PROFILE

I turn team-specific workflows into AI-enabled tools and repeatable ways of working. My work combines product judgment, agentic implementation, technical facilitation, and adoption with nontechnical teams. At Bibel TV, I introduced a production support Copilot, operate an active n8n content pipeline, and helped establish Claude for the product team.

Minutes, not hours
complex support correspondence after Copilot introduction

11,405 clips
active n8n pipeline output from 3,504 videos in October 2026

70% / 90%
less coordination time and launch acceptance after workflow redesign

EXPERIENCE

Head of Product Design
2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) *Hamburg + Berlin, Germany*

- Introduced a Microsoft Copilot workflow for viewer services. Designed the platform-configured skill around the team handbook, house voice, scope rules, and restricted topics.
- Earned adoption through practical coaching. Ran an optional self-test week and individual sessions. Complex letters fell from hours to minutes; temporary staff worked on-brand immediately; two skeptical colleagues returned voluntarily.
- Created and operate an active n8n pipeline with AI agents. It connects APIs, Postgres, transcript processing, AI extraction, embeddings, and scheduling. October 2026: 11,405 source-linked clips from 3,504 videos.
- Hardened the workflow through live execution. Worked through an execution-order race and a broken node reference with the coding agent, then re-verified the transcription path end to end.
- Built Bibel TV's fundraising system solo: performance analysis, prompt architecture, guided web prototype, and a Claude skill for coordinated in-app, web, and video content.
- Helped establish Claude for the product team. Contributed MCPs, team guidelines, access and token-plan management, and prototyping setups.
- Own “Bibel erklärt” (working title), a conversational AI Bible-study application in development, across product management, design, development, onboarding, and retrieval workflows.

Independent AI Product Builder & Consultant
2025 – Present

Oratio&Co / Treppmann Studio *Berlin, Germany · Remote*

- Led a focused AI workshop series in English for team leads at a Polish web agency, helping them use AI in design and prototyping through two to three small-group sessions.
- Designed and agentically engineered Selah – Mindful Transitions, an independent macOS product shipped on the Mac App Store.

Senior Mentor
2016 – 2026

CareerFoundry (online career-change education) *Remote*

- Spent a decade mentoring and coaching aspiring product designers through individual career transitions into UX.
- Reviewed portfolios and project work.

Head of Platform and Design
2024 – 2025

ChurchDesk (vertical SaaS for churches and dioceses — DE / DK / UK / SE / NO / CH) *Copenhagen, Denmark · Remote from Berlin*

- Turned phone-based funeral coordination into a reusable workflow capability. Embedded booking in the calendar and form builder. It cut coordination time 70%, reached 90% acceptance, and rolled out company-wide.
- Led product management and design with one report. Owned the platform specification, ticket board, and primary client relationship.

Head of Product Design
2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) *Berlin, Germany*

- Established cross-functional design-system governance. Set a regular working rhythm, ownership, and escalation path with product design and engineering.
- Senior Leadership Team member with five direct reports; hired two and promoted two. Served as interim Head of Product with nine reports across product, design, data, and UX writing.
- Returned as an independent AI product consultant. Worked with the CEO and technical co-founder on prompt-to-application onboarding that became the basis for the public Ninox AI beta.

Product & UX Strategist

2021 – 2022

Hypoport hub SE (shared-services arm of listed Hypoport SE) *Berlin / Lübeck, Germany · Remote*

- Helped transform bespoke internal services into standardized offers. Recurring workshops and reviews with department heads moved case-by-case support toward a scalable service catalog.
- Delivered executive training and cross-functional workshops for service teams including HR and Marketing while supporting organizational change.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for regulated banks and insurers) *Berlin, Germany · team across Germany and NYC*

- Moved design and research into strategic product decisions as the company pursued a new product opportunity, securing executive support for user research and increasing design's role in roadmap conversations.
- Led the design team across Germany and NYC, with two UX designers reporting directly and responsibility for priorities, quality, mentoring, and distributed collaboration.
- Designed regulated analytics workflows for banks and insurers.

EARLIER CAREER PROGRESSION

UX Strategy Lead · *Spreadshirt* · 2014 – 2016 · Leipzig, Germany · international e-commerce

Web Developer / UX Designer · *HOPE International / andCulture* · 2009 – 2013 · Pennsylvania, USA · HTML, CSS, JavaScript, and client work

EDUCATION

M.A. Leadership
Kairos University, South Dakota, USA
Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Internal AI enablement

Technical workshops · individual coaching · nontechnical-team adoption · workflow discovery · opportunity prioritization · reusable assets · executive facilitation

Applied AI & automation

n8n workflow operations · Claude · MCP · Microsoft Copilot · agentic engineering · API integration · Postgres · prompt architecture · embeddings

Product & change leadership

Product ownership · product strategy · product management · cross-functional requirements · build-versus-reuse judgment · change leadership · startup and scale-up experience

Responsible delivery

Human authority over consequential outputs · explicit scope rules · editable AI output · accessibility · privacy-sensitive product work
