Tobias Treppmann

Senior Product Designer · B2B and consumer products, design systems and AI prototyping

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/cloover LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I design products where complex work and everyday decisions have to feel clear. My work spans operational B2B software, consumer products, multi-platform design systems and working prototypes against real APIs. I combine current hands-on craft with the product judgment, mentoring and cross-functional leadership developed in Head and Director roles.

B2B + consumer

complex workflows and everyday decisions

Working prototypes

real interfaces connected to real APIs

Systems to ship

tokens, components and engineering governance

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (consumer streaming across iOS, Android, web and connected TV) *Hamburg + Berlin, Germany*

- Lead product design and product management across Bibel TV's streaming products: research and test concepts with viewers, then carry the evidence into interaction and visual design, delivery specifications and implementation review.
- Design the current app across mobile, tablet and connected TV.
- Built a four-tier design-token system from a hard-coded starting point. A Git repository, Style Dictionary builds in CI and a served API keep Android, web and Figma on one source.
- Built an OKLCH color engine and Color Lab that turn program artwork into readable light and dark themes with programmatic contrast checks.
- Prototype new product concepts in working code against production APIs. External engineering uses the web and Android prototypes as implementation input.
- Designed and shipped a human-operated MS Copilot workflow for viewer support; staff review, edit and send every AI-drafted response.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical SaaS for churches and dioceses across six European markets) *Copenhagen, Denmark · Remote from Berlin*

- Led product management and all product design for the main platform, spanning web and mobile workflows for non-technical professionals.
- Reduced funeral-booking coordination time by an estimated 70% and reached 90% booking acceptance. Turned a multi-party brief into a reusable capability in the platform's calendar and form builder.
- Turned product requirements into buildable, ready-to-ship direction through token-based naming, annotated flows, redlined measurements and detailed component behavior alongside Figma.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform across DACH, the UK and the US) *Berlin, Germany*

- Owned and grew the design system, including Storybook, Figma Variables, navigation, modals and searchable multi-select components.
- Shared design-system ownership with Engineering through a standing governance group.
- Senior Leadership Team member with five direct reports; hired two people, promoted two and coached the design lead. Led Product and Design together for four months across nine people.

Director of Design

2016 – 2021

Datameer GmbH (enterprise data analytics for regulated banks and insurers) *Berlin · team across Germany and New York*

- Led UX across Germany and New York, with two UX designers reporting to me. Represented UX during a new-product pivot alongside product, engineering and design partners.
- Designed data-dense product surfaces including query builders, pivot tables, aggregated JSON views, result cards and filter logic.

UX Strategy Lead

2014 – 2016

Spreadshirt (international fashion and print-on-demand marketplace) *Leipzig, Germany*

- Led a nine-month seller-experience redesign for a platform connecting business sellers with a large consumer marketplace; research with shop owners changed an automation-first product direction.
- Prototyped and tested a mobile product designer that preserved creative control and moved into production.

CURRENT AI AND PRODUCT PRACTICE

Independent product work alongside employed roles.

Ninox AI onboarding — Summer 2025

Designed prompt-to-database onboarding in which the generated schema appears in the real editor beside chat, keeping direct manipulation and AI conversation as equal paths.

Selah for macOS — Independent product

Designed and agentically engineered a shipped Mac app, authoring pull requests that were merged and released to production.

EARLIER CAREER PROGRESSION

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · productized shared services with executive stakeholders

Independent Product Design Consultant · *Oratio&Co* · 2016 – Present · Remote · product strategy, UX direction and working prototypes

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · coaching and mentoring product designers

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, Pennsylvania, USA · complex consumer e-commerce

User Experience Designer · *andCulture* · 2012 – 2013 · Harrisburg, Pennsylvania, USA

Web Designer / Front-End Developer · *HOPE International* · 2009 – 2012 · Lancaster, Pennsylvania, USA

Earlier · *Web Designer, Bajaa.com and freelance* · 2000 – 2009 · Düsseldorf, Germany

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Product and interface design

end-to-end product design · interaction and visual design · responsive web and mobile · Figma · high-fidelity prototypes · usability testing · implementation review

Design systems and delivery

design tokens · DTCG · Style Dictionary · Storybook · Figma Variables · component architecture · Git and CI · token APIs · engineering governance

AI-native prototyping

Claude Code · working prototypes against real APIs · conversational UX · human-in-the-loop workflows · AI-assisted research synthesis · rapid validation

Research and product judgment

discovery · user interviews · product analytics · complex workflow mapping · B2B and consumer products · mentoring · native German · English C2
