

Tobias Treppmann

Senior Product Manager — product management and product design held together, plus shipped AI work

PROFILE

I hold product management and product design as one job, doing it today at Bibel TV. I have done the same at ChurchDesk and, briefly, as interim Head of Product at Ninox. I ship AI work rather than talk about it — a support copilot, a fundraising pipeline, and a feature redesign that more than doubled iOS usage.

PM + design

held as one job, three times, including today at Bibel TV

+153% / +85%

iOS / Android usage lift after an AI-feature redesign, four-week averages

70% / 90%

coordination time cut, booking acceptance rate — dual-sided booking capability at ChurchDesk

EXPERIENCE

Head of Product Design

2025 - Present

Bibel TV (broadcaster in linear-to-streaming transformation — consumer app on iOS, Android, web and connected TV) Hamburg + Berlin, Germany

- Product manager and product owner for the app redesign, alongside leading product design for the consumer app across four platforms — the redesign is the purpose of the engagement, not a duty attached to it.
- Redesigned an AI feature's entry point, adding a worked-example taxonomy so users could see what it did. Usage rose 153% on iOS and 85% on Android, four-week averages before and after.
- Shipped a production support copilot and an end-to-end AI fundraising pipeline, analysis through prompt engineering to a working prototype, solo.
- Validate with usage data in GA4 and Looker Studio; prototype in real code against production APIs, web first, then Android.
- Built a design-token API so product managers build with the system self-serve.

Head of Platform and Design

2024 - 2025

ChurchDesk (vertical SaaS platform — web, iOS and Android across six European markets) Copenhagen, Denmark · Remote from Berlin

- Held product management for the main platform alongside all product design, across six European markets. I wrote the specifications, ran the engineering ticket board and was the launch customer's main contact.
- Reframed a single-customer, €20k booking brief into a platform capability serving both sides of a two-month delivery — the closest analogue in my record to a dual-sided, revenue-relevant product decision, though not an advertising or monetization one.
- Shipped it in two months, cutting coordination time 70% and reaching 90% acceptance at the launch customer, then rolled it out to the whole customer base.
- Shipped the capability that let customers meet the European Accessibility Act automatically on the websites the platform hosts for them.

Head of Product Design · Interim Head of Product

2023 - 2024

Ninox Software GmbH (no-code business platform — DACH, UK and US) Berlin, Germany

- Led two functions at once for four months — nine reports across product design, UX writing, product management and data science, as a Senior Leadership Team member.
- Hired my own successor as Head of Product, then handed the role over deliberately.
- Owned the design system and established joint governance with engineering; the component work shipped in the iOS and Android app.
- Hired two, promoted two. Wrote the team's levelling framework and used it for growth plans and performance reviews.

Hypoport hub SE (shared services arm of listed Hypoport SE) Berlin / Lübeck, Germany · Remote

- Partnered with executive leadership on a service-to-product transformation through recurring workshops with department heads, alongside design-thinking training for executives and service teams.

Datameer GmbH (data analytics for leading US, Canadian and UK banks and insurers) Berlin, Germany · team across Germany and New York

- Led the UX team across Germany and New York for five years, with two UX designers reporting to me, as a functional peer to product and engineering.
- Opened research access inside regulated banks and insurers via iterative screening on UserTesting.com.

Spreadshirt (print-on-demand marketplace — ~5,000 business sellers and hundreds of thousands of consumers) Leipzig, Germany

- Led the nine-month seller-experience redesign on a dual-sided marketplace, after two earlier attempts had failed.
- Changed product strategy with a persuasive user narrative and research rigor. Shop-owner interviews and a mobile prototype moved leadership from a 60-second automated journey to controlled automation.

EARLIER CAREER PROGRESSION

Independent Consultant · Oratio&Co · 2016 – Present · Remote · designed Ninox's prompt-to-database AI onboarding in summer 2025, the basis for its public AI beta

Senior Mentor · CareerFoundry · 2016 – 2026 · Remote · a decade mentoring and coaching designers

UX Manager · HairDirect · 2013 – 2014 · Lancaster, Pennsylvania · mobile checkout redesign enabled the company's first mobile revenue stream

User Experience Designer · andCulture · 2012 – 2013 · Harrisburg, Pennsylvania

Web Designer & Front-End Developer · HOPE International · 2009 – 2012 · Lancaster, Pennsylvania

Earlier · Freelance and in-house web design · 2000 – 2009 · Germany and the United States

EDUCATION

M.A. Leadership (degree completed)

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Product management and delivery

15+ years across UX and product · Discovery to Delivery ownership · product management and product ownership held with design · roadmap and specs · engineering ticket-board prioritization · agile delivery

Analytical rigor

GA4 and Looker Studio · defining and reading KPIs · shipping into A/B-tested releases · conversion and usage analysis · drawing conclusions from data

Product design and UX craft

A strong track record building successful products across multiple device types · research hypotheses · Figma and real-code prototyping · interaction design across web, iOS, Android and connected TV · communicating outcomes visually

AI in product and in practice

Agentic engineering with Claude Code · production support copilot · AI fundraising pipeline · prompt-to-database onboarding · AI-assisted product discovery

Stakeholder management

Cross-functional and international teams · senior-stakeholder alignment · Senior Leadership Team · matrix organizations · client-facing delivery

Design systems and pattern libraries

DTCG design tokens · Storybook · Figma Variables · Style Dictionary · joint governance with engineering · automated checks in CI
