Tobias Treppmann

AI-native Product & Design Leader for connected platforms

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/deel LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I build design organizations and stay close enough to the work to shape what ships. At Ninox, I led five people and temporarily carried Product across nine people and four disciplines. My current work combines platform architecture with hands-on AI product development: production-API prototypes, live AI and n8n workflows, and a cross-platform token system.

design lead included — operating model, hiring and promotions

Nine people

four disciplines — held Product and Design together

APIs + AI

live workflows connecting design, engineering and operations

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (broadcaster in linear-to-streaming transformation — iOS, Android, web, connected TV) *Hamburg + Berlin, Germany*

- I prototype in real code against production APIs. The external engineering agency ships from that code, keeping product decisions close to the implementation.
- Created a cross-platform design-system API. Four DTCG token tiers and Style Dictionary serve iOS, Android, web and connected TV from one source. Storybook and CI checks keep implementations inside the system.
- Shipped AI into real operating workflows. A human-operated support copilot drafts in the team's handbook language, and an end-to-end fundraising workflow turns performance analysis into guided generation and multi-surface content.
- Built and live-tested n8n workflows for the "Bibel erklärt" product in development. Timed transcripts become source-linked clips, chapters and retrievable material for an AI Bible experience.
- Feature-level usage informs product priorities. Bible use, AI-feature behavior, streaming and live-TV use have shaped decisions including Light Mode, future answer and chat options, and the Sleep Timer.
- Product manager and product owner for the app redesign, alongside design. I write and prioritize the tickets engineering works from and review features in beta and production.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) *Copenhagen, Denmark · Remote from Berlin*

- Turned one customer workflow into reusable platform infrastructure. Building booking into the calendar and form builder carried funerals, room rentals, baptisms and weddings in one capability.
- Designed across administrators, external partners and mobile users. The connected journey spanned ChurchDesk's web platform, external booking pages and pastors' mobile calendars.
- 70% less coordination time and 90% booking acceptance at the launch customer, followed by rollout across the customer base.
- Held product management for the main platform alongside all product design. Roadmap, specifications, the engineering ticket board and the launch-customer relationship.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform — DACH / UK / US) *Berlin, Germany*

- Five direct reports, including a design lead, on the Senior Leadership Team. Owned capacity, allocation, work prioritization, team structure and processes.
- Held Product and Design together for four months: nine people across product design, UX writing, product management and data science.
- Built the organization as well as the product practice. Hired two people, promoted two, ran performance reviews and created the leveling framework for design and UX writing.
- Co-governed the design system with engineering.
- Returned as an independent consultant in 2025 to design AI onboarding with the founders. The generated schema renders into the real data-model editor, where builders can inspect and correct it. This interaction became the basis for the public AI beta.

Product & UX Strategist

2021 – 2022

Hypoport hub SE (shared services arm of listed Hypoport SE) *Berlin / Lübeck, Germany · Remote*

- Partnered with executive leadership to productize internal services. Case-by-case support became a standardized service catalog with repeatable offerings.
- Facilitated design-thinking training and transformation workshops with executives, department heads and service teams.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) *Berlin, Germany · team across Germany and NYC*

- Led the design team across Germany and New York while staying hands-on in data-dense enterprise workflows for analysts and data engineers.
- Helped take a collaborative data platform from concept through release. Research entered executive and roadmap decisions as the company made a new product bet.
- Pioneered iterative usertesting.com screening to reach analysts inside regulated banks and insurers.

UX Strategy Lead

2014 – 2016

Spreadshirt (international seller-consumer platform — 200+ people) *Leipzig, Germany*

- Research changed the platform's product direction. Shop owners valued the design process leadership planned to automate away, shifting the strategy toward controlled automation that preserved user agency.
- A mobile product-designer prototype moved into production, establishing a new surface for a complex creation workflow.

EARLIER CAREER PROGRESSION

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · a decade mentoring and coaching designers

Mentor · *Interaction Design Foundation* · 2020 – 2022 · Remote

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, PA, USA

User Experience Designer · *andCulture* · 2012 – 2013 · Harrisburg, PA, USA

Web Designer & Front-End Developer · *HOPE International* · 2009 – 2012 · Lancaster, PA, USA

Earlier · *Web Designer, Freelance Web Designer, E-Commerce Assistant* · 1999 – 2009 · Düsseldorf and Hagen, Germany

EDUCATION

M.A. Leadership
Kairos University, South Dakota, USA
Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Platform and Developer Experience

No-code builder workflows · API-backed product systems · multi-sided booking across administrators, partners and mobile users · data-dense enterprise products · documentation and onboarding · DTCG, Style Dictionary and Storybook · prototypes against production APIs

AI Products and Workflows

Human-operated support copilot in production · end-to-end AI fundraising workflow · live-tested n8n transcription and virtual-clip pipeline · prompt-to-database AI onboarding · Claude Code and agentic engineering · human-in-the-loop interaction design

Design Organization Leadership

Five direct reports including a design lead · nine people across four disciplines during the interim Product remit · hiring, promotions and performance reviews · capacity, allocation, prioritization, team structure and processes · leveling framework · design-system governance with engineering

Research and Outcomes

Feature-level usage across Bible, AI, streaming and live TV · 70% less coordination time and 90% booking acceptance at ChurchDesk · research-led strategy change at Spreadshirt · iterative usertesting.com screening for analysts inside regulated banks and insurers
