

Tobias Treppmann

Target role: Senior AI Product Designer · human control, AI-native workflows, design systems

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/recare LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

Senior AI product designer and design leader based in Berlin. I design AI interactions around human judgment. At Ninox, generated output stays editable. At Bibel TV, every support-skill send decision stays human, and I own a Conversational AI Bible Study App across product, design and agentic development.

Human control

generated output stays visible, editable and reviewable

805 source-linked clips

live-tested n8n pipeline for an AI Bible-study retrieval layer

+ 153% weekly starts

AI feature entry point redesigned
· iOS · +85% Android

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (consumer streaming across iOS, Android, web and connected TV) Hamburg + Berlin, Germany

- Lead product design and product management for Bibel TV's streaming experience across iOS, Android, web and connected TV, with ownership of the current app redesign.
- Currently designing and developing a Conversational AI Bible Study App. I own product direction, interface and agentic development; a structured onboarding is in progress.
- Built and live-tested its n8n content pipeline. It turns sermon transcripts into source-linked Bible clips, chapters and retrieval material; a dated corpus snapshot contained 805 clips from 299 transcribed videos.
- Designed and shipped a manually operated MS Copilot skill for viewer support. It drafts in the team's handbook voice while staff review, edit and send every response.
- Built an AI-assisted fundraising workflow end to end: performance analysis, follow-up-question loops, a web prototype and a production skill for in-app, web and video content.
- The AI feature whose entry point I redesigned more than doubled weekly starts: +153% on iOS and +85% on Android (GA4 four-week averages).
- Built one design-system source for four platforms. A token API and shared principles keep product decisions coherent across web, mobile and connected TV.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical SaaS for churches and dioceses across six European markets) Copenhagen · Remote from Berlin

- Led product and design for the platform.
- Turned a multi-party funeral workflow into a reusable booking capability inside the calendar and form builder: 70% less coordination time and 90% acceptance at launch, then a customer-base rollout.
- Shipped an AI-assisted accessibility capability that helped customers meet the European Accessibility Act deadline automatically on websites built and hosted with ChurchDesk.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform) Berlin, Germany

- Senior Leadership Team; five direct reports across product design and UX writing. Built levelling and growth structures, ran reviews, hired two and promoted two.
- Owned the design system with engineering.
- Designed prompt-to-database AI onboarding with the CEO and technical co-founder. The generated schema renders in the real editor beside chat so users can inspect and change what the model made.
- Analyzed thousands of community posts with Claude to identify recurring needs at a scale the team could not review manually.

Director of Design

Datameer GmbH (enterprise data analytics)

Berlin · team across Germany and NYC

2016 – 2021

• Led UX across Germany and New York, with two UX designers reporting to me. Represented UX with product and engineering during a new-product pivot.

• Designed data-dense analytics interfaces for regulated banks and insurers, including query builders, pivot tables, aggregated JSON views and sample-based result states.

• Made restricted-customer research possible; secured executive support.

INDEPENDENT PRODUCT & CONSULTING PRACTICE

Independent product and consulting work alongside employed roles since 2016.

Stealth speech-therapy app concept

2025

Assessed the concept, validated technical and product feasibility, set UX direction and built a prototype as a potential freelance co-founder; did not join the company.

Selah – Mindful Transitions

2024 – Present

Designed and agentially engineered the Mac app end to end, authored production pull requests and shipped it on the Mac App Store.

EARLIER CAREER PROGRESSION

Product & UX Strategist · Hypoport hub SE · 2021 – 2022 · Berlin / Lübeck · productized shared services with executive stakeholders

UX Strategy Lead · Spreadshirt · 2014 – 2016 · Leipzig · marketplace research with business sellers and consumer-scale product work

UX Manager · HairDirect · 2013 – 2014 · Pennsylvania, USA · mobile commerce and customer research

Earlier · UX Designer, Web Designer & Front-End Developer · 2009 – 2013 · Pennsylvania, USA · responsive web, front end and ecommerce

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

AI product design

Concrete interaction design for non-deterministic AI · human-in-the-loop controls · agent state and uncertainty · conversational UX · editable generated output · error recovery

AI-native delivery

Claude Code as a daily method · active n8n workflows · production MS Copilot skill · Claude Projects and skills · real APIs · agentially engineered SwiftUI, Kotlin and React prototypes

Product design and research

0-to-1 discovery through delivery · consumer and B2B workflows · usability testing · interviews · surveys · GA4 and Looker Studio · AI-assisted synthesis

Systems and leadership

Design systems · DTCG tokens · Style Dictionary · Storybook · Figma Variables · cross-functional product direction · critique · coaching and mentoring

Product judgment

High agency across product boundaries · strong judgment under pressure · evidence over attachment · cross-functional product and technical direction

Languages and base

German native · English C2 · Berlin-based · German/EU work authorization
