EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA
Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Design technology

Prototyping in real code against production APIs, with an external agency shipping from that code · DTCG tokens in four tiers, Style Dictionary, live sync to Figma and Android · Storybook as the source of truth

Craft and quality

A color engine live in production, k-means clustering in OKLCH rather than RGB · WCAG contrast validated inside the algorithm · motion carried as custom easing curves

Leading, hiring and critique

Nine reports across four disciplines at Ninox, on the senior leadership team · hired two, promoted two · led the Datameer design team across Germany and NYC for five years · ten years critiquing designers' work at CareerFoundry

Consistency across markets

One product across six countries at ChurchDesk, audited under the EU Accessibility Act · localized across DACH, the UK and the US

ONGOING

Independent Consultant

Oratio&Co

2016 – Present · Remote

Collaborative leadership coaching and product-strategy consulting.

PROFILE

I lead design functions, and the last year went into the layer underneath the craft. At Bibel TV I own UI quality across iOS, Android, web and connected TV. I prototype in real code against real production APIs, with Claude Code, and engineering ships from that code. The build enforces the floor, so review goes to judgment rather than to whether a color is on-system.

AI-native, a year in production

agentic engineering introduced from zero. I prototype with Claude Code against production APIs, and engineering ships from that code

Craft held in the system

a color engine in OKLCH so themes carry even perceptual weight, with WCAG contrast validated inside it, and motion as shared easing curves

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web and connected TV) · Hamburg + Berlin, Germany

- The quality bar, implemented — six checks, identical on a laptop and in CI, so critique spends its time on judgment rather than on compliance.
- Self-serve for the people who did not build it — Storybook as the source of truth, with a prototyping layer on top, so product managers and engineers can find the right component and build with it.
- Modern UI foundations — DTCG tokens in four tiers, Style Dictionary, synced live to Figma and Android. One commit propagates to every platform.
- Craft at the pixel, owned as an algorithm — a color engine in OKLCH rather than RGB, so themes carry even perceptual weight. WCAG contrast validated inside it.
- Just enough structure, from first principles — agentic engineering introduced from zero in an ambiguous, fast-changing brief, and design-system governance run as a working group with an escalation path rather than as a committee.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP — DE / DK / UK / SE / NO / CH) · Copenhagen, Denmark · Remote from Berlin

- Advocating for the right build, through delivery — the internal plan was a standalone add-on module. I delivered an embedded platform capability. 70% less coordination time, 90% acceptance.
- Six markets, one product — I audited our website and also the websites customers build with the platform, so consistency had to hold in output produced by people we never trained.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) · Berlin, Germany

- Two functions at once, nine reports, four disciplines — Product Design and Product held together, July to October 2023. Senior Leadership Team throughout.
- Hired 2, promoted 2 — and ten years reviewing and critiquing designers' work as a senior mentor alongside the day job.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) · Berlin, Germany · team across Germany and NYC

- Led the design team across Germany and NYC for five years — setting the design bar across both sites.
- Component behavior and specs across the library — I defined how components behaved and what they promised. Motion as custom easing curves.

UX Strategy Lead

2014 – 2016

Spreadshirt (international e-commerce, hundreds of thousands of consumers — 200+ people) · Leipzig, Germany

- Shipped what the company had twice failed to ship — a nine-month seller-experience redesign. Leadership wanted a 60-second automated journey; shop owners valued the design step most, and the strategy moved.

EARLIER CAREER PROGRESSION

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · a decade reviewing and critiquing designers' work

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck, Germany

Mentor · *Interaction Design Foundation* · 2020 – 2022 · Remote

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, PA, USA

User Experience Designer · *andCulture* · 2012 – 2013 · Harrisburg, PA, USA

Web Designer & Front-End Developer · *HOPE International* · 2009 – 2012 · Lancaster, PA, USA
