PROFILE

15+ years in UX and adjacent disciplines, leading design teams since 2016, and I still ship. At Ninox I led five designers and writers, then two functions with nine reports; at Datameer, UX across Germany and New York for five years. Today I prototype a consumer streaming app in real code, and I helped drive Bibel TV's AI transformation.

Nine reports

four disciplines across two functions at Ninox, from the Senior Leadership Team

5,000 sellers

Spreadshirt marketplace, hundreds of thousands of buyers — research changed product strategy

AI shipped, both ways

production copilot and fundraising workflow; agentic prototyping across the team

EXPERIENCE

Head of Product Design

2025 - Present

Bibel TV (broadcaster in linear-to-streaming transformation — consumer app on iOS, Android, web and connected TV) Hamburg + Berlin, Germany

- Lead product design for a consumer streaming app across four platforms. I also hold product management and product ownership for the redesign, and final design-side sign-off toward external engineering.
- Prototype in real code against production APIs, web first, then Android, where most of the users are. External engineering ships from that code.
- Helped drive Bibel TV's AI transformation. I introduced agentic prototyping across the team and shipped a human-operated support copilot and an end-to-end AI fundraising workflow.
- Built a platform-agnostic design-token API in four tiers, with Storybook and automated checks, so product managers build with the system self-serve and the standard holds.
- Validate with usage data and conversion analysis in Looker Studio; new features are tested against the existing version before they replace it.

Head of Platform and Design

2024 - 2025

ChurchDesk (vertical SaaS platform — web, iOS and Android across six European markets) Copenhagen, Denmark · Remote from Berlin

- Held product management and all product design for the main platform across six European markets. I wrote the specifications, ran the engineering ticket board and was the launch customer's main contact.
- Shipped a booking capability for web and mobile that cut coordination time 70% and reached 90% acceptance at the launch customer, then rolled it out to the whole customer base.
- Designed through recurring validation with three stakeholder groups: the client project lead, pastors and funeral directors.
- Shipped the capability that let customers meet the European Accessibility Act automatically on the websites the platform hosts for them.

Head of Product Design · Interim Head of Product

2023 - 2024

Ninox Software GmbH (no-code business platform — DACH, UK and US) Berlin, Germany

- Led five product-design and UX-writing reports, including a design lead, as a member of the Senior Leadership Team.
- Led two functions at once for four months: nine reports across product management, data science, product design and UX writing.
- Hired two, promoted two. I wrote the team's levelling framework and used it for growth plans, performance reviews and a lean 360 workshop.
- Owned the design system and established joint governance with engineering. The component work ships in the iOS and Android app.
- Owned capacity, allocation, prioritization, team structure and processes.

Product & UX Strategist

2021 - 2022

Hypoport hub SE (shared services arm of listed Hypoport SE) Berlin / Lübeck, Germany · Remote

- Partnered with executive leadership on a service-to-product transformation through recurring workshops with department heads, alongside design-thinking training for executives and service teams.

Director of Design

2016 - 2021

Datameer GmbH (data analytics for leading US, Canadian and UK banks and insurers) Berlin, Germany · team across Germany and New York

- Led the UX team across Germany and New York for five years, with two UX designers reporting to me, as a functional peer to product and engineering.
- Opened research access inside regulated banks and insurers through iterative participant screening on UserTesting.com; research reached roadmap conversations.
- Led design and research from concept to release for a new collaborative data platform.
- Defined component behavior and specs for the co-built design system in Storybook and Figma Variables.

UX Strategy Lead

2014 - 2016

Spreadshirt (print-on-demand marketplace — ~5,000 business sellers and hundreds of thousands of consumers) Leipzig, Germany

- Led the nine-month seller-experience redesign after two earlier attempts had failed.
- Changed product strategy with a persuasive user narrative and research rigor. Shop-owner interviews and a mobile prototype showed design control mattered more than speed; leadership moved from a 60-second automated journey to controlled automation.
- The mobile designer prototype shipped to production after resoundingly positive user feedback.

EARLIER CAREER PROGRESSION

Independent Consultant · Oratio&Co · 2016 - Present · Remote · designed Ninox's prompt-to-database AI onboarding in summer 2025, the basis for its public AI beta

Senior Mentor · CareerFoundry · 2016 - 2026 · Remote · a decade mentoring and coaching designers

UX Manager · HairDirect · 2013 - 2014 · Lancaster, Pennsylvania · mobile checkout redesign enabled the company's first mobile revenue stream

User Experience Designer · andCulture · 2012 - 2013 · Harrisburg, Pennsylvania

Web Designer & Front-End Developer · HOPE International · 2009 - 2012 · Lancaster, Pennsylvania

Earlier · Freelance and in-house web design · 2000 - 2009 · Germany and the United States

EDUCATION

M.A. Leadership (degree completed)

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Leading and developing designers

Managing and mentoring product designers and UX writers · representing user needs to interdisciplinary teams · hiring and promotions · levelling framework · performance reviews and growth plans · feedback on concept development · a decade of mentoring and coaching

User research and validation

Strong user focus · user interviews · usability testing · iterative participant screening · data analysis and conversion analysis · testing new features against the existing version · research synthesis with Claude · Dovetail · UserTesting.com

UX excellence on a solid UI foundation

Figma and auto-layout · interaction design · visual UI design across light and dark modes · web and mobile apps on iOS and Android · connected TV · accessible behavior · real-code prototypes

Design systems and pattern libraries

DTCG design tokens · four-tier token API · Storybook · Figma Variables · Style Dictionary · joint governance with engineering · automated checks in CI

AI in product and in practice

Agentic engineering with Claude Code · production support copilot · AI fundraising workflow · prompt-to-database onboarding · LLM-safe design system · AI-assisted research synthesis

Process and languages

Prioritization and capacity across multiple workstreams · agile delivery with product and engineering · Senior Leadership Team · distributed teams · German native · English C2
