

Tobias Treppmann

Target role: Founding Product Designer & Researcher · research-led, AI-native, end to end

LOCATION Berlin, Germany EMAIL hello@treppmann.design PORTFOLIO treppmann.design/for/stackgini LINKEDIN linkedin.com/in/tobiastreppmann

PROFILE

I'm the only in-house designer at Bibel TV: product manager, product owner and designer for a consumer app redesign, prototyping in real code that an external agency ships from. My research has reversed an executive strategy, and my AI interaction work has shipped twice, once more than doubling weekly use. Native German, English C2, Berlin.

+ 153% weekly starts

AI feature I designed full scope
· iOS · +85% Android · GA4

Public AI beta

Ninox prompt-to-database onboarding,
designed with the founders

70% less coordination

ChurchDesk booking capability · 90%
acceptance · then every customer

EXPERIENCE

Head of Product Design

2025 – Present

Bibel TV (German broadcaster in linear-to-streaming transformation — consumer app on iOS, Android, web and connected TV) Hamburg + Berlin, Germany

- The only in-house designer, holding product manager and product owner for the app redesign across iOS, Android, web and connected TV, running the ticket board engineering works from.
- The AI feature I designed full scope more than doubled weekly starts: +153% on iOS, +85% on Android (GA4, four-week averages). An unclear button became a self-explaining input.
- I prototype in Claude Code against production APIs, web first, then native Android. Engineering at an external agency ships from that code.
- Interviews recorded in Teams and analyzed with Claude, as thousands of forum posts were at Ninox before. AI carries analysis from roughly 200 data points up.
- A design system built from scratch as a four-tier token architecture, one source serving iOS, Android, web and connected TV, Storybook as the source of truth.
- A support copilot shipped for the viewer-services team; every send decision stays human.

Head of Platform and Design

2024 – 2025

ChurchDesk (vertical ERP for churches and dioceses — DE / DK / UK / SE / NO / CH) Copenhagen, Denmark · Remote from Berlin

- In-person discovery with the launch customer, pastors and funeral directors, then a booking capability embedded in the platform, not a standalone add-on: 70% less coordination time, 90% acceptance, then every customer.
- Flows, not screens: an availability calendar across multiple pastor calendars with progressive disclosure showing only viable slots, designed in Figma; engineering built it in React and React Native.
- Rules as design input: GDPR plus Protestant and Catholic church data-protection law across six countries; customers met the European Accessibility Act deadline automatically on the sites they host.
- Product management for the main platform alongside all product design.

Head of Product Design · Interim Head of Product

2023 – 2024

Ninox Software GmbH (no-code business platform, fast-growing during my tenure — DACH / UK / US) Berlin, Germany

- Prompt-to-database AI onboarding, designed with the CEO and technical co-founder as a consultant in summer 2025. The AI generates into the real data-model editor, chat beside direct manipulation.
- Shipped as Ninox's public AI beta in February 2026.
- Owned the design system and established joint governance with engineering.
- Senior Leadership Team, five reports across product design and UX writing; nine for four months as interim Head of Product.

Director of Design

2016 – 2021

Datameer GmbH (collaborative data analytics for top US / CA / UK banks and insurers) Berlin, Germany · team across Germany and NYC

- Research where access was the problem: in person with US banking customers, and iterative usertesting.com screening that reached hard-to-reach personas in regulated industries.
- Five years of data-dense interfaces: pivot tables, result cards, filter logic, and the sampling-uncertainty problem in query previews.
- Led the UX team across Germany and NYC, two designers reporting to me.

UX Strategy Lead

2014 – 2016

Spreadshirt (international e-commerce platform — sellers and hundreds of thousands of consumers) Leipzig, Germany

- In-person interviews with shop owners overturned an executive assumption about automation, after two earlier company attempts at the seller redesign had failed.
- A mobile designer research prototype I led went to production and shifted company mobile strategy.

EARLIER CAREER PROGRESSION

Independent Consultant · *Oratio&Co* · 2016 – Present · remote · AI-for-design training series for an agency's designers and developers, 2025 – 2026

Product & UX Strategist · *Hypoport hub SE* · 2021 – 2022 · Berlin / Lübeck · service-to-product transformation with the executive team; ITSM with the IT department

Earlier · *UX Manager, UX Designer, Web Designer & Front-End Developer* · 2009 – 2014 · Pennsylvania, USA · responsive web, front end and e-commerce

EDUCATION

M.A. Leadership

Kairos University, South Dakota, USA

Completed 2026

LANGUAGES

German · native

English · C2, fluent

SKILLS

Research and discovery

In-person interviews with shop owners, US banking customers, pastors and funeral directors · usertesting.com screening for hard-to-reach personas · interviews transcribed in Teams and analyzed with Claude · Dovetail as research repository · Claude over thousands of forum posts

AI interaction, and AI as method

AI output lands where the user already works, shipped twice, Ninox public AI beta and the KI Bibelaufschlag feature · Claude Code, Claude, Zed · prototypes in real code against production APIs · AI analysis from roughly 200 data points up

Figma and design systems

Figma components, variables and auto layout · design system owned at Ninox with joint engineering governance · four-tier token architecture built from scratch at Bibel TV · Storybook as the source of truth

Flows under real rules

Availability and booking flows across calendars · progressive disclosure · GDPR plus church data-protection law across six countries · the European Accessibility Act deadline met for customers · WCAG contrast held in light and dark in a color engine

Engineering partnership

Ticket boards engineering works from at ChurchDesk and Bibel TV · specs for an external agency · a product triad with a PM and an engineer at Spreadshirt · joint design-system governance at Ninox

Languages

German native · English C2 · six years working in the US
