PROFILE

I take a problem to something real and testable fast: prototypes in real code against real APIs, put in front of users as a working app, with engineering shipping from that code. AI runs in production in my work rather than in a deck. Nine-plus years of B2B SaaS on the dense interfaces people run a business inside.

91.8%

of my design-token fields verified in the shipped Android build, field by field

70% / 90%

less coordination time, and acceptance, at the ChurchDesk booking launch customer

Claude Code daily

prototypes to a native Kotlin app; engineering ships from that code

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) Hamburg + Berlin, Germany

- Working prototypes, not static screens. The app redesign prototyped in Claude Code against real data, then as a native Kotlin and Jetpack Compose app with custom APIs.
- Users and stakeholders test the running app, not a presentation.
- Engineering ships from that code. The agency sits outside the company. A teardown of the shipped Android build found 91.8% of my design-token fields and 94% of the Kotlin token model.
- Direction by hand, AI after. Market research and design exploration in Figma and FigJam set the direction; Claude Code came in once it was decided.
- Product manager and product owner for the redesign, alongside design. I write and prioritize the tickets engineering works from and check features in beta and production.
- Evidence sets direction. A concept survey of 264 users chose light over the industry's dark default, and new features are tested against the existing version.
- AI in production. A support copilot drafting in the handbook's wording with every send decision human, and an AI fundraising ecosystem built solo, end to end.
- Design system as an API. Platform-agnostic tokens in four tiers and Storybook as the source of truth, so product managers prototype against the real components.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) Copenhagen, Denmark · Remote from Berlin

- Product management for the main platform alongside all product design.
- Built booking into the platform, not beside it. Inherited as a standalone add-on, delivered inside the existing calendar and form builder, so the same build carried room rentals, baptisms and weddings.
- Complex rules, two months. Availability rules, buffer times, 20+ cemeteries and multiple Outlook calendars resolved before a slot shows. 70% less coordination time and 90% acceptance at the launch customer.
- Mapped the phone-based process with the parish team, then validated with pastors and funeral directors as the design firmed up. Claude over service tickets and HubSpot for the trends underneath.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) Berlin, Germany

- Owned the design system and established joint governance with engineering. Components that ship in the Ninox app, including the redesign of the editor and core interface.
- Claude over thousands of forum posts, Dovetail as the shared repository.
- AI as a native part of a B2B product. In summer 2025, as a consultant, designed Ninox's prompt-to-database onboarding with the founders. The generated schema renders into the real editor beside the chat.

Product & UX Strategist

2021 – 2022

Hypoport hub SE (shared services arm of listed Hypoport SE) Berlin / Lübeck, Germany · Remote

- Facilitated recurring workshops with department heads and executives, driving alignment and moving decisions forward as the organization shifted from case-by-case support to a productized standard catalog.
- Design-thinking training for executive leadership and service teams; primary stakeholder contact, presenting to executives.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) Berlin, Germany · team across Germany and NYC

- Five years of data-dense B2B interfaces: pivot tables, JSON views, filter logic.
- The preview that had to be honest. Query-builder previews ran on samples and could show nothing while the data was there, so I designed the feedback that said so.
- Reached users inside regulated banks through iterative usertesting.com screening across Germany and NYC.

UX Strategy Lead

2014 – 2016

Spreadshirt (print-on-demand platform — about 5,000 business users on the seller side) Leipzig, Germany

- Research that changed the strategy. Interviews with shop owners overturned the executive assumption of a 60-second automated journey, and a mobile designer prototype went to production.
- Led a nine-month seller-experience redesign after two earlier attempts had failed.

EARLIER CAREER PROGRESSION

Design Consultant · *Ninox Software GmbH* · Summer 2025 · prompt-to-database AI onboarding with the founders

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · a decade mentoring and coaching designers

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, Pennsylvania, USA · mobile checkout redesign that opened the company's first mobile revenue

Earlier · *UX Designer, Web Designer and Front-End Developer* · 2009 – 2013 · Pennsylvania, USA

EDUCATION

M.A. Leadership
Kairos University, South Dakota, USA
Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

AI-first design and prototyping

Claude Code daily · prototypes in real code against real APIs that engineering ships from · Kotlin and Jetpack Compose, SwiftUI, React, web · Claude skills and projects in production · AI synthesis above roughly 200 data points, direct reading below it

Figma and design systems

Figma, auto-layout, Dev Mode, Variables and prototyping · DTCG tokens, Style Dictionary, Storybook · a design system owned at Ninox and run as a platform-agnostic API at Bibel TV

Research and evidence

User and stakeholder interviews · concept surveys · usertesting.com screening in regulated industries · testing against the existing version · Dovetail · Claude over thousands of posts and tickets

Product ownership and B2B craft

Specs, roadmap and the ticket board · workshops with executives and department heads · nine-plus years of B2B SaaS · Agile and Scrum teams · German native, English C2
