PROFILE

I'm Bibel TV's only in-house designer, so I design its AI products and build them myself, keeping people in charge of the AI. There I built a conversational AI Bible study app in about two months. Underneath: design systems, and a decade mentoring and coaching designers.

Ninox public AI beta
built on the prompt-to-database onboarding I designed · freelance, summer 2025

64% from my prototype
code behind redesigned Android Home and detail views · release 6.0, in beta

+153% weekly AI starts
redesigned AI feature on iOS · +85% on Android · GA4

EXPERIENCE

Head of Product Design
2025 – Present

Bibel TV (consumer streaming across iOS, Android, web and connected TV) *Hamburg + Berlin, Germany*

- Built a conversational AI Bible study app in about two months (in development): iOS and Android apps, a web sibling, chat and retrieval, and its in-product motion.
- Prototype in working code against production APIs with AI coding agents. 64% of the code behind the redesigned Android Home and detail views (release 6.0, in beta) comes verbatim from my prototype.
- Redesigned the AI Bible-passage feature end to end. Weekly starts rose from 205 to 518 on iOS and 655 to 1,213 on Android (GA4, four full weeks before and after).
- Judged AI output on design intent, not matching numbers. Claude once gave a value the right twelve pixels, wrong token; the checks now hand every value-only match back to a person.
- Built a four-tier design-token system that keeps Android, iOS, web, Figma and connected TV on one source.
- Made the design system usable by product managers and Claude: Storybook as shared reference and checks that refuse off-system values, so the shared quality standard holds without a designer reviewing every screen.
- Built an AI reply assistant for viewer services as a Microsoft Copilot skill and ran its introduction. Staff read each letter, use the draft by choice and decide what gets sent.
- Taught colleagues on the product team to build with AI in individual tutorial sessions, on a shared Claude Code and GitHub setup.

Head of Platform and Design
2024 – 2025

ChurchDesk (vertical SaaS for churches and dioceses across six European markets) *Copenhagen, Denmark · Remote from Berlin*

- Owned product management for the main platform and led all product design.
- Reframed a funeral-booking feature brief as a booking capability built into the platform's calendar and form builder. I tested the click dummy with pastors and funeral directors before the final specification.
- Booking acceptance reached 90%, and the capability shipped to the full customer base. Coordination time fell by an estimated 70%, against the customer's account of hours of calling before.

Head of Product Design · Interim Head of Product
2023 – 2024

Ninox Software GmbH (no-code business platform for SME workflows) *Berlin, Germany*

- Owned and evolved the design system across Storybook, Figma Variables, navigation, modals and searchable multi-select components; established joint governance with Engineering and defined custom easing curves, small animations and transitions.
- Senior Leadership Team member with five direct reports; hired two, promoted two.

Director of Design
2016 – 2021

Datameer GmbH (enterprise data analytics for regulated banks and insurers) *Berlin · team across Germany and New York*

- Designed data-dense analytical interfaces: query builders, pivot tables, filter logic.
- Established user research in a restricted enterprise environment, including in-person sessions with US banking and insurance customers, and brought the evidence into roadmap decisions.
- Led UX across Germany and New York with two UX designers reporting.

UX Strategy Lead

2014 – 2016

Spreadshirt (international print-on-demand marketplace) *Leipzig, Germany*

- Led a nine-month redesign of the seller portal, where shop owners administer their shop and products; research with shop owners changed an automation-first product direction.
- Led the prototype that brought Spreadshirt's t-shirt designer to mobile, built in one intensive week with a UI designer; user feedback was "resoundingly positive" and it moved into production.

SHIPPED TO USERS

Working products I designed or built hands-on, used by real people; case studies in my portfolio.

Ninox AI onboarding — Freelance, summer 2025

Designed prompt-to-database onboarding where the generated database opens in the real editor beside chat, so people change it directly. It became the basis for the public AI beta.

Selah for macOS — Independent product

Designed and agentically engineered a Mac app shipped on the Mac App Store, authoring pull requests that were merged and released to production.

Color engine, Bibel TV — In production

Built an OKLCH engine that derives readable app themes from the cover art of a 10,000+ video catalog, served through a production API.

EARLIER CAREER PROGRESSION

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · service-to-product transformation with the executive team

Independent Product Design Consultant · *Oratio&Co* · 2016 – Present · Remote · product strategy, UX direction and working prototypes

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · mentoring and coaching product designers

Earlier · *UX Manager, UX Designer, Web Designer & Front-End Developer* · 2009 – 2014 · Pennsylvania, USA · e-commerce, product design, HTML, CSS and JavaScript

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Product design

Figma · end-to-end product design lifecycle across web and mobile · problem framing · flows and interaction · B2B dashboards and data-heavy interfaces

AI-first building

Claude Code, ChatGPT and Gemini as daily tools · working prototypes against production APIs · conversational AI · human-in-the-loop AI patterns · editable generated output · agentically engineered React, SwiftUI and Kotlin prototypes

Systems

design systems · design tokens · Style Dictionary · Storybook · Figma Variables · motion and easing · governance with engineering

Research and measurement

user interviews · usability testing · concept surveys · GA4 · Looker Studio · analytics paired with qualitative research

Collaboration and enabling

product and design ownership together · engineering partnership · tutorial sessions · mentoring and coaching designers · hand-written frontend HTML, CSS and JavaScript

Languages and base

German native · English C2 · Berlin-based · German / EU work authorization
