Tobias Treppmann

Lead Product Designer · trustworthy AI, conversational workflows and reusable systems

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/zendesk LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I design AI-assisted products around the decisions people still need to understand and control. At Bibel TV, I shipped a support copilot with explicit boundaries and human review; at Ninox, generated databases remain editable in the real product. The portfolio is evidence of end-to-end shipped work, showing my decisions and personal impact.

Trust by design

explicit boundaries, inspectable output and human control

Generation with control

AI output editable in the real product

70% / 90%

less coordination time and booking acceptance at launch

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (consumer streaming across iOS, Android, web and connected TV) *Hamburg + Berlin, Germany*

- Lead product design and product management for Bibel TV's streaming experience across iOS, Android, web and connected TV, connecting discovery, usage data, prototypes and engineering delivery.
- Designed and shipped a platform-configured Microsoft Copilot skill for viewer services. Its prompt defines scope and restricted topics; out-of-scope input produces no draft. The team reviews, edits and sends every response.
- Prototype new AI interactions with Claude Code against production APIs. I direct, run, review and iterate the working software; external engineering uses the prototypes as implementation input.
- Built a platform-agnostic design-token API in four tiers. Storybook, automated checks and the same token vocabulary help people and coding agents produce consistent interfaces across platforms.
- Built an AI fundraising-content system from source analysis to production.
- Design and agentically develop "Bibel erklärt" (working title), a conversational AI Bible-study product in development. I own product direction, UX, UI, motion, onboarding and retrieval workflows.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical SaaS across six European markets) *Copenhagen, Denmark · Remote from Berlin*

- Led product design and product management for the core vertical SaaS platform.
- Turned a phone-based funeral process into a reusable booking capability inside the existing calendar and form builder, balancing automation with the pastor's final confirmation.
- Reduced coordination time by 70% and reached 90% booking acceptance at the launch customer before the capability rolled out to the full customer base.
- Used support signals to identify product opportunities, analyzing customer-service tickets, requests and HubSpot data for recurring pain points, feature requests and sentiment.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform across DACH, the UK and the US) *Berlin, Germany*

- Led design for Ninox's configurable no-code business platform.
- Senior Leadership Team member with five direct reports across product design and UX writing; for four months, led product and design together with nine reports.
- Owned Ninox's design system and established joint governance with Engineering.
- Returned as an independent consultant to design conversational prompt-to-database onboarding. The generated schema renders in the real editor beside chat, so users can inspect and change tables and fields directly.

Director of Design

2016 – 2021

Datameer GmbH (enterprise data analytics for regulated banks and insurers) *Berlin · team across Germany and New York*

- Led two UX designers across Germany and New York.
- Brought research into product and roadmap decisions as the company pursued a new product opportunity, securing executive support for customer research.
- Reached hard-to-find analysts inside regulated institutions through iterative screening on usertesting.com, then translated their work into data-dense workflows and uncertainty states.

UX Strategy Lead

2014 – 2016

Spreadshirt (international seller and consumer marketplace) *Leipzig, Germany*

- Research with shop owners changed an automation-first strategy. A tested mobile product-designer prototype preserved creative control and moved into production.

EARLIER CAREER PROGRESSION

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · standardized bespoke internal services through workshops with department heads

Independent Product Design Consultant · *Oratio & Co* · 2016 – Present · Remote · product strategy, workflow design and working prototypes

Senior Mentor · *CareerFoundry* · 2016 – 2026 · Remote · coaching and mentoring product designers

UX Manager · *HairDirect* · 2013 – 2014 · Lancaster, Pennsylvania, USA · complex consumer e-commerce

User Experience Designer · *andCulture* · 2012 – 2013 · Harrisburg, Pennsylvania, USA

Web Designer / Front-End Developer · *HOPE International* · 2009 – 2012 · Lancaster, Pennsylvania, USA

Earlier · *Web Designer, Bajaa.com and freelance* · 2000 – 2009 · Düsseldorf, Germany

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

AI product and conversational experience design

trustworthy automation · transparency and scope boundaries · human review · inspectable and editable output · conversational UX · prompt and context design · Microsoft Copilot · Claude

Product discovery and evidence

customer research · product usage and support signals · qualitative synthesis · rapid concept validation · usability testing · critical review of AI-assisted analysis

Systems, quality standards and prototyping

reusable interaction patterns · technical product environments · design systems · Storybook · Figma Variables · DTCG tokens · Style Dictionary · Claude Code · prototypes against real APIs · HTML, CSS and some JavaScript

Lead-level influence

end-to-end product design · product strategy · senior-stakeholder storytelling · Product and Engineering partnership · mentoring · native German · English C2 · Berlin-based
