EDUCATION

M.A. Leadership

Kairos University

2022 – 2026

Theological Studies

Theologisches Seminar Rheinland

2003 – 2007

LANGUAGES

German · native

English · C2, fluent

ONGOING

Independent Consultant

Oratio&Co

2016 – Present · Remote

Product and design strategy plus collaborative leadership coaching for non-profits, mission-driven ventures, and religious organisations.

PROFILE

AI enablement operator with 15+ years leading product design and organisational transformation. Shipping production Claude Skills and Claude Projects at Bibel TV, and running a 12-agent MCP-configured stack (openclaw) as personal daily practice. Facilitates workshops for both technical and non-technical audiences at Bibel TV and Hypoport Hub SE.

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (B2C media platform across mobile, web, and connected TV) · Hamburg (2 days/week) + Berlin (Remote), Germany

- Designed, scoped, and shipped an AI Customer-Support Copilot as an MS Copilot skill for the Bibel TV CS team
- CS handbook loaded as runtime context, escalation architected as a first-class output, human keeps the send decision
- Rolled out through a self-testing week followed by 1:1 introductions with the CS team
- Qualitative adoption across the whole team, including the initially most sceptical member
- Built and shipped an AI fundraising ecosystem end-to-end, solo — analysed letter performance, identified seasonality and style patterns separating over- from under-performers
- Encoded the analysis and style guide into a Claude Project with follow-up-question loops — interactive workflow with human clarification before generation, not single-shot
- Built a web prototype for the generation flow
- Shipped a Claude Skill producing content across three surfaces — in-app notifications, web banners, and video scripts
- Introduced agentic engineering as a design practice — web then Android prototypes built in Claude Code, consumed by engineering directly
- Actively evangelising the practice across the team
- Runs the "Designing with and for AI" workshop series (2024 – Present) for designers and engineers
- Covers AI as design partner, designing AI-first interfaces, ethics, user agency, conversational patterns, and AI transparency
- Leads the design-tokens-as-API initiative — Git-based token repo, three-tier hierarchy, synced across Web, iOS, Android, and Figma
- Server-driven UI architecture, architecturally analogous to MCP as shared context
- Personal daily practice: 12-agent MCP-configured stack (openclaw), cron-scheduled, local embeddings, self-hosted
- Claude Code, Claude Projects, Claude Co-work, Claude Skills, and Microsoft Copilot all in production use

Head of Platform and Design

2024 – 2025

ChurchDesk GmbH (European church-management SaaS across DE / DK / UK / SE / NO / CH) · Copenhagen, Denmark · Remote from Berlin

- Mapped the phone-based funeral coordination process with parishes, funeral homes, and cemeteries
- Reframed scope from a single feature into a deeply integrated booking capability
- 70% reduction in coordination time (days to hours), 90% booking acceptance rate, served 20+ cemeteries
- Became a core platform feature beyond the initial Hessen region
- Shipped AI-powered alt-text generation in production for company-wide accessibility compliance in a GDPR+ regulated environment (Protestant + Catholic data-protection frameworks)
- 95% WCAG 2.1 coverage across multi-country localisation (DE / DK / UK / SE / NO / CH)
- Delivered a suite of SME workflow-automation modules (shared inbox, booking requests, case management) to help parish operations digitise remote processes
- Dual PM + design role — direct customer collaboration as main project contact (recurring calls with project leads, pastors, funeral directors)
- Cross-functional alignment in a regulated multi-country environment

Head of Product Design

2023 – 2024

Ninox Software GmbH (AI-powered no-code business platform, DACH / UK / US) · Berlin, Germany

- Designed the AI-powered prompt-to-database onboarding for Ninox's no-code business platform
- Natural-language prompt to generated database schema, rendered into the real data-model editor with chat panel and direct-manipulation surface side by side
- Applied the "show output, allow users to edit" user-agency principle. Shipping to Feb 2026 beta launch
- Collaborated directly with the CEO and technical co-founder in stealth on the prompt-to-database direction, before the initiative was handed to the product team
- Founder-led exploratory project run end-to-end for the founder team
- Established shared governance of the design system as a structured cross-functional working group
- One design lead, one engineering lead, regular meeting rhythm, documented process for escalating component changes to the group
- Senior Leadership Team member at executive level, with 5 ICs plus 1 design lead reporting
- Real performance calls in both directions — hired 1 designer plus 1 writer, let go 1 designer plus 1 writer
- Coached the design lead through a difficult engineering-lead partnership

Product & UX Strategist

2021 – 2022

Hypoport Hub SE (Hypoport Group shared service center; service-to-product transformation) · Berlin, Germany · Remote

- Developed and delivered design-thinking training for executive leadership plus service teams across the Hypoport Group's shared service center
- Audiences included HR, marketing, and other non-designer / non-engineer functions
- Adapted content and facilitation style to each audience — technical vs. non-technical, executive vs. operational
- Productised the internal services of the shared service center — converted case-by-case support into a standardised service catalog
- Partnered with the executive team to revamp services into a scalable service-product organisation
- Worked with IT on ITSM / service-desk implementation — applied Agile methodologies and UX principles to service transformation

Director of Design

2016 – 2021

- Led design for a collaborative data-analytics platform serving top US, Canadian, and UK banks and insurers
- 5-year director tenure leading a team of 3 across Germany and NYC
- Designed data-dense interfaces — column charts, big-data pivot tables, aggregated JSON views, filter logic
- Solved the sample-based-uncertainty UX challenge for big-data query-builder previews
- Established design as a strategic function at director level in a data-analytics enterprise-software context

EARLIER CAREER PROGRESSION

UX Strategy Lead · *Spreadshirt* · 2014 – 2016 · Leipzig, Germany

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, PA, USA

User Experience Designer · *andCulture* · 2012 – 2013 · Harrisburg, PA, USA

Web Designer & Front-End Developer · *HOPE International* · 2009 – 2012 · Lancaster, PA, USA

Web Designer · *Bajaa.com* · 2008 – 2009 · Remote

Freelance Web Designer · 2003 – 2008 · Remote

Web Designer · *Bajaa.com* · 2000 – 2003 · Remote

E-Commerce Assistant · *Westfalia Werkzeugcompany* · 1999 · Hagen, Germany

SKILLS

AI Enablement & Adoption

Claude Enterprise fluency (Skills, Projects, Code, Co-work) · MCP server configuration · Prompt engineering with follow-up-question loops · Human-in-the-loop AI workflows · Escalation-as-first-class-output design

Workshop Facilitation & Enablement Practice

Workshops for technical and non-technical audiences · "Designing with and for AI" series · Curriculum design · 1:1 AI tooling onboarding · Long-term mentoring (CareerFoundry, IxDF)

AI Product Design

Production AI shipping (Copilot skill, Claude Project, AI alt-text) · Agentic engineering with Claude Code · Design-system-as-API (Style Dictionary, multi-platform sync) · Prompt-to-database patterns

Process Mapping & Requirements Translation

Process mapping in regulated contexts · Cross-functional requirements elicitation · Build-vs-buy analysis · UX-maturity assessment

Change Management & Organisational Transformation

Design-system governance as cross-functional guild · Founder-team stealth engagement · Cross-functional AI-tool rollout · Executive workshop facilitation · Multi-country localisation

Technical Foundation (Self-Taught)

HTML · CSS · TypeScript · SwiftUI · Git · Claude Code · Cursor · Zed · n8n · GitHub Actions · macOS · Figma · Style Dictionary · Tokens Studio · MS Copilot · MCP
