PROFILE

I design the visual layer of consumer apps as a system, and AI features for people who don't know what to type. At Bibel TV I chose the redesigned app's typefaces and built the color engine that themes every page from its artwork. On my own I designed Selah, a Mac app on the App Store.

Color engine, live	light and dark themes from each artwork, dark panels held at lightness 0.25–0.27
Diagramm + Inter	one typeface pairing on Android, iOS and web, replacing Roboto and SF (in beta)
Selah for macOS	designed the app, its icon and App Store screenshots; on the Mac App Store

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (streaming apps on iOS, Android, web and connected TV) *Hamburg + Berlin, Germany*

- One type pairing across platforms. For the redesigned app (in beta) I chose Diagramm from the on-air brand and Inter for small UI text, replacing Roboto and SF.
- Led the light-first redesign of Home, series and episode pages (6.0, in beta), each tinted from its artwork, peach in light mode and deep green in dark. Before/after screens in the portfolio.
- Built a live OKLCH color engine that computes a light and dark theme from each artwork. On 14 measured artworks, every dark panel sat at lightness 0.25–0.27.
- Hands-on UI design for phone, tablet, desktop web and connected TV, with final design sign-off. A verse hero card sizes its own text so the whole verse always fits.
- Redesigned the AI Bible feature entry with an input-styled field and five example prompts. Weekly starts: 205 → 518 on iOS, 655 → 1,213 on Android (four-week averages).
- Four-tier token system served as an API (primitives → semantic → component → page/view), read by Android, web, Figma, iOS and connected TV.
- Built a design system product managers can prototype with in Claude, with Storybook as the source of truth and checks in CI that refuse off-system values.
- Engineering builds from my prototype code: 64% of the redesigned Android Home and detail views (release 6.0, in beta) comes verbatim from it.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical SaaS for churches across six European markets) *Copenhagen, Denmark · Remote from Berlin*

- Designed funeral booking for web and mobile in Figma with my designer: booking pages and the priest's calendar, built into the platform and shipped to the whole customer base.
- Handoff engineering could build from: component specifications, token-based naming and redlined measurements in plain text.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform across DACH, the UK and the US) *Berlin, Germany*

- Owned the design system across Storybook and Figma Variables, and established joint governance with Engineering.
- Designed the App Store screenshots for iOS and Android during the UI refresh.
- Led a team of five across product design and UX writing; hired two and promoted two. Senior Leadership Team member.

Director of Design

2016 – 2021

Datameer GmbH (enterprise data analytics for regulated banks and insurers) *Berlin · team across Germany and New York*

- Designed data-dense analytical interfaces: query builders, big-data pivot tables, filter logic and sample-based uncertainty states.
- Defined component behavior and implementation specifications with Engineering for the co-built design system.

UX Strategy Lead

2014 – 2016

Spreadshirt (international fashion and print-on-demand marketplace) *Leipzig, Germany*

- Prototyped and user-tested a mobile designer that went into production.

CURRENT PRODUCT PRACTICE

My own Mac app, and freelance product work.

Selah for macOS — Independent product

Designed the Mac app, its icon and its App Store screenshots, and built it myself with AI coding agents. It is on the Mac App Store.

Ninox AI onboarding — Summer 2025

Designed prompt-to-database onboarding that generates into the real data-model editor, where users change what the first schema got wrong. It became the basis for the public AI beta.

EARLIER CAREER PROGRESSION

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck

Independent Product Design Consultant · *Oratio&Co* · 2016 – Present · Remote · product strategy, UX direction, working prototypes and print products

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · one-on-one mentoring of more than 100 career changers into UX design

Web, UX and Product Design · *HOPE International* · *andCulture* · *HairDirect* · 2009 – 2014 · Pennsylvania, USA · web and print design, hand-coded front end

EDUCATION

M.A. Leadership
Kairos University, South Dakota, USA
Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Visual interface design

typography and typeface selection · layout and spacing · color systems in OKLCH with WCAG contrast in light and dark · adaptive layouts for phone, tablet, web and TV · App Store screenshots and app icons

Figma and design systems

Figma Auto Layout · components · Variables · Dev Mode · design tokens · Storybook · UI components · governance with engineering

AI interfaces

example-prompt entry points · AI output people can edit · a conversational AI Bible study app with chat and retrieval, in development · Claude Code daily

Frontend understanding

HTML · CSS · JavaScript · React, Kotlin and SwiftUI prototypes built with AI coding agents · Git and GitHub

Research

interviews · usability testing · concept surveys · GA4 feature analytics, paired with qualitative research
