming, with WCAG contrast held in light and dark. Live.
- Product manager and product owner for the redesign, alongside design. Bibel TV has no in-house design team, so I own UI quality across four platforms with nobody to delegate it to.
- Interviews transcribed in Teams and analyzed with Claude.

Head of Platform and Design 2024 – 2025

ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) Copenhagen, Denmark · Remote from Berlin

- 70% less coordination time, 90% booking acceptance. Scoped as a funeral-booking add-on; I built it into the platform's calendar and form builder, so it also carried room rentals, baptisms and weddings.
- Product manager for the main platform, and all of product design. Wrote the specs, ran the ticket board, and was the main contact for the launch customer.
- Recurring calls with pastors and funeral directors shaped every concept.
- A legal accessibility deadline, met automatically. Churches host their websites on the platform; the capability we shipped let them comply across six countries.

Head of Product Design · Design Consultant, summer 2025 2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) Berlin, Germany

- As a consultant via Oratio&Co in 2025: prompt-to-database onboarding with the CEO and technical co-founder. The schema renders into the editor beside the chat; people edit it directly or keep prompting.
- Chat alone would not work: a schema transcript stops being a conversation, and the first schema is a little off. So the user owns the schema. Basis of the public AI beta.
- Owned the design system and established joint governance with engineering. My component work ships in the app in the stores, including the redesign.
- Research at a scale a team cannot read. Claude over thousands of forum posts for sentiment, pain points and feature requests, with Dovetail as the shared repository.
- Senior Leadership Team; five direct reports including a design lead. Hired two, promoted two.
- Interim Head of Product, July to October 2023.

Product & UX Strategist 2021 – 2022

Hypoport hub SE (shared services arm of listed Hypoport SE) Berlin / Lübeck, Germany · Remote

- Partnered with the executive team to turn case-by-case support into a standard, productized service catalog.

Director of Design 2016 – 2021

Datemeer GmbH (data analytics for top US / CA / UK banks and insurers) Berlin, Germany · team across Germany and NYC

- Five years of data-dense interfaces where being wrong has consequences. Big-data pivot tables, column charts, aggregated JSON views and the sample-based uncertainty problem in query previews.
- Led the design team across Germany and NYC, two UX designers reporting to me.

EARLIER CAREER PROGRESSION

UX Strategy Lead · *Spreadshirt* · 2014 – 2016 · Leipzig, Germany · print-on-demand platform serving hundreds of thousands of consumers

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, Pennsylvania, USA

User Experience Designer · *andCulture* · 2012 – 2013 · Harrisburg, Pennsylvania, USA

Web Designer / Front-End Developer · *HOPE International* · 2009 – 2012 · Lancaster, Pennsylvania, USA · HTML, CSS, JavaScript

Earlier · *Web Designer, Bajaa.com and freelance* · 2000 – 2009 · remote

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

AI in production

Claude Code as the daily method · Claude Projects and skills · prompt architecture and context design · human-in-the-loop by design · structured retrieval over a chunked corpus · LLM evaluation with one judge call per criterion and a closed revision loop

Building in code

Kotlin and Jetpack Compose · SwiftUI · TypeScript, HTML, CSS, JavaScript · React · Astro · real-code prototypes against real APIs, and a custom API where production had none

Design language as a system

DTCG design tokens · Style Dictionary · Storybook · Figma and Figma Variables · OKLCH color and WCAG contrast · custom motion easing curves in the system · app-store identity and assets

Things I built on my own time

aperto.bible: open-source Bible translation tooling with an AI content pipeline and an LLM evaluation harness, designed and directed, implemented with AI coding agents; includes working text-to-speech of scripture and devotionals · Selah: a Mac app on the Mac App Store, designed and built solo
