PROFILE

I lead product design teams in B2B software built for people who are trying to get work done, and I still build. At Ninox I ran five designers and UX writers from the senior leadership team, wrote the levelling framework they grew against, and held Product as well for four months. At Bibel TV, engineering ships from my prototype code.

Five reports, two crafts

product design and UX writing at Ninox, grown against a levelling framework I wrote

Founder-level design

AI onboarding designed directly with Ninox's CEO and technical co-founder

70% / 90%

less coordination time and booking acceptance, rolled out to the whole customer base

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) Hamburg + Berlin, Germany

- Product manager, product owner and Head of Product Design for the app redesign.
- Speed, quality and consistency held by the system. A four-tier token architecture built to serve iOS, Android, web and connected TV from one source; checks in CI refuse work that leaves it.
- I prototype in real code against production APIs, and engineers ship from that code — across a company boundary.
- A support copilot in production: drafts in the handbook's wording, every send decision human. Complex letters take minutes rather than hours; temp staff write in the company voice from day one.
- Decisions from data: conversion and usage analysis, new features tested against the existing version, interviews transcribed and analyzed with Claude.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) Copenhagen, Denmark · based in Berlin

- Product management for the main platform alongside all product design. Wrote the specs and ran the ticket board engineering worked from.
- Booking built into the platform's calendar and form builder, not a separate module, so one build carried room rentals, baptisms and weddings for every customer. 70% less coordination time, 90% acceptance.
- Customers met a legal accessibility deadline automatically on the websites the platform hosts for them, across six countries.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform for SMEs building their own ERP and document-based processes — DACH / UK / US) Berlin, Germany

- Five direct reports across product design and UX writing, including a design lead.
- Senior Leadership Team member.
- Wrote the levelling framework for both crafts and used it for growth plans. Ran performance reviews, designed a lean 360 workshop. Hired two; promoted two against that framework.
- Two functions, nine reports, four disciplines. Interim Head of Product, July to October 2023: three product managers and a data scientist alongside the design team. Hired my own successor.
- Owned capacity, allocation, prioritization, team structure and processes for the design function.
- Owned the design system and established joint governance with engineering. Consistency spent on the key journeys: the editor and core interface redesigned, older admin surfaces aligned rather than rebuilt.
- Research synthesized at scale: Dovetail as the shared repository, Claude across thousands of forum posts for sentiment, recurring pain points and feature requests.

Product & UX Strategist

2021 – 2022

Hypoport hub SE (shared services arm of listed Hypoport SE) Berlin / Lübeck, Germany · remote

- Partnered with the executive team to turn case-by-case support into standardized, productized services, through recurring workshops and reviews with department heads.
- Simplified design methods for non-expert audiences: design-thinking training for executive leadership and service teams.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) Berlin, Germany · team across Germany and NYC

- Led the design team across Germany and NYC for five years, two UX designers reporting to me, as a functional head trading scope with product and engineering counterparts.
- Research inside banks and insurers that make users hard to reach. Iterative usertesting.com screening reached the analysts; research got executive backing and design entered roadmap conversations.

EARLIER CAREER PROGRESSION

Design Consultant · *Ninox Software GmbH, via Oratio&Co* · Summer 2025 · freelance · AI onboarding, designed with the CEO and technical co-founder

Senior Mentor · *CareerFoundry* · 2016 – 2026 · remote · a decade mentoring and coaching designers

UX Strategy Lead · *Spreadshirt* · 2014 – 2016 · Leipzig, Germany · 200+ people · research that reversed an executive assumption

UX Manager · UX Designer · Web Developer · *HairDirect, andCulture, HOPE International* · 2009 – 2014 · Pennsylvania, USA

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Leading product design teams

Five direct reports across product design and UX writing · a levelling framework, growth plans, performance reviews and a lean 360 workshop · hiring and promotion · Senior Leadership Team · capacity, allocation and prioritization

Executive partnership

Design work directly with a CEO and technical co-founder · executive-team partnership and design-thinking training for executive leadership at Hypoport hub SE · research that reversed an executive product assumption at Spreadshirt · Holacracy governance meetings

Research and evidence

usertesting.com screening for hard-to-reach professional users · Dovetail as a shared repository · Claude across thousands of posts and transcribed interviews · conversion and usage analysis · features tested against the existing version

Systems, craft and AI

Design system as an API — DTCG tokens in four tiers, Storybook, checks in CI · Figma, auto layout and variables · prototypes in real code with Claude Code, shipped by engineering · a support copilot in production · German native, English C2
