

Tobias Treppmann

Head of UX/UI — e-commerce UX that opened new revenue, backed by a team led with the instruments to prove it

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/pammys LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I lead digital design systems and teams so quality and speed aren't a trade-off — my current system for a four-platform product is enforced by CI, not review. At Ninox I led five designers and writers with a clear, developed levelling framework, hired and promoted from it. At ChurchDesk one build cut coordination time 70% company-wide.

First mobile revenue

HairDirect mobile checkout redesign, from forecast to executive buy-in to launch

5 reports, 2 promoted

at Ninox, on a levelling framework I wrote

70% / 90%

ChurchDesk coordination-time cut and booking acceptance

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) Hamburg + Berlin, Germany

- One system, held for speed and quality at once. A token API in four tiers with Storybook as the source of truth, and six CI checks that reject anything off-system.
- Verified in the shipped app, not just the design files. A build teardown found 91.8% of my design-token fields and 94% of the core Kotlin model.
- No in-house design team, so I hold UI and UX quality across iOS, Android, web and connected TV myself.
- Color that holds across artwork it has never seen. An engine with perceptual extraction, OKLCH and WCAG contrast held in light and dark.
- Prototyped natively, where the users are. Claude Code against real data first, then Kotlin and Jetpack Compose because Android is the largest part of the userbase. Engineering ships from that code.
- Direction from data, not habit. A concept survey set the light-mode direction against the industry's dark default. New features are tested against the existing version.
- Adaptive layouts, phone to TV. Phone, tablet including iPad, desktop web, connected TV.
- AI in production. A support copilot and an AI fundraising ecosystem built solo, end to end.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) Copenhagen, Denmark · Remote from Berlin

- Built into the platform, not beside it. Inherited as a standalone add-on, delivered inside the existing calendar and form builder so one build served room rentals, baptisms and funerals.
- 70% less coordination time, 90% booking acceptance at the launch customer, after which the module rolled out to every customer as a general capability.
- Product management for the main platform alongside all product design, with one designer reporting to me.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) Berlin, Germany

- Five direct reports including a design lead, half product design and half UX writing, on the Senior Leadership Team. Four months as interim Head of Product added four more, nine total.
- A levelling framework I wrote, covering design and UX writing, used for growth plans; two promotions made on it, two hired.
- Owned the design system and established joint governance with engineering.
- Consistency spent where it counts. Redesigned the editor and core interface, aligned the older admin surfaces on color and buttons, and kept the key journeys free of visual breaks.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) Berlin, Germany · team across Germany and NYC

- Led the design team across Germany and NYC for five years, two UX designers reporting to me.
- Defined component behavior and specs across the design system.

UX Strategy Lead

2014 – 2016

Spreadshirt (international print-on-demand e-commerce platform — hundreds of thousands of consumers) Leipzig, Germany

- A mobile prototype that changed the strategy. Led the mobile t-shirt designer prototype; users' feedback was resoundingly positive and it went to production.
- Led a nine-month seller-experience redesign after two earlier attempts had failed, tested against the existing app.
- Reversed an executive assumption. Shop-owner interviews turned a planned fully automated journey into a controlled-automation design that shipped instead.

UX Manager

2013 – 2014

HairDirect (consumer e-commerce, hair replacement products) Lancaster, Pennsylvania, USA

- Forecast a mobile gap 18–24 months ahead of when it would have hit the business, using usage data against national averages to win executive buy-in.
- Led the mobile checkout redesign that opened the company's first mobile revenue stream.

EARLIER CAREER PROGRESSION

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin and Lübeck, remote · productized a shared-service organization for the executive team

Indie developer · *Selah – Mindful Transitions, Mac App Store* · 2024 – present · designed, built and shipped solo

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · a decade mentoring and coaching designers

Earlier · *UX Designer, Web Designer and Front-End Developer* · 2009 – 2013 · Pennsylvania, USA

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA
Completed 2026

Theological Studies

Theologisches Seminar Rheinland
2003 – 2007

LANGUAGES

German · native

English · C2, fluent

SKILLS

Design systems as digital infrastructure

DTCG tokens in four tiers · Style Dictionary · Storybook as the source of truth · CI enforcement so the standard holds mechanically · Figma and Figma Variables (Expert) · an OKLCH color engine with strong WCAG contrast held in light and dark

E-commerce and customer journey

International e-commerce (Spreadshirt) · mobile checkout redesign for customers (HairDirect) · mobile-first design across four companies · a clear, developed understanding of customer-journey research translated into shipped design decisions

Data-informed design

A/B-tested features shipped at two companies · usertesting.com screening · Google Analytics, Looker Studio, HubSpot hands-on · concept surveys · Claude over thousands of community forum posts for pattern analysis

Direction, outcomes and people

Disciplinary team leadership with a levelling framework, hires and promotions, developed together with each report · Senior Leadership Team membership · commercial-systems decisions with measured business impact · working closely with Creative, Product, Engineering and executives · German native, English C2
